**Date:** 29-01-2024

**Notice: Workshop on Six Sigma White Belt**

This is to inform all first-year engineering students that a workshop on "Six Sigma White Belt" will be conducted from **6th February 2024 to 10th February 2024**. This workshop will introduce students to the fundamentals of Six Sigma methodology and its application in improving processes and quality.

**Workshop Details:**

**Dates:** 6th February 2024 to 10th February 2024

**Time:** 09:00 AM to 05:00 PM

**Location:** Dr. A. P. J Abdul Kalam Hall

All first-year students are encouraged to attend this workshop to gain a foundational understanding of Six Sigma practices and earn their White Belt certification. Participation is highly recommended.

**Workshop Coordinator**  
**Prof. P. S. Mule**

**FE HOD**  
**Prof. S. S. Raut**

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**First Year Engineering Department**

**Value Added Program Topic:** Six Sigma White Belt

**Organizer:** Sigma Consultants, Pune

**Date:** 06-02-2024 to 10-02-2024

**Academic Year:** 2023-2024

**Total Program Duration:** 30 Hours

**Detail "Six Sigma White Belt" Five Day Program Content**

**Day 1: Introduction to Six Sigma**

***1. Overview of Six Sigma***

- 1.1 History and evolution of Six Sigma
- 1.2 Importance and application in engineering
- 1.3 Key principles and objectives

***2. Introduction to DMAIC Process***

- 2.1 Define, Measure, Analyze, Improve, Control (DMAIC) methodology overview
- 2.2 Understanding the role of DMAIC in process improvement

***3. The Define Phase***

- 3.1 Identifying problems and setting goals
- 3.2 Voice of the Customer (VOC)
- 3.3 Project Charter and Problem Statement

***4. Introduction to Process Mapping***

- 4.1 Basics of process mapping
  - 4.2 SIPOC (Suppliers, Inputs, Process, Outputs, Customers)
  - 4.3 Hands-on activity: Create a basic SIPOC diagram
- 

**Day 2: Measurement Techniques**

***1. The Measure Phase***

- 1.1 Importance of measurement in Six Sigma
- 1.2 Types of data: Continuous vs Discrete
- 1.3 Common measurement tools and techniques

***2. Basic Statistical Concepts***

- 2.1 Introduction to statistics: Mean, Median, Mode, Range, and Standard Deviation
- 2.2 Variability and data dispersion
- 2.3 Practical examples and problem-solving

***3. Measurement System Analysis (MSA)***

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

- 3.1 Introduction to Gage R&R (Repeatability & Reproducibility)
- 3.2 Collecting data and understanding measurement error
- 3.3 Hands-on exercise: Basic MSA and error analysis

**4. Introduction to Process Capability**

- 4.1 Understanding Cp, Cpk, and their significance
  - 4.2 Process capability analysis in manufacturing
- 

**Day 3: Analysis Phase**

**1. The Analyze Phase**

- 1.1 Identifying root causes of variation
- 1.2 Cause-and-Effect Diagrams (Fishbone, 5 Whys)
- 1.3 Case studies: Identifying problems in engineering processes

**2. Hypothesis Testing Basics**

- 2.1 Null and Alternative Hypothesis
- 2.2 Introduction to t-tests, ANOVA
- 2.3 Case study on hypothesis testing in real-world scenarios

**3. Introduction to Pareto Analysis**

- 3.1 The 80/20 rule and its applications
- 3.2 Creating Pareto charts for problem prioritization

**4. Hands-on Analysis Exercise**

- 4.1 Group activity: Identifying root causes in simulated problems
  - 4.2 Analyze data and create an actionable plan
- 

**Day 4: Improvement Phase**

**1. The Improve Phase**

- 1.1 Generating solutions and evaluating their effectiveness
- 1.2 Brainstorming techniques (Affinity Diagrams, SCAMPER)
- 1.3 Cost-benefit analysis of improvements

**2. Failure Mode and Effects Analysis (FMEA)**

- 2.1 Understanding FMEA and its importance in risk assessment
- 2.2 Case study: FMEA in engineering projects

**3. Lean Principles and Waste Reduction**

- 3.1 Introduction to Lean methodology

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

- 3.2 The 7 types of waste in engineering processes
- 3.3 Hands-on exercise: Identifying waste in case studies

**4. Process Simulation and Improvements**

- 4.1 Using simulation tools to test proposed improvements
- 4.2 Real-time case studies

---

**Day 5: Control Phase and Certification**

**1. The Control Phase**

- 1.1 Sustaining improvements over time
- 1.2 Control charts and their applications
- 1.3 Case study: Implementing control mechanisms

**2. Introduction to Statistical Process Control (SPC)**

- 2.1 Understanding variation with control charts (X-bar, R-charts)
- 2.2 Practical examples from manufacturing processes

**3. Final Project: Simulation of a Six Sigma Project**

- 3.1 Group activity: Implement a full DMAIC cycle on a simulated engineering problem
- 3.2 Presentation of findings and recommendations

**4. Review and Certification**

- 4.1 Review of key concepts from the workshop
- 4.2 White Belt certification exam (optional)
- 4.3 Feedback session and Q&A

**Workshop Coordinator

**Value Added Program Topic:** Six Sigma White Belt

**Organizer:** Sigma Consultants, Pune

**Date:** 06-02-2024 to 10-02-2024

**Academic Year:** 2023-2024

**Total Program Duration:** 30 Hours

**Name of the student:** Jadhav Sneha Manoj

**Division:** B

**Roll No.** 138

**QUIZ QUESTIONS**

**Instructions:**

**Quiz Title:** Six Sigma White Belt Assessment

**Duration:** 30 minutes

**Total Questions:** 15

**Total Marks:** 15

**Type of Questions:** Multiple Choice Questions (MCQs)

**Maximum Marks per Question:** 1 Mark

**Negative Marking:** None

**1. What does DMAIC stand for in Six Sigma?**

- a) Define, Measure, Analyze, Implement, Control
- ☒ b) Define, Measure, Analyze, Improve, Control
- c) Define, Measure, Assess, Improve, Control
- d) Define, Monitor, Assess, Implement, Control

**2. Which of the following tools is used in the Define phase of DMAIC?**

- ☒ a) SIPOC diagram
- b) Control chart
- c) Hypothesis testing
- d) Gage R&R

**3. In which phase of DMAIC would you identify the root cause of a problem?**

- a) Define
- b) Measure
- c) Analyze
- ☒ d) Improve

**4. What is the primary goal of the Measure phase?**

- a) To define the problem
- ☒ b) To evaluate possible solutions
- c) To collect data and understand the current process performance
- d) To control the process post-improvement

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**5. Which statistical tool would you use to check the variation in a process?**

- a) Fishbone diagram
- ☒ b) Control chart
- c) Process map
- d) SIPOC

**6. What does SIPOC stand for?**

- a) Suppliers, Inputs, Process, Outputs, Customers
- ☒ b) Systems, Inputs, Process, Outputs, Controls
- c) Standards, Inputs, Process, Outputs, Customers
- d) Suppliers, Indicators, Process, Outputs, Controls

**7. What is Gage R&R used for?**

- a) To measure process capability
- ☒ b) To analyze variation in a measurement system
- c) To evaluate potential solutions
- d) To identify waste

**8. In Six Sigma, what is the purpose of FMEA (Failure Mode and Effects Analysis)?**

- a) To define the process
- ☒ b) To identify potential points of failure and their impact
- c) To measure process performance
- d) To control the process post-improvement

**9. What is the significance of Cp and Cpk in process capability analysis?**

- a) They measure customer satisfaction
- b) They determine the root cause of defects
- ☒ c) They evaluate how well a process meets specifications
- d) They help in controlling the process

**10. Which of the following is a tool to help identify waste in a process?**

- a) Control chart
- b) FMEA
- c) Pareto chart
- ☒ d) Process mapping

**11. What principle does the Pareto chart follow?**

- a) The 50/50 rule
- ☒ b) The 80/20 rule
- c) The 60/40 rule
- d) The 70/30 rule

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

12. What kind of data is analyzed using a t-test?

- a) Categorical data
- ☒ b) Continuous data
- c) Ordinal data
- d) Nominal data

13. Which of the following techniques would you use in the Improve phase to generate ideas for solutions?

- a) Control charts
- ☒ b) Brainstorming (Affinity Diagrams, SCAMPER)
- c) SIPOC
- d) Gage R&R

14. Which of these is NOT a type of waste identified by Lean principles?

- a) Overproduction
- b) Transportation
- c) Talent underutilization
- ☒ d) Process Mapping

15. After improvements are made, which phase focuses on maintaining those improvements?

- a) Define
- b) Analyze
- c) Improve
- ☒ d) Control

5. Which statistical tool would you use to check the variation in a process?

- a) Fishbone diagram
- ✓ b) Control chart
- c) Process map
- d) SIPOC

6. What does SIPOC stand for?

- ✓ a) Suppliers, Inputs, Process, Outputs, Customers
- b) Systems, Inputs, Process, Outputs, Controls
- c) Standards, Inputs, Process, Outputs, Customers
- d) Suppliers, Indicators, Process, Outputs, Controls

7. What is Gage R&R used for?

- a) To measure process capability
- ✓ b) To analyze variation in a measurement system
- c) To evaluate potential solutions
- d) To identify waste

8. In Six Sigma, what is the purpose of FMEA (Failure Mode and Effects Analysis)?

- a) To define the process
- ✓ b) To identify potential points of failure and their impact
- c) To measure process performance
- d) To control the process post-improvement

9. What is the significance of Cp and Cpk in process capability analysis?

- a) They measure customer satisfaction
- b) They determine the root cause of defects
- ✓ c) They evaluate how well a process meets specifications
- d) They help in controlling the process

10. Which of the following is a tool to help identify waste in a process?

- a) Control chart
- b) FMEA
- ✓ c) Pareto chart
- d) Process mapping

11. What principle does the Pareto chart follow?

- a) The 50/50 rule
- ✓ b) The 80/20 rule
- c) The 60/40 rule
- d) The 70/30 rule

**QUIZ ANSWER KEY**

**1. What does DMAIC stand for in Six Sigma?**

*Answer: b) Define, Measure, Analyze, Improve, Control*

**2. Which of the following tools is used in the Define phase of DMAIC?**

*Answer: a) SIPOC diagram*

**3. In which phase of DMAIC would you identify the root cause of a problem?**

*Answer: c) Analyze*

**4. What is the primary goal of the Measure phase?**

*Answer: c) To collect data and understand the current process performance*

**5. Which statistical tool would you use to check the variation in a process?**

*Answer: b) Control chart*

**6. What does SIPOC stand for?**

*Answer: a) Suppliers, Inputs, Process, Outputs, Customers*

**7. What is Gage R&R used for?**

*Answer: b) To analyze variation in a measurement system*

**8. In Six Sigma, what is the purpose of FMEA (Failure Mode and Effects Analysis)?**

*Answer: b) To identify potential points of failure and their impact*

**9. What is the significance of Cp and Cpk in process capability analysis?**

*Answer: c) They evaluate how well a process meets specifications*

**10. Which of the following is a tool to help identify waste in a process?**

*Answer: d) Process mapping*

**11. What principle does the Pareto chart follow?**

*Answer: b) The 80/20 rule*

**12. What kind of data is analyzed using a t-test?**

*Answer: b) Continuous data*

**First Year Engineering Department**

**Value Added Program Topic:** Six Sigma White Belt

**Organizer:** Sigma Consultants, Pune

**Date:** 06-02-2024 to 10-02-2024

**Academic Year:** 2023-2024

**Total Program Duration:** 30 Hours

**Activity Report**

**1. Workshop Overview**

The "Six Sigma White Belt" workshop aimed to introduce first-year engineering students to the fundamentals of Six Sigma methodology, with a focus on the DMAIC (Define, Measure, Analyze, Improve, Control) process. The workshop combined theoretical discussions with practical hands-on activities to give participants a comprehensive understanding of process improvement and quality management. The sessions emphasized data-driven decision-making and the importance of reducing variability in processes.

**2. Workshop Objectives**

- 2.1 Introduce participants to Six Sigma concepts and its role in engineering processes.
- 2.2 Provide practical knowledge of the DMAIC framework.
- 2.3 Demonstrate statistical tools and techniques for process improvement.
- 2.4 Engage students in interactive activities for hands-on experience with Six Sigma tools.
- 2.5 Equip students with problem-solving skills relevant to engineering.

**3. Workshop Agenda**

*Day 1:* Introduction to Six Sigma

*Day 2:* Measurement Techniques

*Day 3:* Analyze Phase

*Day 4:* Improvement Phase

*Day 5:* Control Phase and Certification

**4. Participant Engagement**

- 4.1 The participants were actively engaged through a variety of activities, including interactive lectures, group discussions, hands-on exercises, and case studies.
- 4.2 Real-world engineering examples were used to demonstrate Six Sigma concepts, which helped students relate to the material.

**5. Learning Outcomes**

By the end of the workshop, participants were able to:

- 5.1 Understand the DMAIC methodology and its applications in engineering.
- 5.2 Utilize tools like SIPOC, Pareto charts, Fishbone diagrams, and FMEA for process analysis and improvement.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

5.3 Apply statistical tools such as Gage R&R, control charts, and process capability analysis in real-world scenarios.

5.4 Identify types of waste in engineering processes and propose effective solutions.

5.5 Develop problem-solving skills through structured methods and data-driven decision-making.

#### **6. Challenges Faced**

6.1 Some students initially struggled with statistical concepts, particularly in the Analyze and Control phases. This was addressed through additional examples and simpler explanations.

6.2 Time management during hands-on activities was a challenge, as some groups required extra time for exercises.

#### **7. Feedback Summary**

7.1 *Overall Feedback:* The majority of students appreciated the hands-on approach and found the workshop valuable for gaining practical skills.

