**Innovation Cell**

**NGI Innovation Cell** is thus envisaged to network people, ideas, experience and resources to motivate the innovation community in the college. This cell helps to nurture the students’ ideas and encourage them to bring up business proposals. The Innovation Cell may facilitate even in getting funds for the project. Learning is a continuous process and there are always possibilities for improvement in the existing system around us. Using the facilities of workshops, laboratories, library including digital library facility, internet and intranet facilities and research facilities available in the institute, innovative ideas could be translated into reality or existing systems could be improved upon. The main aim of this Cell is, thus, to create intuition in terms of creative design ideas in various fields of engineering in an aesthetic approach. Innovation Cell will assist students and also encourage young talented minds by providing them a perfect platform for showcasing their talents, working together as teams and participate in various competitions. It will also serve to provide the students a platform to excel in their specialized area of interest.

**Social Media Cell**

Nowadays, social media plays a crucial role in people and industry networking. Social media platforms also help to publicize the accomplishments of the Institute's students and staff. The audience of Social Media platforms includes all stakeholders. NGI has social media accounts on Facebook, Instagram, LinkedIn, Twitter, and YouTube. Print Media includes newspapers, weeklies, magazines, blogs, banners, graphics, posters and other forms of printed material. In order to effectively make use of media, it has been decided to publicize our College events through social and print media

## Best Practices adopted, if any

### BESTPRACTICE-1

#### TITLE: INSTITUTE IN INDUSTRY

##### Objectives of the practice:

- To apply engineering/Management principles in an industrial situation.
- To demonstrate industrial procedures and practices.
- To describe the multi-disciplinary relationship in the industry.
- To demonstrate the personal and organizational skills in the industry. And
- To manage the work on site

##### Context:

- Many graduates join the industry after their graduation and hence they must have exposure to the industrial practices.
- There is established the fact that any industry operates based on the engineering Principles/application of different faculties/domain. Hence the graduate must understand and Implement multi-disciplinary approach at work.
- The industrial practices shall establish the relevance of theory to practice. There are many hidden practices in the industry as related to the management of work. The industrial exposure will provide the graduates the experience of the values and ethics required in industry.

##### Practice:

The institute has the workshop having industrial manufacturing facilities. Through these facilities, the tools and components are manufactured and supplied to the industries. The students of the institute are deployed in workshop having the industrial facilities. The students from a different branch of engineering attend the workshop during the practices/laboratory work and gain the experience of the industry. e.g. NGI organizes CNC Training program/ workshop for mechanical engineering students in each academic year.

##### Evidence of Success:

The industry demonstrated the competencies and skills required while working in the industry

##### Problems Encountered and Resources Required

###### Problems encountered:

- Integrating the branch wise experiences.
- Demonstrating the faculty wise experimentations
- Time management

**Resources required:** Expertise in the design of problem-based learning and project-based learning.