#### **8. Activity Photo**

#### **8. Conclusion**

The "Six Sigma White Belt" workshop successfully introduced first-year engineering students to Six Sigma principles, focusing on practical applications and interactive learning. The participants demonstrated a good understanding of the DMAIC process and are now equipped with foundational knowledge to approach process improvement in their future studies and careers.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**9. Attachments**

9.1 Quiz Assessment

9.2 Certification: White Belt certifications were awarded to all participants who completed the quiz.

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune - 412213

**First Year Engineering Department**

**Attendance Sheet**

**Value Added Program Topic: Six Sigma White Belt**

**Academic Year: 2023-2024**

**Date: 10-02-2024**

**Day: 05**

**Organizer: Sigma Consultants, Pune**

**Workshop Duration: 30 Hours**

Sr.No	Name of Student	Signature
1	Mahangade Avishkar Sahebrao	<i>Avish</i>
2	Shingare Yash Dnyaneshwar	<i>Yash</i>
3	Yadav Abhay Ramjag	<i>Abhay</i>
4	Gaikwad Rutuja Avinash	<i>Gaikwad</i>

68	Kale Rajashri Prakash	<u>Rajashri</u>

69	Kale Soham Mahadev	Kale
70	Karale Balkrishna Dnyande	Balkrishna
71	Karande Rutuja Tanaji	Karande
72	Karenavar Kiran Vasant	Kiran
73	Katkar Kiran Kishor	Katkar
74	Khandale Adesh Sunil	Adesh
75	Khandare Prajwal Maruti	Prajwal
76	Konde Sahil Subhash	Sahil
77	Konde Sahil Vijay	Sahil
78	Korde Tanmay Satish	Korde
79	Kshirsagar Shubham	Kshirsagar
80	Kurane Ishwar Ajinath	Ishwar
81	Lohar Prashant Gorakh	Lohar
82	Madane Sani Tukaram	Sani
83	Mahanawar Aniket Anna	Aniket
84	Mane Soniya Arjun	Mane
85	Marathe Paras Bhalchandra	Marathe
86	Memane Harshvardhan Mangesh	Memane
87	Mhaske Neil	Mhaske
88	Mohite Ayush Shashikant	Ayush
89	More Akshay Sanjay	More
90	More Rudra Motilal	Rudra
91	Mulik Srushti Mahendra	Mulik
92	Nanaware Tanmay Tanaji	Nanaware
93	Nirpal Shubham Laxman	Nirpal
94	Nitin	Nitin
95	Patil Gauri Rakesh	Patil
96	Patil Pratik Pradeep	Patil
97	Pawar Kiran Ravindra	Pawar
98	Pawar Nikhil Kisan	Pawar
99	Pawar Rutuja Santosh	Pawar
100	Pawar Sudarshan Popat	Pawar
101	Pawar Vikram Raosaheb	Vikram
102	Pisal Omraj Sharad	Pisal
103	Pol Amit Bhaskar	Pol
104	Prajapati Ankit Ramchandra	Prajapati
105	Rajbhar Khushi Sukhlal	Rajbhar
106	Rajput Sourabh Santosh	Rajput
107	Rathod Aaryan Sanjay	Rathod
108	Raut Sneha Fakirchand	Raut
109	Raykar Ishwari Ramesh	Raykar
110	Salunke Sushant Dattatraya	Salunke

111	Sangale Snehank Arjun	Sangale
112	Sangave Sujal Sunil	Sujal
113	Sapkal Aditi Vitthal	Aditi
114	Sawant Abhishek Namdeo	Abhishek
115	Shelke Vishal Ashok	Vishal
116	Shendkar Mahesh Bharat	Shen
117	Shilimkar Aryan Ajit	Ajit
118	Shinde Aariyan Sachin	Shinde
119	Shinde Atharva Umesh	Shinde
120	Shinde Chaitanya Madhukar	Chaitanya
121	Shinde Dhananjay Prabhakar	Shinde
122	Shinde Divya Satish	Divya
123	Shinde Sonali Rajendra	Sonali
124	Singh Shashank Kumar	S.S.K
125	Surkutlawar Suraj Ashokrao	S
126	Suthar Kisan Tejaram	Suthar
127	Tarkase Sachin Namdeo	Tarkase
128	Tayade Vasudha Ajay	Vasudha
129	Thakare Sejal Nagesh	Thakare
130	Thoke Amit Eknath	Amit
131	Thopate Kartik Mohan	Thopate
132	Tikhe Vivek Anil	Tikhe
133	Torkad Gurunath Ramrao	Torkad
134	Uday Mahendra Rajput	Uday
135	Vibhute Sai Sachin	Sai
136	Wagh Rushikesh Balasaheb	Wagh
137	Waghmode Anna Balu	Anna
138	Zalate Prashant Hanumant	Zalate
139	Aakash Raju Pardeshi	Aakash
140	Babar Yash Suresh	Babar
141	Balutkar Shruti Shatrughna	Shruti
142	Bandal Sakshi Vilas	Bandal
143	Bangar Gaurav Popat	Bangar
144	Bedke Dnyaneshwar Agatrao	Dnyaneshwar
145	Bhagat Pratik Rajendra	Bhagat
146	Bhosale Ganesh Bhagirath	Bhosale
147	Bodake Sangram Namdev	Sangam
148	Chaudhari Prathamesh Netaji	Chaudhari
149	Chavan Anupkumar Gopal	Anupkumar
150	Chavan Rohan Nitin	Rohan
151	Dede Anushka Bibhishan	Dede
152	Deshmane Gayatri Ramchandra	Deshmane

153	Devkate Sarthak Ramesh	<u>Devkate</u>
154	Dhaigude Aadesh Anil	<u>Aadesh</u>
155	Dhotre Dhanashree Raju	<u>Dhotre</u>
156	Dhumal Sanika Nalendra	<u>Sanika</u>
157	Durgude Shankar Ramesh	<u>Durgude</u>
158	Fargade Vinita Janardhan	<u>Vinita</u>
159	Gavade Vaishnavi Dipak	<u>Gavade</u>
160	Ghole Prem Nandu	<u>Ghole</u>
161	Gosavi Dayanand Rajendra	<u>Gosavi</u>
162	Gurav Sakshi Santosh	<u>Gurav</u>
163	Hambir Saurabh Somnath	<u>Hambir</u>
164	Jadhav Abhaysinh Sudhir	<u>Jadhav</u>
165	Jadhav Seva Arjun	<u>Seva</u>
166	Jadhav Vaiju Raju	<u>Jadhav</u>
167	Kabdule Vivek Sandeep	<u>Vivek</u>
168	Kadam Anish Namdev	<u>Anish</u>
169	Kale Ravindra Satish	<u>Kale</u>
170	Kale Samruddhi Pandurang	<u>Samruddhi</u>
171	Kamble Neha Dilip	<u>Kamble</u>
172	Konde Sanika Sandip	<u>Konde</u>
173	Konde Srushti Namdev	<u>Konde</u>
174	Kondhalkar Yash Santosh	<u>Yash</u>
175	Korade Chaitrali Dattatray	<u>Chaitrali</u>
176	Kshirsagar Nikita Narayan	<u>Kshirsagar</u>
177	Kumbhar Rushikesh Ramesh	<u>Rushikesh</u>
178	Kurhade Bhumika Dilip	<u>Bhumika</u>
179	Lodha Jay Nemichand	<u>Jay</u>
180	Mali Atharva Bhagwan	<u>Mali</u>
181	Motghare Anushri Ashok	<u>Motghare</u>
182	Nagmode Pratik Pandurang	<u>Nagmode</u>
183	Narute Nikita Appa	<u>Narute</u>
184	Pal Shreyash Jeetendra	<u>Pal</u>
185	Patane Karan Pandurang	<u>Patane</u>
186	Pawar Vaishnavi Kisan	<u>Vaishnavi</u>
187	Phalak Purvesh Vijay	<u>Phalak</u>
188	Pote Bhagyashri Shivaji	<u>Pote</u>
189	Rakh Karan Gajanan	<u>Rakh</u>
190	Raskar Bhushan Ramchandra	<u>Bhushan</u>
191	Raut Sakshi Ramesh	<u>Raut</u>
192	Roman Rohan Sanjay	<u>Roman</u>
193	Sande Anam Ashfaq	<u>Sande</u>
194	Shaikh Mushtak Jamir	<u>Shaikh</u>

195	Shelar Pranav Sachin	<u>Pranav</u>
196	Shelar Tanvi Lahu	<u>Tanvi</u>
197	Shinde Aditya Santosh	<u>Aditya</u>
198	Shinde Siddhi Santosh	<u>Su</u>
199	Suryawanshi Niraj Parshuram	<u>Niraj</u>
200	Tekawade Tanmay Shashikant	<u>S.T</u>
201	Torve Sandip Santosh	<u>Sandip</u>
202	Tote Onkar Balasaheb	<u>Tote</u>
203	Veer Harshal Mahesh	<u>Veer</u>
204	Waghmode Rohan Balasaheb	<u>Rohan</u>
205	Yadav Shaniraj Ramdas	<u>Shaniraj</u>
206	Zaware Omkar Babasaheb	<u>Omkar</u>
207	Adsul Avdhut Sunil	<u>Avdhut</u>
208	Bhosale Vaishnavi Rajendra	<u>Vaishnavi</u>
209	Bodake Akanksha Shantaram	<u>Akanksha</u>
210	Bodake Ashish Ananda	<u>Ashish</u>
211	Bongane Yash Dashrath	<u>Y.B.D</u>
212	Choundkar Gourav Malhari	<u>Gourav</u>
213	Deshmukh Aniruddha Rajendra	<u>Aniruddha</u>
214	Devgirikar Ujjwala Vijay	<u>Ujjwala</u>
215	Dhadve Tanmay Sainath	<u>Tanmay</u>
216	Dhanavi Nishant Rajesh	<u>Nishant</u>
217	Dhumal Bhagyashri Mohan	<u>Bhagyashri</u>
218	Dhumal Raj Pramod	<u>Raj</u>
219	Dhumal Samidha Sanjay	<u>Samidha</u>
220	Gade Dnyaneshwari Santosh	<u>Dnyaneshwari</u>
221	Gaikwad Karan Vikas	<u>Karan</u>
222	Gavhane Sahil Sanjay	<u>Sahil</u>
223	Gore Mahesh Sanjay	<u>Mahesh</u>
224	Gore Omkar Kiran	<u>Omkar</u>
225	Ingulkar Aditya Tanaji	<u>Aditya</u>
226	Ithape Anurag Vijay	<u>Anurag</u>
227	Jadhav Dhiraj Santosh	<u>Jadhav</u>
228	Jadhav Raj Satish	<u>Raj</u>
229	Jadhav Sakshi Pratap	<u>Sakshi</u>
230	Jadhav Shreyash Ramesh	<u>Shreyash</u>
231	Jagtap Om Keshav	<u>Om</u>
232	Kanade Onkar Govind	<u>Onkar</u>
233	Karale Pranali Sanjay	<u>Pranali</u>
234	Konde Payal Damodar	<u>Payal</u>
235	Kondhalkar Aniket Santosh	<u>Aniket</u>
236	Kumbhar Kunal Chandrakant	<u>Kunal</u>

237	Lawande Aniket Tanaji	Lawande
238	Mandhare Mayuresh Pravin	Mandhare
239	Mote Ankita Appa	Mote
240	Nanaware Jay Sanjay	Jay
241	Navagire Mayur Pramod	Mayur
242	Patil Sumit Anandrao	Patil
243	Pawar Aniket Siddheshwar	Aniket
244	Pisal Saurav Mahadev	Mahadev
245	Pisal Swarali Dipak	Dipak
246	Ranjane Pranav Prakash	Ranjane
247	Ringe Omkar Gajanan	Omkar
248	Sadgar Suhani Shankar	Suhani
249	Sakhare Manmath Santosh	Manmath
250	Sanap Aditya Ramchandra	Aditya
251	Sanas Mrunmai Mangesh	Mrunmai
252	Shinde Sahil Suresh	Sahil
253	Sutar Shravani Sanjay	Shravani
254	Yadav Sneha Shamrao	Sneha
255	Atkuri Rohit Rajam	R.R. Atkuri
256	Awachar Vaishnavi Kashinath	Vaishnavi
257	Bade Aditya Ramdas	Aditya
258	Bangar Aniket Kailas S	Aniket
259	Bankar Shravani Vinod	Shravani
260	Barguje Sanket Ravindra	Sanket
261	Bhand Sakshi Ravindra	Sakshi
262	Bhosale Abhishek Sharad	Abhishek
263	Bhosale Sakshi Laxman	Sakshi
264	Bhumkar Dnyaneshwari Sandeep	Dnyaneshwari
265	Biradar Anjali Ravindra	Anjali
266	Borkar Dharmraj Maruti	Dharmraj
267	Budgude Gaurav Dilip	Gaurav
268	Changulpai Kuldip Sitaram	Kuldip
269	Chinchkar Vaishnavi Prakash	Vaishnavi
270	Choudhari Pradip Raosaheb	Pradip
271	Dake Amruta Sopan	Amruta
272	Dhumal Sakshi Mahendra	Sakshi
273	Gawali Nikita Santosh	Nikita
274	Ithape Ankita Arjun	Ankita
275	Jadhav Priyanka Popat	Priyanka
276	Jawale Kiran Prakash	Kiran
277	Kadam Sumit Shahaji	Sumit
278	Kakade Aditya Sunil	Aditya

279	Kakade Vishal Shivaji	V. Kakade
280	Kale Sarthak Shashikant	Sarthak
281	Kamble Hariba Baburao	H.B. Kamble
282	Kamble Sushil Dajirao	<del>S. Kamble</del>
283	Kartika Bhimrao Thakare	Kartika
284	Khadke Shruti Nivrutti	Khadke
285	Khandre Vansh Pravin	V. Khandre
286	Kolate Nikita Sanjay	<del>N. Kolate</del>
287	Konde Pranali Dipak	P. Konde
288	Kotalwar Vishal Rajendra	Vishal K.
289	Kshirsagar Onkar Balu	K. Onkar
290	Landge Pravin Bharat	P. Landge
291	Mangale Aditya Arjun	Mangale
292	Mehetre Vishal Jalindar	<del>V. Mehete</del>
293	More Shravani Ganesh	Shravani
294	Nachan Abhishek Vitthal	Nachan A.
295	Nangare Aishwarya Dattatray	A. Nangare

Department of E&TC Engineering

Date: 25/01/2024

## NOTICE

All S.E. students are hereby informed that Department of E&TC of NESGI-FOE has scheduled an Workshop on Advance Java With Spring Boot .All are informed to attend the same. Schedule for Workshop is From 27/01/2024 to 31/01/2024.

  
Coordinator

  
Head of Department

**Name of Workshop : Advanced java with spring Boot**

**Organized By : E & TC Department**

**Resource Person :Suchit Gajibi(Info Vision Lab)**

## **contains**

### **Day 1: Introduction to Advanced Java and Setting Up the Environment**

- **Duration:** 6 hours
- **Topics:**
  1. **Introduction to Java Features (1 hour)**
    - Overview of key Java features.
    - Portability, object-oriented programming, platform independence.
  2. **Setting Up the Development Environment (2 hours)**
    - Installing Java Development Kit (JDK).
    - Setting up Integrated Development Environment (IDE) - IntelliJ IDEA/Eclipse.
    - Configuring Maven and Gradle.
    - Setting up Git and version control basics.
  3. **Core Java Concepts (2 hours)**
    - Understanding Package and Import statements.
    - Java Virtual Machine (JVM) architecture.
    - Static and Instance blocks.
    - Just-In-Time (JIT) compiler basics.
  4. **Introduction to Access Specifiers/Modifiers (1 hour)**
    - Understanding Private, Public, Default, and Protected.
    - Examples and best practices.

### **Day 2: Advanced Java Concepts and Multithreading**

- **Duration:** 6 hours
- **Topics:**
  1. **Introduction to Advanced Java Concepts (2 hours)**
    - Recap of basic Java.
    - Deep dive into advanced topics like Generics, Lambda expressions, and Functional interfaces.
    - Reflection and Annotations.
  2. **Multithreading in Java (2 hours)**
    - Basics of threads and concurrency.
    - Creating and managing threads in Java.
    - Thread lifecycle, synchronization, and inter-thread communication.
    - Executors framework and real-world examples.
  3. **Garbage Collection (1 hour)**

**3. Garbage Collection (1 hour)**

- Understanding Java's memory management.
- How garbage collection works.
- Types of garbage collectors in Java (Serial, Parallel, CMS, G1). Best practices for optimizing garbage collection.

**4. Practical Session: Implementing Multithreading and Memory Management (1 hour)**

- Hands-on coding exercises to implement multithreading.
- Analyzing memory management using Java tools.

### **Day 3: Java Database Connectivity (JDBC)**

- **Duration:** 6 hours

- **Topics:**

**1. Introduction to JDBC (1 hour)**

- What is JDBC?
- JDBC architecture and components.
- JDBC vs. Hibernate vs. JPA.

**2. Setting Up JDBC (1 hour)**

- Configuring JDBC in Java applications.
- Connecting to different databases (MySQL, PostgreSQL, etc.).
- Setting up database drivers.

**3. Executing SQL Queries with JDBC (2 hours)**

- Statement, PreparedStatement, CallableStatement.
- Executing SELECT, INSERT, UPDATE, DELETE queries.
- Handling SQL exceptions.

**4. Advanced JDBC Features (1 hour)**

- Batch processing.
- Transaction management.
- Connection pooling.

**5. Practical Session: Building a JDBC-based Application (1 hour)**

- Hands-on practice to create a Java application using JDBC.
- Implementing CRUD operations.

### **Day 4: Web Services, APIs, and MVC in Spring Boot**

- **Duration:** 6 hours

- **Topics:**

**1. Introduction to Web Services and APIs (2 hours)**

- Overview of Web Services.
- REST vs. SOAP web services.
- Building RESTful services using Spring Boot.

- Introduction to JSON and XML.
- 2. **Developing RESTful APIs with Spring Boot (2 hours)**
  - Setting up a Spring Boot project for REST APIs.
  - Using `@RestController`, `@RequestMapping`, `@GetMapping`, etc.
  - Handling HTTP methods: GET, POST, PUT, DELETE.
  - Exception handling in REST APIs.
- 3. **Introduction to Model-View-Controller (MVC) (1 hour)**
  - Overview of MVC architecture.
  - Role of Model, View, and Controller.
  - Benefits of using MVC in web applications.
- 4. **Spring Boot MVC Basics (1 hour)**
  - Using Spring Boot to implement MVC.
  - Understanding `@Controller` and `@Service`.
  - Data binding and validation with Spring MVC.

## Day 5: Advanced Spring Boot MVC and Integrating with Databases

- **Duration:** 6 hours
- **Topics:**
  1. **Advanced Spring Boot MVC Concepts (2 hours)**
    - Understanding and using Thymeleaf for templating.
    - Form handling in Spring MVC.
    - Spring Security basics for MVC applications.
  2. **Spring Boot with Databases (2 hours)**
    - Using Spring Data JPA with Spring Boot.
    - Configuring DataSource and JPA properties.
    - Creating Repositories, Entities, and CRUD operations.
    - Using H2 in-memory database for quick testing.
  3. **Project: Building a Complete Spring Boot Application (2 hours)**
    - Step-by-step development of a full-stack web application using Spring Boot.
    - Integrating front-end (Thymeleaf) with back-end.
    - Implementing REST APIs, database interactions, and MVC pattern.

### Additional Notes:

- **Daily Recap and Q&A (30 minutes each day)**
  - Each day should end with a recap of what was covered and a Q&A session to clarify doubts.
- **Homework and Assignments**
  - Participants should be given practical assignments to reinforce the day's

learning.

- Code reviews and discussions can be planned for the next day.

- **Tools and Resources**

- Provide a list of useful tools, libraries, and resources for further learning.
- Share code samples and reference materials used during the workshop.

This workshop outline is designed to provide a comprehensive understanding of advanced Java concepts and practical skills in building applications with Spring Boot.

20

**Quiz question: Advanced with Spring Boot**

**Section A: Java Features**

1. Which feature of Java ensures that a Java application can run on any machine that has a Java Virtual Machine (JVM)?

- ☐ A) Portability
- ☐ B) Scalability
- ☒ C) Multithreading
- ☐ D) Security

2. What is the purpose of the final keyword in Java?

- ☐ A) To define a method that cannot be overridden
- ☐ B) To define a variable that cannot be changed
- ☒ C) To define a class that cannot be subclassed
- ☐ D) All of the above

3. Which feature of Java allows the creation of a thread-safe application without using explicit synchronization?

- ☐ A) Functional interfaces
- ☐ B) Lambda expressions
- ☒ C) Concurrency utilities
- ☐ D) Streams API

4. What is the main advantage of using Java Streams API introduced in Java 8?

- ☐ A) Simplifies processing of collections
- ☐ B) Enhances the performance of Java applications
- ☒ C) Facilitates I/O operations
- ☐ D) Improves exception handling

5. Which of the following is a core concept of advanced Java programming?

- ☐ A) Object-oriented programming
- ☒ B) Multithreading
- ☐ C) Garbage collection
- ☐ D) All of the above

6. In Java, which component is responsible for managing the lifecycle of a servlet?

- ☐ A) Web server
- ☒ B) Servlet container
- ☐ C) HTTP server
- ☐ D) Java Runtime Environment

7. Which advanced Java feature allows a class to call methods that are implemented in another language, such as C or C++?

- A) JNI (Java Native Interface)
- B) RMI (Remote Method Invocation)
- C) JNDI (Java Naming and Directory Interface)
- D) JDBC (Java Database Connectivity)

8. What does JDBC stand for in Java?

- A) Java Development Connectivity
- ✓ ◦ B) Java Database Connection
- C) Java Database Connectivity
- D) Java Data Configuration

9. Which JDBC driver type is known as the pure Java driver?

- A) Type 1
- B) Type 2
- ✓ ◦ C) Type 3
- D) Type 4

10. Which method is used to execute a SQL query using JDBC?

- ✓ ◦ A) executeQuery()
- B) runQuery()
- C) execute()
- D) executeUpdate()

11. Which JDBC class or interface is used to establish a connection to a database?

- ✓ ◦ A) DriverManager
- B) Connection
- C) ResultSet
- D) Statement

12. What does the executeUpdate() method return in JDBC?

- A) A ResultSet object
- ✓ ◦ B) A boolean value
- C) An integer representing the number of rows affected
- D) None of the above

13. In the MVC pattern, what is the role of the Controller?

- A) To display data to the user
- B) To interact with the database
- ✓ ◦ C) To handle user input and update the model
- D) To serve static content

14. Which component in the MVC architecture is responsible for data representation and business logic?

- ✗ ◦ A) Model
- B) View
- C) Controller
- D) Servlet

15. In a Java web application, which object typically represents the View in the MVC pattern?

- A) Servlet
- ✓ ◦ B) JSP (Java Server Pages)
- C) Java Beans
- D) Filters

16. Which of the following is a standard protocol for creating web services in Java?

- A) HTTP

- B) REST
- C) SOAP
- D) XML

✓ 17. What does REST stand for in the context of web services?

- A) Representational State Transfer
- ✓ B) Remote State Transfer
- C) Representational Stateless Transfer
- D) Resource State Transfer

18. Which HTTP method is commonly used to create a resource in RESTful web services?

- ✓ A) GET
- B) POST
- C) PUT
- D) DELETE

19. In Spring Boot, which annotation is used to define a Spring MVC controller?

- A) @Controller
- ✓ B) @Service
- ✓ C) @Repository
- D) @RestController

20. What is the primary role of the @SpringBootApplication annotation in a Spring Boot application?

- ✓ A) It initializes the Spring application context.
- B) It enables auto-configuration and component scanning.
- C) It defines the main method for the application.
- D) All of the above

**Quiz question: Advanced with Spring Boot**

**Section A: Java Features**

1. Which feature of Java ensures that a Java application can run on any machine that has a Java Virtual Machine (JVM)?
  - ☐ A) Portability
  - ☐ B) Scalability
  - ☒ C) Multithreading
  - ☐ D) Security
2. What is the purpose of the final keyword in Java?
  - ☐ A) To define a method that cannot be overridden
  - ☐ B) To define a variable that cannot be changed
  - ☒ C) To define a class that cannot be subclassed
  - ☐ D) All of the above
3. Which feature of Java allows the creation of a thread-safe application without using explicit synchronization?
  - ☒ A) Functional interfaces
  - ☐ B) Lambda expressions
  - ☐ C) Concurrency utilities
  - ☐ D) Streams API
4. What is the main advantage of using Java Streams API introduced in Java 8?
  - ☐ A) Simplifies processing of collections
  - ☒ B) Enhances the performance of Java applications
  - ☐ C) Facilitates I/O operations
  - ☐ D) Improves exception handling
5. Which of the following is a core concept of advanced Java programming?
  - ☐ A) Object-oriented programming
  - ☒ B) Multithreading
  - ☐ C) Garbage collection
  - ☐ D) All of the above
6. In Java, which component is responsible for managing the lifecycle of a servlet?
  - ☐ A) Web server
  - ☒ B) Servlet container
  - ☐ C) HTTP server
  - ☐ D) Java Runtime Environment
7. Which advanced Java feature allows a class to call methods that are implemented in another language, such as C or C++?

- A) JNI (Java Native Interface)
- B) RMI (Remote Method Invocation)
- C) JNDI (Java Naming and Directory Interface)
- D) JDBC (Java Database Connectivity)

8. What does JDBC stand for in Java?

- A) Java Development Connectivity
- ✓ ◦ B) Java Database Connection
- C) Java Database Connectivity
- D) Java Data Configuration

9. Which JDBC driver type is known as the pure Java driver?

- A) Type 1
- ✓ ◦ B) Type 2
- C) Type 3
- D) Type 4

10. Which method is used to execute a SQL query using JDBC?

- ✓ ◦ A) executeQuery()
- B) runQuery()
- C) execute()
- D) executeUpdate()

11. Which JDBC class or interface is used to establish a connection to a database?

- ✓ ◦ A) DriverManager
- B) Connection
- C) ResultSet
- D) Statement

12. What does the executeUpdate() method return in JDBC?

- A) A ResultSet object
- B) A boolean value
- ✓ ◦ C) An integer representing the number of rows affected
- D) None of the above

13. In the MVC pattern, what is the role of the Controller?

#### Section A: Java Features

- ✓ 1. Which feature of Java ensures that a Java application can run on any machine that has a Java Virtual Machine (JVM)?
  - A) Portability
  - B) Scalability
  - C) Multithreading
  - ✓ D) Security
- ✓ 2. What is the purpose of the `final` keyword in Java?
  - A) To define a method that cannot be overridden
  - B) To define a variable that cannot be changed
  - C) To define a class that cannot be subclassed
  - ✓ D) All of the above
- ✓ 3. Which feature of Java allows the creation of a thread-safe application without using explicit synchronization?
  - A) Functional interfaces
  - B) Lambda expressions
  - C) Concurrency utilities
  - ✓ D) Streams API
- ✓ 4. What is the main advantage of using Java Streams API introduced in Java 8?
  - A) Simplifies processing of collections
  - B) Enhances the performance of Java applications
  - C) Facilitates I/O operations
  - ✓ D) Improves exception handling
- ✓ 5. Which of the following is a core concept of advanced Java programming?
  - A) Object-oriented programming
  - B) Multithreading
  - C) Garbage collection
  - ✓ D) All of the above
- ✓ 6. In Java, which component is responsible for managing the lifecycle of a servlet?
  - A) Web server
  - B) Servlet container
  - C) HTTP server
  - ✓ D) Java Runtime Environment
- ✗ 7. Which advanced Java feature allows a class to call methods that are implemented in another language, such as C or C++?

- A) JNI (Java Native Interface)
- B) RMI (Remote Method Invocation)
- C) JNDI (Java Naming and Directory Interface)
- D) JDBC (Java Database Connectivity)

✓ 8. What does JDBC stand for in Java?

- A) Java Development Connectivity
- B) Java Database Connection
- ✓ ◦ C) Java Database Connectivity
- D) Java Data Configuration

✓ 9. Which JDBC driver type is known as the pure Java driver?

- A) Type 1
- B) Type 2
- C) Type 3
- D) Type 4

✓ 10. Which method is used to execute a SQL query using JDBC?

- A) executeQuery()
- B) runQuery()
- C) execute()
- ✓ • D) executeUpdate()

✓ 11. Which JDBC class or interface is used to establish a connection to a database?

- A) DriverManager
- B) Connection
- C) ResultSet
- ✓ • D) Statement

✓ 12. What does the executeUpdate() method return in JDBC?

- ✓ • A) A ResultSet object
- B) A boolean value
- C) An integer representing the number of rows affected
- D) None of the above

✓ 13. In the MVC pattern, what is the role of the Controller?

- ✓ • A) To display data to the user
- B) To interact with the database
- C) To handle user input and update the model
- D) To serve static content

✓ 14. Which component in the MVC architecture is responsible for data representation and business logic?

- ✓ • A) Model
- B) View
- ✓ • C) Controller
- D) Servlet

✓ 15. In a Java web application, which object typically represents the View in the MVC pattern?

- ✓ • A) Servlet
- B) JSP (Java Server Pages)
- C) Java Beans
- D) Filters

✓ 16. Which of the following is a standard protocol for creating web services in Java?

- A) HTTP

- B) REST
- C) SOAP
- D) XML

17. What does REST stand for in the context of web services?

- A) Representational State Transfer
- B) Remote State Transfer
- C) Representational Stateless Transfer
- ✓ D) Resource State Transfer

18. Which HTTP method is commonly used to create a resource in RESTful web services?

- A) GET
- B) POST
- C) PUT
- ✓ D) DELETE

19. In Spring Boot, which annotation is used to define a Spring MVC controller?

- A) @Controller
- B) @Service
- C) @Repository
- ✓ D) @RestController

20. What is the primary role of the @SpringBootApplication annotation in a Spring Boot application?

- A) It initializes the Spring application context.
- B) It enables auto-configuration and component scanning.
- C) It defines the main method for the application.
- ✓ D) All of the above

**NOTICE FOR WORKSHOP**

**Subject: 5-Days Workshop on Introduction to Robotics**

Dear Students and Faculty,

We are pleased to announce a 5-day workshop on **Introduction to Robotics** to be held from **07 Aug,2023 to 11 Aug,2023**. This workshop aims to provide a comprehensive overview of the fundamentals of robotics, including practical applications and hands-on experience.

**Workshop Details:**

- Dates: 07 Aug,2023 to 11 Aug,2023
- Time: 09 am to 05 pm
- Venue: AIML department classroom

Attendance is mandatory for all students.

We look forward to your active participation in this exciting and educational event.

Best Regards,

Workshop Coordinator

Content for 5 days workshop on "Introduction to Robotics"

(07-08-2023 to 11-08-2023, 09 AM to 05 PM )

Day	Time	Session Title	Content
Day 1	09:00 - 09:30	Welcome and Overview	Introduction to workshop goals, structure, and safety
	09:30 - 10:30	History and Evolution of Robotics	Key milestones, notable robots, and their impact
	10:30 - 10:45	Break	
	10:45 - 12:15	Basic Concepts in Robotics	Actuators, sensors, controllers, and types of robots
	12:15 - 13:15	Lunch	
	13:15 - 15:00	Hands-On Activity: Build a Basic Robot	Assemble a robot kit, basic wiring, and functionality testing
	15:00 - 15:15	Break	
	15:15 - 16:45	Introduction to Robot Programming	Basic programming concepts, languages (Python, C++)
	16:45 - 17:00	Wrap-Up and Q&A	Summary of the day's learning, Q&A session
Day	Time	Session Title	Content
Day 2	09:00 - 10:30	Robot Kinematics	Forward and inverse kinematics concepts
	10:30 - 10:45	Break	
	10:45 - 12:15	Robot Dynamics	Forces, torques, and motion equations
	12:15 - 13:15	Lunch	
	13:15 - 14:45	Hands-On Activity: Simulating Kinematics	Use simulation software to model and visualize movements
	14:45 - 15:00	Break	

Navsahyadri Education Society's Group of Institutions

Faculty of Engineering

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune - 412213

**Artificial Intelligence and Machine Learning - SE**  
**A.Y 2023-24**

	15:00 - 16:30	Control Systems Basics	PID control, feedback mechanisms
	16:30 - 17:00	Hands-On Activity: Implementing Simple Controls	Program and test basic control algorithms
<b>Day</b>	<b>Time</b>	<b>Session Title</b>	<b>Content</b>
Day 3	09:00 - 10:30	Overview of Sensors	Types of sensors and their applications
	10:30 - 10:45	Break	
	10:45 - 12:15	Overview of Actuators	Types of actuators and their control
	12:15 - 13:15	Lunch	
	13:15 - 14:45	Hands-On Activity: Sensor Integration	Connect and calibrate sensors on a robot
	14:45 - 15:00	Break	
	15:00 - 16:30	Actuator Control	Programming and controlling actuators
	16:30 - 17:00	Hands-On Activity: Build a Sensor-Based System	Design and test a robot incorporating sensors and actuators
<b>Day</b>	<b>Time</b>	<b>Session Title</b>	<b>Content</b>
Day 4	09:00 - 10:30	Introduction to Robot Programming	Overview of programming languages and tools
	10:30 - 10:45	Break	
	10:45 - 12:15	Basic Programming Concepts	Writing and debugging simple programs
	12:15 - 13:15	Lunch	
	13:15 - 14:45	Hands-On Activity: Writing Basic Programs	Develop and test basic programs for robots
	14:45 - 15:00	Break	

Navsahyadri Education Society's Group of Institutions  
Faculty of Engineering

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune - 412213

Artificial Intelligence and Machine Learning - SE  
A.Y 2023-24

	15:00 - 16:30	Advanced Programming: ROS Introduction	Introduction to Robot Operating System (ROS)
	16:30 - 17:00	Hands-On Activity: Implementing ROS	Set up and program basic ROS nodes
Day	Time	Session Title	Content
Day 5	09:00 - 10:30	Introduction to Autonomous Robotics	Concepts like SLAM, path planning, and machine learning
	10:30 - 10:45	Break	
	10:45 - 12:15	Path Planning and Navigation	Algorithms for pathfinding and obstacle avoidance
	12:15 - 13:15	Lunch	
	13:15 - 14:45	Hands-On Activity: Implementing Navigation Algorithms	Develop a robot path planning system
	14:45 - 15:00	Break	
	15:00 - 16:30	Student Projects: Design and Implementation	Plan and build a mini-project incorporating learned concepts
	16:30 - 17:00	Project Presentations and Feedback	Students present projects and receive feedback

QUIZ ON "Introduction to Robotics"

Name of the student : Suradha Sinha

Date : 11/08/2023

Roll no : 51

Total marks : 15

Time : 30 min

Q1. What is the primary function of an actuator in a robot?

- A) To sense environmental changes
- B) To process data
- ☒ C) To move parts of the robot
- D) To power the robot

Q2. Which component is used to detect obstacles in a robot?

- A) Motor
- ☒ B) Sensor
- C) Battery
- D) Controller

Q3. What does PID stand for in control systems?

- ☒ A) Proportional-Integral-Derivative
- B) Proportional-Intelligent-Digital
- C) Process-Integration-Direction
- D) Pulse-Inverse-Direction

Q4. Which programming language is commonly used for robotics?

- A) Java
- ☒ B) Python
- C) HTML
- D) CSS

Q5. What is the main purpose of a robot's control system?

- A) To charge the robot
- B) To provide power to the actuators
- ☒ C) To process sensor inputs and control the robot's actions
- D) To store data

A.Y 2023-24

**Q6. What does ROS stand for in robotics?**

- ☒ A) Robot Operating System
- ☐ B) Robotic Object Sensor
- ☐ C) Robotic Operating System
- ☐ D) Robot Optimization Software

**Q7. Which type of actuator is typically used for precise movement?**

- ☐ A) Hydraulic actuator
- ☒ B) Pneumatic actuator
- ☐ C) Servo motor
- ☐ D) DC motor

**Q8. In robotics, what does SLAM stand for?**

- ☒ A) Simultaneous Localization and Mapping
- ☐ B) Simulated Local Area Mapping
- ☐ C) Single Location and Motion
- ☐ D) Synchronized Lattice and Mapping

**Q9. What is the role of a microcontroller in a robot?**

- ☐ A) To control the robot's movement
- ☐ B) To power the sensors
- ☒ C) To manage the robot's software and hardware functions
- ☐ D) To provide energy to the actuators

**Q10. What type of control system uses feedback to adjust its operations?**

- ☐ A) Open-loop control
- ☒ B) Closed-loop control
- ☐ C) Manual control
- ☐ D) Static control

A.Y 2023-24

Q11. Which of the following is NOT a type of sensor commonly used in robotics?

- A) Proximity sensor
- B) Light sensor
- C) Pressure sensor
- ☒ D) Gyroscope

Q12. What does an encoder do in a robotic system?

- A) Measures the speed and position of a motor
- B) Detects obstacles
- C) Provides power to the robot
- ☒ D) Controls the robot's movements

Q13. What kind of movement does a differential drive robot use?

- A) Rotational movement
- B) Linear movement
- ☒ C) Combination of rotational and linear movement
- D) Oscillatory movement

Q14. What is an essential feature of autonomous robots?

- A) They are controlled manually by operators
- B) They rely on external power sources only
- ☒ C) They can perform tasks without human intervention
- D) They have limited sensor capabilities

Q15. What does the term "feedback loop" refer to in robotics?

- ☒ A) A system that adjusts its output based on sensor data
- B) A method for increasing the robot's speed
- C) A process for storing data
- D) A technique for programming robots

**ANSWER KEY OF QUIZ ON "Introduction to Robotics"**

**Q1. What is the primary function of an actuator in a robot?**

ANSWER :- C) To move parts of the robot

**Q2. Which component is used to detect obstacles in a robot?**

ANSWER :- B) Sensor

**Q3. What does PID stand for in control systems?**

ANSWER :- A) Proportional-Integral-Derivative

**Q4. Which programming language is commonly used for robotics?**

ANSWER :- B) Python

**Q5. What is the main purpose of a robot's control system?**

ANSWER :- C) To process sensor inputs and control the robot's actions

**Q6. What does ROS stand for in robotics?**

ANSWER :- A) Robot Operating System

**Q7. Which type of actuator is typically used for precise movement?**

ANSWER :- C) Servo motor

**Q8. In robotics, what does SLAM stand for?**

ANSWER :- A) Simultaneous Localization and Mapping

**Q9. What is the role of a microcontroller in a robot?**

ANSWER :- C) To manage the robot's software and hardware functions

**Q10. What type of control system uses feedback to adjust its operations?**

ANSWER :- B) Closed-loop control

**Q11. Which of the following is NOT a type of sensor commonly used in robotics?**

ANSWER :- D) Gyroscope

### ACTIVITY REPORT OF WORKSHOP

**Subject:** Activity report of the workshop "Introduction to Robotics"

We are pleased to announce the successful completion of the "Introduction to Robotics" workshop, held from August 7, 2023 to August 11, 2023. The workshop ran daily from 9:00 AM to 5:00 PM.

#### Workshop Details:

- **Dates:** August 7, 2023 to August 11, 2023
- **Time:** 9:00 AM - 5:00 PM
- **Attendance:** 100% attendance by all enrolled students

#### Workshop Highlights:

- **Day 1:** Introduction to robotics, including basic concepts, components, and a hands-on activity involving the assembly of a basic robot.
- **Day 2:** Covered robot kinematics and dynamics, with practical sessions on simulating robot movements and implementing basic control systems.
- **Day 3:** Focused on sensors and actuators, integrating these components into robotic systems, and practical exercises for sensor-based projects.
- **Day 4:** Introduction to robot programming, including basic programming skills and advanced topics with ROS (Robot Operating System).
- **Day 5:** Exploration of autonomous robotics, path planning, and student projects showcasing the practical skills and knowledge gained.

While installing moodle not able to complete database settings

What to fill in Database port

07-09M 40-50S drbhanu@iitb.ac.in

Answer last updated on: March 12, 2024, 5:13 p.m.

chmod 777 vs 755 in moodle

I am not a programmer but I have read somewhere that it is more safe to set the permission to 755 rather than 777. Will "sudo chmod 755 moodle/" affect the functionality of moodle?

Questions posted on ST Forums:

From where I can get installable file of Xamp 5.6.30 and Moodle 3.3.

Dear Sir/Madam, I am preparing for main workshop for Moodle Learning Management dated on 15-March-2019, for installation purpose from where I can get installable file of Xamp 5.6.30 and Moodle 3.3. Because I am trying downloading from respective server, so they are providing upper version of Xamp and Moodle. But for main workshop, we have to use Xamp 5.6.30 and Moodle 3.3. Please reply.

**Installing Moodle on Windows**

I am trying to install Moodle on Windows but after extracting files, I am getting Stop Moodle Application in stead of Start Moodle Application. What can be the reason behind it?

04:05M 30:40S **allung**

Answer last updated on: April 23, 2020, 2:44 p.m.

**I getting this message while installing Moodle**

Sorry, but ... nothing to do:XAMPP now starts as a console application. Instead of pressing Control-C in this console window, please use xampp\_stop.exe to stop XAMPP, because it lets XAMPP end any current transactions and cleanup gracefully. 2020-06-10 22:12:04 4668

### Objectives

The primary objectives of the MOODLE Spoken Tutorial Project course were to:

1. **Introduce Participants to MOODLE:**
  - Understanding MOODLE as a Learning Management System (LMS).
  - Learning basic and advanced features of MOODLE.
2. **Hands-On Experience:**
  - Practical application of MOODLE functionalities.
  - Developing and managing online courses effectively.
3. **Enhance Technical Skills:**
  - Equip participants with the skills to troubleshoot and optimize MOODLE environments.

### Report on Learning and Communication Skill Course

**Conducted by:** Seventh Sense

**Course Duration:** 17/01/2024 to 26/01/2024

**Total Hours:** 50 hours

#### 1. Course Overview

The Learning and Communication Skill course, conducted by Seventh Sense, aimed to enhance participants' proficiency in effective communication and advanced learning techniques. Spanning ten days, the course provided a comprehensive training regimen, structured to cover both theoretical and practical aspects of communication and learning strategies.

#### 2. Objectives

- **Improve Communication Skills:** Equip participants with tools to enhance verbal, non-verbal, and written communication.
- **Boost Learning Efficiency:** Introduce techniques to maximize learning outcomes and retention.
- **Foster Collaboration:** Develop skills for effective team collaboration and interpersonal interactions.

**NAAC 'A' Grade Institute**

Offered by SEVENTH SENSE

### Notice of Training Session

We are pleased to announce a training session for MBA first year students on **HR ANALYTICS**, designed to enhance skills, improve understanding in HR management, etc. This session will be led by **SKILL EDGE** from **17/01/2024 to 26/01/2024** at **10 AM to 4 PM.**, attendance is mandatory.

**Place: Shri Chatrapati Shivaji Maharaj Seminar Hall**

Director.  
Faculty of Management (MBA & MCA)  
Navsahyadri Education Society's  
Group of Institutions  
Naigoan, Pune 412 213

## **CURRICULUM**

**COURSE NAME: HR Analytics**

**Offered By: SKILL EDGE**

**DATE: 17/01/2024 to 26/01/2024**

**TIME: 10 AM to 4 PM.**

### **HR Analytics 10-Day Program Syllabus**

#### **Day 1: Introduction to HR Analytics**

- **Morning:**
  - Overview of HR Analytics: Definition and Importance
  - Evolution of HR Analytics in the Industry
  - Key Concepts and Terminologies
- **Afternoon:**
  - Case Studies: Successful Implementation of HR Analytics
  - Group Discussion: Current HR Challenges and Analytics Solutions
  - Research and summarize a recent HR Analytics trend

#### **Day 2: Data Management and HR Metrics**

- **Morning:**
  - Types of HR Data: Structured vs. Unstructured
  - Key HR Metrics: Turnover, Absenteeism, Recruitment, and Performance Metrics
  - Data Collection Methods and Tools
- **Afternoon:**
  - Hands-on Workshop: Collecting and Organizing HR Data
  - Create a dataset based on provided HR metrics

#### **Day 3: Data Analysis Techniques**

- **Morning:**
  - Introduction to Data Analysis: Descriptive vs. Inferential Statistics
  - Data Cleaning and Preparation Techniques
  - Tools for Data Analysis: Excel, Python, R
- **Afternoon:**

- Hands-on Workshop: Basic Data Analysis Using Excel/Python/R
- Analyze a sample HR dataset and report findings

#### **Day 4: Predictive Analytics in HR**

- **Morning:**
  - Understanding Predictive Analytics and Its Applications in HR
  - Key Predictive Models: Regression Analysis, Classification, Clustering
- **Afternoon:**
  - Hands-on Workshop: Building Predictive Models Using HR Data
  - Create a predictive model for employee turnover

#### **Day 5: Visualization and Reporting**

- **Morning:**
  - Importance of Data Visualization in HR Analytics
  - Tools for Visualization: Tableau, Power BI, Matplotlib
- **Afternoon:**
  - Hands-on Workshop: Creating Visual Reports and Dashboards
  - Develop a dashboard for HR metrics

#### **Day 6: Employee Performance and Talent Management**

- **Morning:**
  - Analyzing Employee Performance Data
  - Identifying Key Performance Indicators (KPIs) for Talent Management
- **Afternoon:**
  - Case Study: Using Analytics for Performance Reviews and Talent Development
  - Create a performance analysis report and recommendations

#### **Day 7: Recruitment Analytics**

- **Morning:**
  - Measuring Recruitment Effectiveness: Time-to-Hire, Cost-per-Hire
  - Analyzing Recruitment Data to Improve Hiring Processes
- **Afternoon:**
  - Hands-on Workshop: Recruitment Data Analysis
  - Analyze recruitment data and suggest process improvements

## **Day 8: Employee Engagement and Retention Analytics**

- **Morning:**
  - Understanding Employee Engagement Metrics
  - Analyzing Retention Data and Identifying Key Drivers
- **Afternoon:**
  - Case Study: Improving Employee Engagement and Retention through Analytics
  - Develop a strategy to enhance employee engagement based on data analysis

## **Day 9: Ethical Considerations and Data Privacy**

- **Morning:**
  - Ethical Issues in HR Analytics
  - Data Privacy Laws and Regulations (e.g., GDPR, CCPA)
- **Afternoon:**
  - Group Discussion: Balancing Data Use with Privacy Concerns

## **Day 10: Capstone Project and Review**

- **Morning:**
  - Presentation of Capstone Projects: Analyzing Real-World HR Problems
  - Peer Review and Feedback
- **Afternoon:**
  - Course Review: Key Takeaways and Future Trends in HR Analytics
  - Certification and Closing Remarks

## Instructions:

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.

Pujar

### 1. What is the primary purpose of HR Analytics?

- ☒ A) To track employee attendance
- ☐ B) To manage payroll processing
- ☐ C) To make data-driven decisions for improving HR practices
- ☐ D) To create job descriptions

### 2. Which of the following is an example of structured HR data?

- ☒ A) Employee feedback forms
- ☐ B) Email correspondence
- ☒ C) Employee performance ratings
- ☐ D) Video interviews

### 3. Which statistical technique is used to determine the relationship between a dependent variable and one or more independent variables?

- ☒ A) Clustering
- ☐ B) Regression Analysis
- ☐ C) Classification
- ☐ D) Descriptive Statistics

4. What does KPI stand for in the context of HR Analytics?

- ✓ A) Key Performance Indicator
- B) Key Process Index
- C) Knowledge Performance Indicator
- D) Key Productivity Index

5. Which tool is commonly used for creating visual dashboards in HR Analytics?

- A) Excel
- B) Word
- ✓ C) Tableau
- D) PowerPoint

6. What is 'Cost-per-Hire' a measure of?

- A) Recruitment Efficiency
- B) Employee Satisfaction
- ✓ C) Training Effectiveness
- D) Performance Appraisal

7. In predictive analytics, which model would you use to categorize employees into different performance groups?

- A) Regression Model
- ✓ B) Classification Model
- C) Clustering Model
- D) Time Series Model

8. Which of the following is an ethical consideration in HR Analytics?

- A) Data Visualization
- B) Predictive Modeling
- ✓ C) Data Privacy
- D) Recruitment Metrics

9. What type of data is 'employee satisfaction survey responses' considered to be?

- ✓ A) Structured Data
- B) Unstructured Data
- C) Quantitative Data
- ✓ D) Qualitative Data

10. What is the main objective of HR Analytics?

- A) To automate payroll
- ✓ • B) To enhance decision-making with data-driven insights
- C) To conduct employee surveys
- D) To manage employee benefits

11. Which type of HR data includes employee records and performance reviews?

- A) Unstructured Data
- B) Qualitative Data
- ✓ • C) Structured Data
- D) Raw Data

12. Which statistical technique helps to predict future outcomes based on historical data?

- A) Descriptive Statistics
- ✓ • B) Predictive Analytics
- C) Inferential Statistics
- D) Prescriptive Analytics

13. What does the term 'Absenteeism Rate' refer to?

- A) The number of new hires
- ✓ • B) The frequency of employee absences
- C) The cost associated with employee turnover
- D) The effectiveness of employee training

14. Which software is often used for creating complex data visualizations and dashboards?

- A) Word
- B) Excel
- C) Tableau
- D) PowerPoint

15. In HR Analytics, what does 'Time-to-Hire' measure?

- A) The cost to recruit an employee
- ✓ • B) The time taken to fill a job vacancy
- C) The duration of the hiring process

- D) The time an employee spends in the interview process

16. Which model is used to categorize employees into different groups based on their characteristics?

- A) Regression Model
- B) Classification Model
- ✓ • C) Clustering Model
- D) Forecasting Model

17. What does KPI stand for in HR Analytics?

- ✓ • A) Key Performance Indicator
- B) Knowledge Performance Index
- C) Key Process Indicator
- D) Key Productivity Index

18. Which type of analysis is used to describe and summarize data?

- A) Predictive Analysis
- ✓ • B) Descriptive Analysis
- C) Inferential Analysis
- D) Diagnostic Analysis

19. Which HR metric measures the average time taken to fill a job position?

- ✓ • A) Cost-per-Hire
- B) Time-to-Hire
- C) Absenteeism Rate
- D) Employee Turnover Rate

20. Which type of data includes employee feedback, emails, and open-ended survey responses?

- A) Structured Data
- ✓ • B) Unstructured Data
- C) Quantitative Data
- D) Nominal Data

### Report: 10-Day Course on HR Analytics

**Course Dates:** January 17, 2024 – January 26, 2024

**Duration:** 50 Hours (10:00 AM – 04:00 PM)

**Conducted By:** Skill Edge

**Overview:** The 10-day HR Analytics course, organized by Skill Edge, was held from January 17, 2024, to January 26, 2024. The program, spanning 50 hours, was designed to provide participants with a deep understanding of HR analytics, focusing on the application of data-driven insights to enhance human resource management practices.

### Objectives:

- To introduce participants to the fundamentals and tools of HR analytics.
- To develop skills in data analysis and interpretation for HR decision-making.
- To enhance participants' ability to apply analytics for improving HR functions and strategies.

- **Morning:**
  - The Importance of Strategic Planning
  - Setting SMART Goals (Specific, Measurable, Achievable, Relevant, Time-bound)
  - Aligning Goals with Organizational Vision and Mission
- **Afternoon:**
  - Hands-on Workshop: Developing a Strategic Plan for a Case Company
  - Create a strategic plan with SMART goals for a real or hypothetical project

### **Day 3: Effective Communication in Management**

- **Morning:**
  - Principles of Effective Communication
  - Active Listening and Feedback Techniques
  - Managing Communication Across Different Levels and Departments
- **Afternoon:**
  - Role-Playing Exercise: Handling Difficult Conversations

- Group Activity: Communication Barriers and Solutions
- Develop a communication strategy for a team project

#### **Day 4: Decision-Making and Problem-Solving**

- **Morning:**

- Decision-Making Models and Techniques
- Problem-Solving Strategies
- Risk Assessment and Mitigation

- **Afternoon:**

- Case Study: Decision-Making in Crisis Situations
- Hands-on Workshop: Solving Complex Business Problems
- Analyze a past decision and propose an alternative solution

#### **Day 5: Team Building and Leadership**

- **Morning:**

- Building and Leading High-Performance Teams
- Understanding Team Dynamics and Roles
- Motivating and Inspiring Team Members

- **Afternoon:**

- Team Building Exercises and Activities
- Leadership Styles and Their Impact on Team Performance
- Develop a team-building plan and leadership approach for a new team

#### **Day 6: Performance Management and Appraisal**

- **Morning:**

- Setting Performance Standards and Metrics
- Conducting Effective Performance Appraisals
- Providing Constructive Feedback and Managing Performance Issues

- **Afternoon:**

- Role-Playing Exercise: Conducting a Performance Review
- Hands-on Workshop: Designing a Performance Management System
- Create a performance appraisal form and feedback plan

#### **Day 7: Change Management and Adaptability**

- **Morning:**
  - Understanding Change Management Principles
  - Strategies for Managing Organizational Change
  - Enhancing Adaptability in Teams and Individuals
- **Afternoon:**
  - Case Study: Successful and Unsuccessful Change Initiatives
  - Group Discussion: Navigating Change in the Workplace
  - Develop a change management plan for a given scenario

## **Day 8: Time Management and Productivity**

- **Morning:**
  - Time Management Techniques and Tools
  - Prioritization and Delegation
  - Enhancing Personal and Team Productivity
- **Afternoon:**
  - Hands-on Workshop: Creating a Time Management Plan
  - Group Activity: Time Management Challenges and Solutions
  - Create a personal time management plan and productivity improvement strategy

## **Day 9: Conflict Resolution and Negotiation**

- **Morning:**
  - Conflict Resolution Techniques
  - Negotiation Strategies and Best Practices
  - Mediating Disputes and Finding Win-Win Solutions
- **Afternoon:**
  - Role-Playing Exercise: Negotiation and Conflict Resolution Scenarios
  - Case Study: Analyzing Successful Conflict Resolution in Organizations
  - Develop a conflict resolution strategy for a workplace conflict

## **Day 10: Review and Application**

- **Morning:**
  - Review of Key Concepts and Practices Covered

- Capstone Project: Applying Best Practices in a Comprehensive Management Plan
- Group Presentations: Capstone Project Presentations
- **Afternoon:**
  - Feedback and Reflection on Learning Outcomes
  - Certification and Closing Remarks
  - Prepare a personal action plan for implementing best practices in your management role

**20. What is a key factor in building a high-performance team?**

- A) Frequent conflicts
- B) Strong communication and trust
- C) Lack of clear objectives
- D) Minimal feedback

COURSE NAME: BEST PRACTICES IN MANAGEMENT 26/01/2024

Time: 30 Minutes

Student Name:

Sakhubai Nitthal Kharad

Marks

12

20

## Instructions:

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.

1. What is the primary role of a manager in an organization?

- ☒ A) To perform all tasks independently
- ☒ B) To oversee and guide the work of others to achieve organizational goals
- ☐ C) To handle only administrative duties
- ☐ D) To develop new products

2. Which of the following is NOT a characteristic of SMART goals?

- ☒ A) Specific
- ☐ B) Measurable
- ☐ C) Achievable
- ☒ D) Flexible

3. What does the acronym KPI stand for in management?

- ☒ A) Key Performance Indicator
- ☐ B) Key Process Improvement
- ☒ C) Knowledge Performance Index
- ☐ D) Key Product Indicator

4. Which communication technique involves ensuring that the listener accurately understands the message?

- A) Active Listening
- B) Passive Hearing
- C) Verbal Reporting
- D) Assertive Speaking

5. Which decision-making model is used to evaluate alternative courses of action before making a decision?

- A) Intuitive Model
- B) Rational Model
- C) Incremental Model
- D) Garbage Can Model

6. What is the primary goal of performance management?

- A) To manage employee salaries
- B) To enhance and sustain employee performance
- C) To create job descriptions
- D) To organize company events

7. Which leadership style focuses on providing support and encouragement to employees?

- A) Autocratic
- B) Transactional
- C) Transformational
- D) Laissez-faire

8. In the context of time management, what does prioritization involve?

- A) Doing tasks as they come up
- B) Completing the easiest tasks first
- C) Identifying and focusing on the most important tasks
- D) Delegating all tasks to others

9. What is the purpose of conducting a 360-Degree Feedback?

- A) To assess employee performance from multiple perspectives
- B) To conduct a market analysis
- C) To track attendance
- D) To evaluate financial performance

10. What is the primary objective of strategic planning in management?

- A) To increase employee salaries
- B) To outline the long-term goals and direction of the organization
- C) To manage daily operations
- D) To conduct performance appraisals

11. Which management function involves setting clear and measurable objectives for a team?

- A) Controlling
- B) Organizing
- C) Planning
- D) Leading

12. Which of the following is an example of a SMART goal?

- A) Increase sales
- B) Improve customer satisfaction
- C) Increase sales by 15% over the next quarter
- D) Enhance product quality

13. Which type of communication focuses on ensuring that the sender's message is clearly understood by the receiver?

- A) Passive Communication
- B) Effective Communication
- C) Non-verbal Communication
- D) Defensive Communication

14. Which decision-making model emphasizes evaluating all possible options before making a choice?

- A) Bounded Rationality Model
- B) Rational Decision-Making Model
- C) Intuitive Model
- D) Incremental Model

15. What is a common technique used for effective time management?

- A) Time Blocking
- B) Time Ignoring

- C) Time Fragmentation
- D) Time Avoidance

**16. Which management practice involves providing feedback that helps employees improve their performance?**

- A) Performance Appraisal
- B) Performance Critique
- C) Performance Review
- D) Performance Feedback

**17. Which leadership style is characterized by a leader who provides direction and structure but allows input from team members?**

- A) Autocratic
- B) Transformational
- C) Participative
- D) Laissez-faire

**18. Which component is essential for managing organizational change effectively?**

- A) Ignoring resistance
- B) Comprehensive communication strategy
- C) Quick implementation without feedback
- D) Avoiding stakeholder involvement

**19. Which leadership style involves providing support and encouragement to employees?**

- A) Autocratic
- B) Transformational
- C) Transactional
- D) Laissez-faire

**20. What is a key factor in building a high-performance team?**

- A) Frequent conflicts
- B) Strong communication and trust
- C) Lack of clear objectives
- D) Minimal feedback

### Report: 10-Day Course on Best Practices in Management

**Course Dates:** January 17, 2024 – January 26, 2024

**Duration:** 50 Hours (10:00 AM – 04:00 PM)

**Conducted By:** Seventh Sense

**Overview:** The 10-day course on Best Practices in Management, led by Seventh Sense, was conducted from January 17, 2024, to January 26, 2024. The program, totalling 50 hours, aimed to equip participants with advanced management techniques and best practices to enhance their leadership and operational effectiveness.

### Objectives:

- To introduce participants to leading management practices and strategies.
- To develop practical skills for effective team leadership and decision-making.
- To improve participants' ability to implement best practices in various management contexts.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**Date: 06-02-2023**

**Notice: Workshop on Ethics**

All first-year engineering students are informed that a workshop on "Ethics" will be held from **13th February 2023 to 17th February 2023**. This workshop aims to educate students on the importance of ethics in both personal and professional life.

**Workshop Details:**

**Dates:** 13th February 2023 to 17th February 2023

**Time:** 9:00 AM to 05:00 PM

**Venue:** Dr. A. P. J Abdul Kalam Hall

Participation in this workshop is highly recommended for all first-year students to enhance their understanding of ethical conduct and its significance in the engineering profession.

  
**Workshop Coordinator**  
**Prof. Z. K. Shaikh**

**Prof. S. S. Raut**

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**  
Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**First Year Engineering Department**

**Value Added Program Topic:** Ethics  
**Organizer:** Business Ethics Foundation, Pune  
**Date:** 13-02-2023 to 17-02-2023

**Academic Year:** 2022-2023  
**Total Program Duration:** 30 Hours

**Detail "Ethics" Five Day Program Content**

---

**Day 1: Introduction to Ethics and Ethical Theories**

- 1.1 *Topic:* What is Ethics?
- 1.2 *Content:* Definition, importance in personal and professional life, differences between ethics, morals, and laws.
- 1.3 *Activity:* Group discussion on real-life ethical dilemmas.
- 2.1 *Topic:* Overview of Ethical Theories
- 2.2 *Content:* Introduction to major ethical theories: Utilitarianism, Deontological Ethics, Virtue Ethics, Rights-based Ethics.
- 2.3 *Activity:* Case studies illustrating each ethical theory.

---

**Day 2: Ethics in Technology and Innovation**

- 1.1 *Topic:* Ethics and Emerging Technologies
- 1.2 *Content:* Ethical concerns around AI, data privacy, robotics, and autonomous systems.
- 1.3 *Activity:* Case study on data privacy issues in technology companies.
- 2.1 *Topic:* Intellectual Property and Plagiarism
- 2.2 *Content:* What is intellectual property? Issues of plagiarism in academics and engineering.
- 2.3 *Activity:* Analysis of real-world IP-related ethical cases.

---

**Day 3: Professional Ethics and Codes of Conduct**

- 1.1 *Topic:* Professional Ethics vs. Personal Ethics
- 1.2 *Content:* Distinction between personal and professional ethics, the role of values in shaping professional behavior.
- 1.3 *Activity:* Case analysis of ethical conflicts between personal beliefs and professional duties.
- 1.4 *Topic:* Codes of Conduct in Engineering Professions
- 1.5 *Content:* Detailed review of professional codes of ethics (IEEE, NSPE, ASME).
- 1.6 *Activity:* Small group work on applying codes of conduct to case studies.

---

**Day 4: Ethical Issues in Global Engineering**

- 1.1 *Topic:* Globalization and Ethical Challenges
- 1.2 *Content:* Ethical challenges in global engineering practices, cultural diversity, and global standards.
- 1.3 *Activity:* Discussion on ethical dilemmas in cross-border engineering projects.
- 1.4 *Topic:* Ethics of Labor and Human Rights
- 1.5 *Content:* Ethical considerations around labor practices, exploitation, and human rights in global

**FACULTY OF ENGINEERING**  
Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

engineering firms.

1.6 Activity: Case study on labor rights in the tech industry.

---

**Day 5: Applying Ethics in Real-world Engineering**

1.1 Topic: Ethics in Software Engineering and Cybersecurity

1.2 Content: Ethical concerns in software development, cybersecurity, hacking, data breaches.

1.3 Activity: Group project on ethical issues in cybersecurity breaches.

2.1 Topic: Final Project and Wrap-Up

2.2 Content: Summary of key learnings, students present a final project on ethical analysis of an engineering dilemma.

2.3 Activity: Group presentations, feedback, and open discussion.

**Date:** 13-02-2023 to 17-02-2023

**Academic Year:** 2022-2023  
**Total Program Duration:** 30 Hours

**Name of the student:** Barkale Sumit Narasing  
**Division:** A **Roll Number:** 1

**QUIZ QUESTIONS**

**Instructions:**

**Quiz Title:** Ethics, Assessment

**Duration:** 30 minutes

**Total Questions:** 15

**Total Marks:** 15

**Type of Questions:** Multiple Choice Questions (MCQs), Q1-Q10

**Negative Marking:** None

**Type of Questions:** True / False, Q11-Q15

**Maximum Marks per Question:** 1 Mark

**Q1. What is the difference between ethics and laws?**

- 01 ✓
- a) Ethics are rules enforced by the government, laws are guidelines for behavior
  - b) Ethics are personal principles, laws are government-enforced rules
  - c) Laws are based on individual opinions, ethics are absolute truths
  - d) Both are the same

**Q2. Which ethical theory focuses on the greatest happiness for the greatest number?**

- 01 ✓
- a) Deontological Ethics
  - b) Virtue Ethics
  - c) Utilitarianism
  - d) Rights-based Ethics

**Q3. Which of the following is NOT a step in the ethical decision-making process?**

- 00 ✓
- a) Recognizing an ethical issue
  - b) Gathering facts
  - c) Ignoring potential consequences
  - d) Evaluating alternative actions

**Q4. What does the IEEE code of ethics primarily address?**

- 01 ✓
- a) Guidelines for earning more profits
  - b) Responsibilities towards the profession, colleagues, and the public
  - c) Environmental sustainability
  - d) How to gain competitive advantage

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**Q5. Why is intellectual property important in engineering?**

- 00
- a) It prevents engineers from sharing ideas
  - b) It ensures that engineers are compensated for their innovations
  - c) It is irrelevant to most engineering disciplines
  - d) It only applies to digital content

**Q6. Which of the following is an example of whistleblowing?**

- 01 ✓
- a) Stealing company secrets and selling them to a competitor
  - b) Reporting unsafe practices in a project to higher authorities
  - c) Ignoring unethical actions of a colleague
  - d) Refusing to work with someone based on personal differences

**Q7. Which ethical principle is most related to the concept of sustainable engineering?**

- 00
- a) Virtue Ethics
  - b) Deontology
  - c) Environmental Ethics
  - d) Rights-based Ethics

**Q8. A conflict of interest occurs when an engineer:**

- 01 ✓
- a) Adheres to professional codes of ethics
  - b) Faces competing interests that could compromise decision-making
  - c) Develops a new product
  - d) Works in a global team

**Q9. Corporate Social Responsibility (CSR) involves:**

- 01 ✓
- a) Increasing a company's profits through any means
  - b) Ensuring a company acts in the interest of society and the environment
  - c) Reducing the ethical standards of a company
  - d) Avoiding legal responsibility in business practices

**Q10. What is the key ethical issue in cybersecurity and software development?**

- 00
- a) Access to open-source technology
  - b) Protecting user data and privacy
  - c) Developing new algorithms
  - d) Selling software to clients globally

**True/False Questions**

**Q11. Whistleblowing is always an unethical practice in engineering.**

- False

**Q12. In professional ethics, the interests of society and the environment are often considered**

- False

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

secondary to the interests of the company.

01 Q13. Utilitarianism suggests that ethical decisions should be made based on duties and rules, not the consequences of actions. - False

01 Q14. Engineers have a responsibility to ensure the safety, health, and welfare of the public according to most professional codes of ethics. - True

01 Q15. Ethical leadership in engineering means making decisions solely based on personal beliefs, ignoring the ethical codes of the profession. - False

**Value Added Program Topic:** Ethics

**Organizer:** Business Ethics Foundation, Pune

**Date:** 13-02-2023 to 17-02-2023

**Academic Year:** 2022-2023

**Total Program Duration:** 30 Hours

**QUIZ ANSWER KEY**

**Q1. What is the difference between ethics and laws?**

*Answer: b) Ethics are personal principles, laws are government-enforced rules*

**Q2. Which ethical theory focuses on the greatest happiness for the greatest number?**

*Answer: c) Utilitarianism*

**Q3. Which of the following is NOT a step in the ethical decision-making process?**

*Answer: c) Ignoring potential consequences*

**Q4. What does the IEEE code of ethics primarily address?**

*Answer: b) Responsibilities towards the profession, colleagues, and the public*

**Q5. Why is intellectual property important in engineering?**

*Answer: b) It ensures that engineers are compensated for their innovations*

**Q6. Which of the following is an example of whistleblowing?**

*Answer: b) Reporting unsafe practices in a project to higher authorities*

**Q7. Which ethical principle is most related to the concept of sustainable engineering?**

*Answer: c) Environmental Ethics*

**Q8. A conflict of interest occurs when an engineer:**

*Answer: b) Faces competing interests that could compromise decision-making*

**Q9. Corporate Social Responsibility (CSR) involves:**

*Answer: b) Ensuring a company acts in the interest of society and the environment*

**Q10. What is the key ethical issue in cybersecurity and software development?**

*Answer: b) Protecting user data and privacy*

**True/False Questions**

**Q11. Whistleblowing is always an unethical practice in engineering.**

*Answer: False*

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**Q12. In professional ethics, the interests of society and the environment are often considered secondary to the interests of the company.**

*Answer: False*

**Q13. Utilitarianism suggests that ethical decisions should be made based on duties and rules, not the consequences of actions.**

*Answer: False*

**Q14. Engineers have a responsibility to ensure the safety, health, and welfare of the public according to most professional codes of ethics.**

*Answer: True*

**Q15. Ethical leadership in engineering means making decisions solely based on personal beliefs, ignoring the ethical codes of the profession.**

*Answer: False*

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**First Year Engineering Department**

**Value Added Program Topic:** Ethics  
**Organizer:** Business Ethics Foundation  
**Date:** 13-02-2023 to 17-02-2023

**Academic Year:** 2022-2023  
**Total Program Duration:** 30 Hours

**Activity Report**

**1. Objective:**

The primary objective of this workshop was to introduce first-year engineering students to the importance of ethics in the field of engineering. The workshop aimed to develop a strong foundation in ethical principles, professional conduct, and responsible decision-making that students can apply in both their academic and professional careers.

**2. Day-wise Activities:**

*Day 1:* Introduction to Ethics and Ethical Theories

*Day 2:* Ethics in Technology and Innovation

*Day 3:* Professional Ethics and Codes of Conduct

*Day 4:* Ethical Issues in Global Engineering

*Day 5:* Applying Ethics in Real-world Engineering

**3. Learning Outcomes:**

- 3.1 Understanding of Ethical Theories
- 3.2 Application of Ethical Decision-Making
- 3.3 Professional Codes of Conduct
- 3.4 Real-world Ethical Issues
- 3.5 Collaborative Learning

**4. Activity Photo**

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**4. Feedback from Participants:**

4.1 Students appreciated the practical focus of the workshop, especially the use of real-world case studies and interactive activities.

4.2 Many participants found the discussion on emerging technologies and ethics in innovation highly relevant to their interests.

**5. Conclusion:**

The 5-day workshop successfully introduced first-year engineering students to key ethical principles and professional conduct in engineering. Through a combination of lectures, interactive discussions and case studies students gained a deeper understanding of the importance of ethics in engineering. The activities and group work enhanced students' ability to apply ethical theories to real-world scenarios, preparing them for future ethical challenges in their professional career.

## NOTICE

### Workshop on "Analysis and Design of RCC Building using STAAD PRO"

Dear Students,

We are excited to inform you about an upcoming workshop titled "**Analysis and Design of RCC Building using STAAD PRO**," which will be held from **17th October 2022 to 21st October 2022**.

This workshop is an excellent opportunity for you to gain hands-on experience with STAAD.Pro, a leading software in structural analysis and design, and to deepen your understanding of Reinforced Concrete (RCC) design principles. Whether you're looking to strengthen your skills for academic projects or preparing for your future career, this workshop is tailored to meet your needs.

### Workshop Details:

- **Title:** Introduction to STAAD.Pro and Basics of RCC Design
- **Dates:** 17th October 2022 - 21st October 2022
- **Time:** 9:00 AM to 4:00 PM
- **Venue:** Dr A.P.J Abdul Kalam Seminar Hall
- **Eligibility:** All Civil Engineering students, especially those in their final year or those interested in structural engineering

We highly encourage all eligible students to take advantage of this opportunity to expand their knowledge and skills in structural design.

We look forward to your active participation in this workshop.

Prof A.R.Kalyane  
Workshop Coordinator  
Department of Civil Engineering

Prof. A. R. Kalyane

## Contents

---

**Date: 17th October 2022 to 21 October 2022**

### **Day 1: Introduction to STAAD.Pro and Structural Analysis Basics**

- **Session 1 (9:00 AM - 11:00 AM):**
  - Welcome and Introduction to the Workshop
  - Overview of STAAD.Pro: History, Applications, and Interface
  - Introduction to Structural Analysis: Basic Concepts
  - Types of Loads: Dead, Live, Wind, Seismic
  - Coffee Break (11:00 AM - 11:15 AM)
- **Session 2 (11:15 AM - 1:00 PM):**
  - Understanding Material Properties: Steel and Concrete
  - Introduction to Beams, Columns, and Slabs
  - Modeling Basics: Creating and Editing Models in STAAD.Pro
  - Lunch Break (1:00 PM - 2:00 PM)
- **Session 3 (2:00 PM - 4:00 PM):**
  - Hands-on Session: Basic Model Creation in STAAD.Pro
  - Defining Material and Section Properties
  - Applying Loads and Load Combinations
  - Q&A and Recap

### **Day 2: Advanced STAAD.Pro Modeling and Analysis Techniques**

- **Session 1 (9:00 AM - 11:00 AM):**
  - Advanced Modeling Techniques: Trusses, Frames, and Grids
  - Introduction to Dynamic Analysis: Time History and Response Spectrum
  - Coffee Break (11:00 AM - 11:15 AM)
- **Session 2 (11:15 AM - 1:00 PM):**
  - Understanding Support Conditions and Boundary Conditions
  - Analyzing the Stability of Structures: Buckling Analysis
  - Lunch Break (1:00 PM - 2:00 PM)
- **Session 3 (2:00 PM - 4:00 PM):**
  - Hands-on Session: Advanced Analysis with STAAD.Pro
  - Analyzing a Complete Structural Model

- Results Interpretation and Validation
- Q&A and Recap

### **Day 3: Introduction to Reinforced Concrete Design (RCC)**

- **Session 1 (9:00 AM - 11:00 AM):**
  - Introduction to Reinforced Concrete Structures
  - Basic Principles of RCC Design: Limit State and Working Stress Methods
  - Coffee Break (11:00 AM - 11:15 AM)
- **Session 2 (11:15 AM - 1:00 PM):**
  - Design of RCC Beams: Concepts and Calculations
  - Design of RCC Columns: Axial, Biaxial, and Uniaxial Loading
  - Lunch Break (1:00 PM - 2:00 PM)
- **Session 3 (2:00 PM - 4:00 PM):**
  - Hands-on Session: RCC Design in STAAD.Pro
  - Introduction to Design Codes (IS 456:2000)
  - Q&A and Recap

### **Day 4: Detailed RCC Design and STAAD.Pro Integration**

- **Session 1 (9:00 AM - 11:00 AM):**
  - Detailed Design of RCC Slabs: One-way and Two-way Slabs
  - Introduction to RCC Footings: Isolated and Combined Footings
  - Coffee Break (11:00 AM - 11:15 AM)
- **Session 2 (11:15 AM - 1:00 PM):**
  - Seismic Design Considerations for RCC Structures
  - Wind Load Considerations in RCC Design
  - Lunch Break (1:00 PM - 2:00 PM)
- **Session 3 (2:00 PM - 4:00 PM):**
  - Hands-on Session: RCC Design Integration in STAAD.Pro
  - Designing a Complete RCC Building in STAAD.Pro
  - Results Interpretation and Optimization
  - Q&A and Recap

### **Day 5: Advanced Topics and Final Project**

- **Session 1 (9:00 AM - 11:00 AM):**
  - Introduction to Foundation Design in STAAD.Pro
  - Overview of Shear Walls and Retaining Walls
  - Coffee Break (11:00 AM - 11:15 AM)
- **Session 2 (11:15 AM - 1:00 PM):**
  - Advanced Topics: P-Delta Analysis, Nonlinear Analysis
  - Introduction to STAAD.Foundation and STAAD.RCDC
  - Lunch Break (1:00 PM - 2:00 PM)

- **Session 3 (2:00 PM - 4:00 PM):**

- Final Project: Complete Structural Design of a Multi-story RCC Building
- Review and Presentation of Project Work
- Q&A, Feedback, and Closing Ceremony

## Quiz: Workshop on "Analysis and Design of RCC Building using STAAD PRO"

Organiser:- CADDNEEL Academy, Pune

Date:-17/10/2022 to 21/10/2022

Name of the student: Konde Saurabh Sambhaji

Year : 2022 (BE)

DURATION:-30 MINUTES

### Instructions:

- This quiz consists of 15 multiple-choice questions based on the content covered in the workshop.
- Choose the most appropriate answer for each question.

1. What does STAAD.Pro primarily focus on?

- a) Environmental Engineering
- ☒ b) Structural Analysis and Design
- c) Geotechnical Analysis
- d) Transportation Planning

2. Which of the following is NOT a type of load discussed in the workshop?

- a) Dead Load
- b) Live Load
- ☒ c) Thermal Load
- d) Wind Load

3. What is the primary function of a column in a structural system?

- a) To support horizontal loads
- b) To resist shear forces
- ☒ c) To transfer vertical loads from beams to the foundation
- d) To provide lateral stability

4. In STAAD.Pro, which feature allows you to define material properties for different structural elements?

- ☒ a) Load Definition
- b) Model Geometry
- c) Material Database
- d) Analysis Settings

**5. Which of the following statements is true about dynamic analysis in STAAD.Pro?**

- a) It is used to analyze static loads only
- ☒ b) It includes methods like Time History and Response Spectrum Analysis
- c) It is only applicable to beams
- d) It ignores the effects of seismic loads

**6. What is the purpose of applying load combinations in structural analysis?**

- a) To simplify the modeling process
- ☒ b) To ensure safety under different loading scenarios
- c) To reduce the number of structural elements
- d) To eliminate the need for material properties

**7. Which RCC design code was introduced in the workshop for reference?**

- a) AISC 360
- b) Eurocode 2
- ☒ c) IS 456:2000
- d) BS 8110

**8. In the context of RCC design, what does "limit state" refer to?**

- ☒ a) The condition where a structure is at maximum load capacity
- b) The condition where the structure is not safe
- c) The condition where the structure fails to meet certain performance criteria
- d) The condition where the structure meets all safety requirements

**9. What is the main difference between a one-way and a two-way slab?**

- a) One-way slabs are supported on four sides, while two-way slabs are supported on two sides
- b) One-way slabs are designed for larger spans, while two-way slabs are used for shorter spans
- ☒ c) One-way slabs bend in one direction, while two-way slabs bend in both directions
- d) One-way slabs are used for residential buildings, while two-way slabs are used for commercial buildings

**10. Which type of footing was discussed for RCC design in the workshop?**

- a) Strip Footing
- b) Raft Footing
- ☒ c) Isolated and Combined Footings
- d) Pad Footing

**11. What is the purpose of seismic design considerations in RCC structures?**

- a) To enhance the aesthetic appeal
- b) To reduce construction costs
- ☒ c) To ensure the structure can withstand seismic forces
- d) To increase the weight of the structure

**12. How does STAAD.Pro handle non-linear analysis?**

- a) By ignoring material non-linearity
- b) By approximating with linear analysis techniques
- c) By providing tools to model non-linear material behaviors
- ☒ d) By simplifying the structural model

**13. Which of the following is NOT a common advanced topic discussed in the workshop?**

- a) P-Delta Analysis
- ☒ b) Nonlinear Analysis
- c) Foundation Design
- d) Soil Mechanics

**14. What is the primary focus of a buckling analysis?**

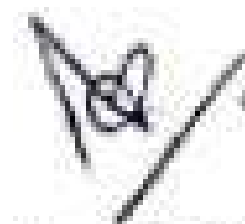

- a) To determine the thermal expansion of structural members
- ☒ b) To assess the stability of structures under axial loads
- c) To evaluate the impact of wind loads
- d) To calculate the maximum bending moments

**15. In STAAD.Pro, which feature helps in generating detailed design reports?**

- a) Model Viewer
- ☒ b) Report Generator
- c) Load Editor
- d) Analysis Settings

## Quiz: Workshop on "Introduction to STAAD.Pro and Basics of RCC Design"

Date: 17th October 2022 to 21 October 2022

### Answer Key

1. What does STAAD.Pro primarily focus on?
  - b) Structural Analysis and Design
2. Which of the following is NOT a type of load discussed in the workshop?
  - c) Thermal Load
3. What is the primary function of a column in a structural system?
  - c) To transfer vertical loads from beams to the foundation
4. In STAAD.Pro, which feature allows you to define material properties for different structural elements?
  - c) Material Database
5. Which of the following statements is true about dynamic analysis in STAAD.Pro?
  - b) It includes methods like Time History and Response Spectrum Analysis
6. What is the purpose of applying load combinations in structural analysis?
  - b) To ensure safety under different loading scenarios
7. Which RCC design code was introduced in the workshop for reference?
  - c) IS 456:2000
8. In the context of RCC design, what does "limit state" refer to?
  - c) The condition where the structure fails to meet certain performance criteria
9. What is the main difference between a one-way and a two-way slab?
  - c) One-way slabs bend in one direction, while two-way slabs bend in both directions
10. Which type of footing was discussed for RCC design in the workshop?
  - c) Isolated and Combined Footings
11. What is the purpose of seismic design considerations in RCC structures?
  - c) To ensure the structure can withstand seismic forces
12. How does STAAD.Pro handle non-linear analysis?
  - c) By providing tools to model non-linear material behaviors
13. Which of the following is NOT a common advanced topic discussed in the workshop?
  - d) Soil Mechanics
14. What is the primary focus of a buckling analysis?
  - b) To assess the stability of structures under axial loads
15. In STAAD.Pro, which feature helps in generating detailed design reports?
  - b) Report Generator

## SUMMARY NOTICE: Workshop on "Analysis and Design of RCC Building using STAAD PRO"

We are delighted to report the successful completion of the five-day workshop on "Introduction to STAAD.Pro and Basics of RCC Design," held from 17th to 21st October 2022. This workshop was attended by 59 Civil Engineering students, who demonstrated exceptional enthusiasm and commitment throughout the sessions.

### Workshop Highlights:

- **Comprehensive Learning Experience:** The workshop covered a wide range of topics, starting from the basics of STAAD.Pro and structural analysis to advanced modeling techniques and reinforced concrete design. Students were introduced to dynamic analysis, seismic design considerations, and the use of STAAD.Pro for real-world applications.
- **Hands-On Practice:** A significant portion of the workshop was dedicated to practical, hands-on sessions. Students created and analyzed structural models, designed RCC elements, and applied load combinations using STAAD.Pro, gaining valuable experience with industry-standard software.
- **Final Project:** On the final day, students worked on a complete structural design project, where they applied the knowledge and skills acquired during the workshop. This project involved designing a multi-story RCC building, incorporating both structural analysis and RCC design principles.

### Workshop Outcomes:

- **Proficiency in STAAD.Pro:** Participants developed strong proficiency in using STAAD.Pro for structural analysis and design, enabling them to confidently tackle various engineering challenges.

- **Understanding of RCC Design:** Students gained a solid understanding of reinforced concrete design principles, including the design of beams, columns, slabs, and footings in accordance with relevant design codes.
- **Advanced Analysis Skills:** The workshop equipped students with advanced skills in dynamic and seismic analysis, as well as P-Delta and nonlinear analysis, preparing them for complex structural engineering tasks.
- **Project-Based Learning:** Through the final project, participants applied their theoretical knowledge in a practical setting, reinforcing their understanding and showcasing their ability to design complete RCC structures.

### Conclusion:

This workshop has been a significant step in the professional development of our students, providing them with the tools and confidence to excel in structural engineering. We commend all 59 participants for their dedication and active participation, and we thank the instructors and organising team for their efforts in making this workshop a success.

We look forward to more such learning opportunities that will continue to empower our students with the skills needed for their future careers.

### NOTICE FOR WORKSHOP

#### **Subject: 5-Days Workshop on Robotic Process Automation (RPA)**

Dear Students and Faculty,

We are pleased to announce a 5-day workshop on **Robotic Process Automation (RPA)** to be held from **22 Aug, 2022** to **26 Aug, 2022**. This workshop aims to provide a comprehensive overview of the fundamentals of robotics, including practical applications and hands-on experience.

#### **Workshop Details:**

- **Dates: 22 Aug, 2022 to 26 Aug, 2022.**
- **Time: 09 am to 05 pm**
- **Venue: Dr. A. P. J Kalam Seminar Hall**

We look forward to your active participation in this exciting and educational event.

Workshop Coordinator

**Prof. C. S. Wagh**

**HOD**

**Principal**  
NESGI, Faculty of Engineering  
Get No. 89/0.71, Nagpur, Tal. Bhor, Dist. Pune

**Navsahyadri Education Society's Group of Institutions**  
**Faculty of Engineering**  
Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune - 412213  
**Computer Department**

## **Workshop Contents:-**

### **Day 1: Introduction to Creatio and RPA Fundamentals**

#### **Morning Session: Overview of Creatio**

- Introduction to Creatio and its capabilities
- Low-Code Development: What It Is and Why It Matters
- Navigating the Creatio Interface

#### **Afternoon Session: Introduction to RPA**

- What is RPA?
    - Definitions and core concepts
    - Benefits of RPA in business processes
  - How RPA Integrates with Low-Code Platforms
  - Creatio's RPA Capabilities and Tools
- 

### **Day 2: Setting Up RPA in Creatio**

#### **Morning Session: Getting Started with Creatio RPA**

- Introduction to Creatio's RPA Module
  - Overview of RPA functionalities in Creatio
  - Key components and tools for RPA

#### **Afternoon Session: Designing RPA Processes**

- Creating and Configuring Robots
    - Setting up RPA bots in Creatio
    - Designing basic automation tasks
  - Using RPA with Creatio Studio
    - Integration of RPA with Creatio's low-code environment
  - Hands-On Activity: Creating Your First RPA Bot
-

**Navsahyadri Education Society's Group of Institutions**  
**Faculty of Engineering**

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune - 412213

**Computer Department**

**Day 3: Advanced RPA Design and Integration**

**Morning Session: Building Complex RPA Workflows**

- Advanced Workflow Design with RPA
  - Combining multiple RPA tasks
  - Managing and optimizing workflows
- Error Handling and Debugging
  - Common issues and troubleshooting tips

**Afternoon Session: Integrating RPA with External Systems**

- Connecting RPA Bots to External Applications
    - Using APIs and other integration tools
  - Data Handling and Transformation
    - Extracting, transforming, and loading (ETL) data with RPA
  - Hands-On Activity: Developing and Integrating a Complex RPA Workflow
- 

**Day 4: Testing, Deployment, and Management**

**Morning Session: Testing RPA Solutions**

- Testing Best Practices
  - Unit testing RPA tasks
  - Performance and load testing
- Troubleshooting RPA Processes

**Afternoon Session: Deploying and Managing RPA**

- Deploying RPA Bots
    - Best practices for deployment
    - Managing different environments (development, testing, production)
  - Monitoring and Maintaining RPA Solutions
    - Tools and techniques for monitoring
    - Regular maintenance tasks
  - Hands-On Activity: Testing and Deploying RPA Solutions
-

**Navsahyadri Education Society's Group of Institutions**

**Faculty of Engineering**

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune - 412213

**Computer Department**

**Day 5: Real-World Applications and Future Trends**

**Morning Session: RPA Use Cases and Best Practices**

- Industry-Specific Use Cases
  - Case studies demonstrating successful RPA implementations
- Best Practices for RPA
  - Design considerations
  - Avoiding common pitfalls

**Afternoon Session: Future Trends in RPA and Wrap-Up**

- Emerging Trends and Innovations in RPA
  - AI and machine learning integration
  - The future of RPA and low-code platforms
- Q&A and Participant Feedback
  - Addressing questions and concerns
  - Collecting feedback for workshop improvement
- Hands-On Activity: Final Project Presentation
  - Participants present their RPA solutions developed during the workshop

Workshop Coordinator

14/15

**Quiz for Robotic Process Automation (RPA)**

1. What is the primary goal of Robotic Process Automation (RPA)?

- ☒ A) Enhance employee productivity
- ☐ B) Replace human workers
- ☐ C) Develop new software applications
- ☐ D) Increase manual data entry

2. Which of the following is a key benefit of RPA?

- ☒ A) Reduced error rates in automated processes
- ☐ B) Increased physical infrastructure requirements
- ☐ C) Increased manual oversight
- ☐ D) Higher operational costs

3. Which type of process is most suitable for automation with RPA?

- ☐ A) Highly variable processes
- ☐ B) Processes with human judgment
- ☒ C) Repetitive and rule-based processes
- ☐ D) Creative and decision-making tasks

4. What does the 'Bot' refer to in RPA?

- ☐ A) A physical robot
- ☒ B) A software program that automates tasks
- ☐ C) A data entry device
- ☐ D) A human employee

5. In RPA, what is a 'Workflow'?

- ☐ A) A document describing process improvements
- ☒ B) A sequence of tasks that bots automate
- ☐ C) A manual task performed by employees
- ☐ D) An analytical report of process performance

6. Which RPA tool component is responsible for designing and building automation workflows?

- ☐ A) Orchestrator
- ☒ B) Studio
- ☐ C) Robot
- ☐ D) Dashboard

7. What is the role of an 'Orchestrator' in an RPA environment?

- ☐ A) To design automation workflows
- ☒ B) To execute automation tasks
- ☐ C) To manage and monitor bots
- ☐ D) To create data reports

0 x

8. Which of the following is a common RPA tool?

- ☐ A) JIRA
- ☒ B) UiPath
- ☐ C) Salesforce
- ☐ D) Tableau

9. What does 'Attended Automation' mean in RPA?

- ☐ A) Bots run completely independently
- ☒ B) Bots require human intervention to start and complete tasks
- ☐ C) Bots are used only in backend processes
- ☐ D) Bots operate without any interaction with human users

10. Which of the following is a key consideration when implementing RPA?

- ☒ A) Organizational change management
- ☐ B) Expanding physical office space
- ☐ C) Increasing manual data entry
- ☐ D) Reducing IT infrastructure

11. What is 'Unattended Automation' in RPA?

- ☐ A) Bots perform tasks with human oversight
- ☒ B) Bots operate autonomously without human intervention
- ☐ C) Bots are only used during office hours
- ☐ D) Bots perform tasks only in response to human input

12. Which RPA component is responsible for running automation processes on user machines?

- ☐ A) Orchestrator
- ☒ B) Robot
- ☐ C) Studio
- ☐ D) Control Center

13. What type of data does RPA primarily interact with?

- ☐ A) Physical data stored in documents
- ☒ B) Structured and unstructured data in digital systems
- ☐ C) Sensor data from physical devices
- ☐ D) Encrypted data in secure servers

14. Which aspect is crucial for ensuring RPA bots function correctly over time?

- ☒ A) Regular maintenance and updates
- ☐ B) Increasing the number of bots
- ☐ C) Removing user input from processes
- ☐ D) Reducing system monitoring

15. How does RPA typically integrate with existing systems?

- ☐ A) By replacing existing software
- ☒ B) By using APIs and screen scraping
- ☐ C) By creating new systems from scratch
- ☐ D) By manually modifying system code

**Quiz for Robotic Process Automation (RPA)**

1. What is the primary goal of Robotic Process Automation (RPA)?

- ☒ A) Enhance employee productivity
- ☐ B) Replace human workers
- ☐ C) Develop new software applications
- ☐ D) Increase manual data entry

2. Which of the following is a key benefit of RPA?

- ☒ A) Reduced error rates in automated processes
- ☐ B) Increased physical infrastructure requirements
- ☐ C) Increased manual oversight
- ☐ D) Higher operational costs

3. Which type of process is most suitable for automation with RPA?

- ☐ A) Highly variable processes
- ☐ B) Processes with human judgment
- ☒ C) Repetitive and rule-based processes
- ☐ D) Creative and decision-making tasks

4. What does the 'Bot' refer to in RPA?

- ☐ A) A physical robot
- ☒ B) A software program that automates tasks
- ☐ C) A data entry device
- ☐ D) A human employee

5. In RPA, what is a 'Workflow'?

- ☐ A) A document describing process improvements
- ☒ B) A sequence of tasks that bots automate
- ☐ C) A manual task performed by employees
- ☐ D) An analytical report of process performance

6. Which RPA tool component is responsible for designing and building automation workflows?

- ☐ A) Orchestrator
- ☒ B) Studio
- ☐ C) Robot
- ☐ D) Dashboard

7. What is the role of an 'Orchestrator' in an RPA environment?

- ☐ A) To design automation workflows
- ☐ B) To execute automation tasks
- ☒ C) To manage and monitor bots
- ☐ D) To create data reports

8. Which of the following is a common RPA tool?

- ☒ A) JIRA
- ☐ B) UiPath
- ☐ C) Salesforce
- ☐ D) Tableau

9. What does 'Attended Automation' mean in RPA?

- ☒ A) Bots run completely independently
- ☐ B) Bots require human intervention to start and complete tasks
- ☐ C) Bots are used only in backend processes
- ☐ D) Bots operate without any interaction with human users

10. Which of the following is a key consideration when implementing RPA?

- ☒ A) Organizational change management
- ☐ B) Expanding physical office space
- ☐ C) Increasing manual data entry
- ☐ D) Reducing IT infrastructure

11. What is 'Unattended Automation' in RPA?

- ☐ A) Bots perform tasks with human oversight
- ☒ B) Bots operate autonomously without human intervention
- ☐ C) Bots are only used during office hours
- ☐ D) Bots perform tasks only in response to human input

12. Which RPA component is responsible for running automation processes on user machines?

- ☐ A) Orchestrator
- ☒ B) Robot
- ☐ C) Studio
- ☐ D) Control Center

13. What type of data does RPA primarily interact with?

- ☐ A) Physical data stored in documents
- ☒ B) Structured and unstructured data in digital systems
- ☐ C) Sensor data from physical devices
- ☐ D) Encrypted data in secure servers

14. Which aspect is crucial for ensuring RPA bots function correctly over time?

- ☒ A) Regular maintenance and updates
- ☐ B) Increasing the number of bots
- ☐ C) Removing user input from processes
- ☐ D) Reducing system monitoring

15. How does RPA typically integrate with existing systems?

- ☐ A) By replacing existing software
- ☒ B) By using APIs and screen scraping
- ☐ C) By creating new systems from scratch
- ☐ D) By manually modifying system code

11/15

**Quiz for Robotic Process Automation (RPA)**

**Answer Key Quiz for Robotic Process Automation (RPA)**

- 1. What is the primary goal of Robotic Process Automation (RPA)?**

Answer:-A) Enhance employee productivity

- 2. Which of the following is a key benefit of RPA?**

Answer:-A) Reduced error rates in automated processes

- 3. Which type of process is most suitable for automation with RPA?**

Answer:-C) Repetitive and rule-based processes

- 4. What does the 'Bot' refer to in RPA?**

Answer:-B) A software program that automates tasks

- 5. In RPA, what is a 'Workflow'?**

Answer:-B) A sequence of tasks that bots automate

- 6. Which RPA tool component is responsible for designing and building automation workflows?**

Answer:-B) Studio

- 7. What is the role of an 'Orchestrator' in an RPA environment?**

Answer:-C) To manage and monitor bots

- 8. Which of the following is a common RPA tool?**

Answer:-B) UiPath

- 9. What does 'Attended Automation' mean in RPA?**

Answer:-B) Bots require human intervention to start and complete tasks

- 10. Which of the following is a key consideration when implementing RPA?**

Answer:-A) Organizational change management

- 11. What is 'Unattended Automation' in RPA?**

Answer:-B) Bots operate autonomously without human intervention

**12. Which RPA component is responsible for running automation processes on user machines?**

Answer:-B) Robot

**13. What type of data does RPA primarily interact with?**

Answer:-B) Structured and unstructured data in digital systems

**14. Which aspect is crucial for ensuring RPA bots function correctly over time?**

Answer:-A) Regular maintenance and updates

**15. How does RPA typically integrate with existing systems?**

Answer:-B) By using APIs and screen scraping

## **Summary Report For Robotic Process Automation (RPA)**

### **Activity Report for Robotic Process Automation (RPA)**

**Reporting Period:** 22 Aug, 2022 to 26 Aug, 2022.

**Prepared By:** The Director Mechatron Robotics

**Date:** 26 Aug, 2022

### **1. Overview**

- **Summary:** Briefly describe the overall performance and impact of RPA during this period.

### **2. Key Updates**

- **New Projects:** List any new RPA projects started.
- **Completed Projects:** Mention any RPA projects completed, including their outcomes.
- **Ongoing Projects:** Provide status updates on current RPA projects.

### **3. Performance Highlights**

- **Efficiency Gains:** Note any improvements in process efficiency.
- **Cost Savings:** Mention any cost reductions achieved.

### **4. Challenges**

- **Issues Faced:** Briefly describe any problems encountered and how they were addressed.

### **5. Next Steps**

- **Future Plans:** Outline upcoming RPA initiatives or projects.

### Notice of Training Session

We are pleased to announce a training session for MBA first year students on **SAP Training**, designed to enhance skills, improve understanding in Human Resource management, etc. This session will be led by **SYSAP Technologies** from **24/01/2023 to 02/02/2023** at **10 AM to 4 PM.**, attendance is mandatory.

**Place: A. P. J Kalam Seminar Hall**

  
Director,  
Faculty of Management (MBA & MCA)  
Navsahyadri Education Society's  
Group of Institutions  
Naigoan, Pune 412 213

## CURRICULUM

### COURSE NAME: SAP TRAINING

**Offered By: SYSAP Technologies**

**DATE: 24/01/2023 to 02/02/2023**

**TIME: 10 AM to 4 PM.**

### SAP Training Program: 10-Day Course Syllabus

#### Day 1: Introduction to SAP and System Overview

- **Morning:**
  - Overview of SAP: History and Evolution
  - Introduction to SAP Modules and Architecture
  - Understanding SAP GUI (Graphical User Interface) and Navigation
- **Afternoon:**
  - Logging into SAP and Basic Navigation
  - Overview of SAP System Landscape (Development, Quality, Production)
  - **Hands-on Exercise:** Navigating SAP GUI and basic transactions
  - **Assignment:** Create a user profile and explore SAP system settings

#### Day 2: SAP ERP Fundamentals

- **Morning:**
  - Introduction to SAP ERP (Enterprise Resource Planning)
  - Key SAP ERP Modules: MM (Materials Management), SD (Sales and Distribution), FI (Financial Accounting), CO (Controlling)
  - Understanding Integration Points Between Modules
- **Afternoon:**
  - Overview of Master Data in SAP (Materials, Vendors, Customers)
  - **Hands-on Exercise:** View and manage master data records
  - **Assignment:** Create a sample master data record and verify integration

#### Day 3: SAP Materials Management (MM)

- **Morning:**
  - Introduction to MM Module: Key Concepts and Processes
  - Procurement Process: Purchase Requisition, Purchase Order, Good

- **Afternoon:**
  - Inventory Management: Stock Levels, Goods Movement
  - **Hands-on Exercise:** Create a Purchase Requisition and Purchase Order
  - **Assignment:** Process a Goods Receipt and manage inventory

#### **Day 4: SAP Sales and Distribution (SD)**

- **Morning:**
  - Introduction to SD Module: Key Concepts and Processes
  - Sales Order Processing: Create, Manage, and Monitor Sales Orders
- **Afternoon:**
  - Delivery and Billing: Delivery Processing, Invoice Creation
  - **Hands-on Exercise:** Create and process a Sales Order, Delivery, and Invoice
  - **Assignment:** Review and analyze a completed sales cycle

#### **Day 5: SAP Financial Accounting (FI)**

- **Morning:**
  - Introduction to FI Module: Key Concepts and Processes
  - General Ledger Accounting: Chart of Accounts, Journal Entries
- **Afternoon:**
  - Accounts Receivable and Accounts Payable: Managing Invoices, Payments
  - **Hands-on Exercise:** Post a Journal Entry, Manage Customer and Vendor Invoices
  - **Assignment:** Generate a financial report and review transactions

#### **Day 6: SAP Controlling (CO)**

- **Morning:**
  - Introduction to CO Module: Key Concepts and Processes
  - Cost Center Accounting: Setup, Budgeting, and Cost Allocation
- **Afternoon:**
  - Internal Orders and Profitability Analysis
  - **Hands-on Exercise:** Create and manage Cost Centers and Internal Orders
  - **Assignment:** Analyze cost reports and performance metrics

#### **Day 7: SAP Reporting and Analytics**

- **Morning:**

- Introduction to SAP Reporting Tools: SAP Query, Report Painter, Report Writer
- Basic Reporting: Standard Reports, Creating Custom Reports
- **Afternoon:**
  - Introduction to SAP Business Intelligence (BI) and SAP Analytics Cloud
  - **Hands-on Exercise:** Create and customize reports using SAP Query and Report Painter
  - **Assignment:** Develop a basic BI report and analyze data

## **Day 8: SAP Configuration and Customization**

- **Morning:**
  - Introduction to SAP Customizing and Configuration
  - Overview of SAP IMG (Implementation Guide) and Customization Paths
- **Afternoon:**
  - Basic Configuration in MM, SD, FI, CO Modules
  - **Hands-on Exercise:** Perform basic configuration tasks in selected modules
  - **Assignment:** Document configuration changes and their impact

## **Day 9: SAP Integration and Data Migration**

- **Morning:**
  - Introduction to SAP Integration: Middleware, IDocs, BAPIs
  - Data Migration: Data Transfer Workbench (DTW), Legacy Data Migration
- **Afternoon:**
  - Overview of SAP Integration Scenarios: Cross-Module Integration
  - **Hands-on Exercise:** Set up basic integration scenarios and perform data migration
  - **Assignment:** Develop a plan for data migration and integration testing

## **Day 10: Review, Best Practices, and Certification Preparation**

- **Morning:**
  - Review of Key Concepts and Hands-on Exercises
  - Best Practices for SAP Implementation and Usage
- **Afternoon:**
  - SAP Certification Overview and Preparation Tips

- **Hands-on Exercise:** Complete a mock certification test
- **Assignment:** Review and prepare a study plan for SAP certification

### Instructions:

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.

✓ 1. What does SAP stand for?

- ✓ A) Systems, Applications, and Products
- B) Strategic Applications and Programs
- C) Systematic Application Processing
- D) System and Application Products

✓ 2. Which SAP component provides the graphical user interface for interacting with the system?

- A) SAP NetWeaver
- B) SAP HANA
- ✓ C) SAP GUI
- D) SAP Fiori

✓ 3. Which SAP module is primarily used for handling financial accounting tasks?

- A) SD
- B) MM

☒ C) FI

☐ D) CO

✓ 4. What type of data includes materials, vendors, and customers in SAP?

☐ A) Transactional Data

☐ B) Configuration Data

☒ C) Master Data

☐ D) Analytical Data

✓ 5. Which document is used to request the purchase of materials in the MM module?

☐ A) Purchase Order

+1 ☒ B) Purchase Requisition

☐ C) Goods Receipt

☐ D) Invoice

✓ 6. What document is created when goods are physically received?

☐ A) Purchase Order

☒ B) Goods Receipt

☐ C) Invoice

☐ D) Delivery Note

✓ 7. Which document initiates the sales process in the SD module?

☒ A) Sales Order

☐ B) Delivery Note

☐ C) Invoice

☐ D) Credit Memo

✓ 8. What follows the creation of a sales order in the SD module?

☐ A) Invoice

☐ B) Goods Receipt

☒ C) Delivery

☐ D) Purchase Requisition

✓ 9. Which of the following is NOT a part of General Ledger Accounting in SAP FI?

☐ A) Journal Entries

☒ B) Accounts Receivable

- C) Bank Reconciliation
- D) Asset Accounting

✓ 10. What is used to manage incoming and outgoing payments in SAP FI?

- A) Journal Entries
- B) Cash Flow Statement
- ✓ ○ C) Accounts Payable
- D) Vendor Master Data

✓ 11. Which component of SAP CO is used for budgeting and cost management?

- ✓ ○ A) Cost Center Accounting
- B) Profitability Analysis
- C) Internal Orders
- D) Activity-Based Costing

✓ 12. What is used to analyze the profitability of different market segments in SAP CO?

- A) Cost Center Accounting
- ✓ ○ B) Profitability Analysis
- C) Internal Orders
- D) Cost Object Controlling

✓ 13. Which tool in SAP allows users to create custom reports and queries?

- A) SAP HANA
- ✓ ○ B) SAP Query
- C) SAP Fiori
- D) SAP Lumira

✓ 14. What is SAP Business Intelligence (BI) primarily used for?

- A) Managing operational transactions
- ✓ ○ B) Analyzing and reporting business data
- C) Configuring system settings
- D) Conducting system integrations

✗ 15. What is the primary tool used for system configuration in SAP?

- ✓ ○ A) SAP GUI
- B) SAP IMG

- ☐ C) SAP Fiori
- ☒ D) SAP HANA

✓ 16. Which process involves setting up system parameters and defining system settings in SAP?

- ☐ A) Customizing
- ☐ B) Transaction Processing
- ☐ C) Data Migration
- ☒ D) Reporting

✓ 17. Which SAP tool is used for data migration from legacy systems?

- ☒ A) SAP Data Services
- ☐ B) SAP Business Warehouse
- ☐ C) SAP NetWeaver
- ☐ D) SAP Fiori

✓ 18. What are IDocs used for in SAP?

- ☐ A) Managing user profiles
- ☒ B) Transferring data between SAP systems and external systems
- ☐ C) Creating financial reports
- ☐ D) Configuring system settings

✓ 19. Which aspect is NOT considered a best practice for SAP implementation?

- ☐ A) Comprehensive training for users
- ☒ B) Frequent system customization without documentation
- ☐ C) Thorough testing of configurations
- ☐ D) Clear communication of project goals

✓ 20. What is the primary purpose of SAP certification?

- ☒ A) To gain hands-on experience with the software
- ☐ B) To validate knowledge and skills in SAP
- ☐ C) To configure SAP modules
- ☐ D) To perform data migration

- D) SAP Lumira

✓ 14. What is SAP Business Intelligence (BI) primarily used for?

- A) Managing operational transactions
- ✓ ○ B) Analyzing and reporting business data
- C) Configuring system settings
- D) Conducting system integrations

✓ 15. What is the primary tool used for system configuration in SAP?

- A) SAP GUI
- ✓ ○ B) SAP IMG

- C) SAP Fiori
- D) SAP HANA

✓ 16. Which process involves setting up system parameters and defining system settings in SAP?

- ✓ A) Customizing
- B) Transaction Processing
- C) Data Migration
- D) Reporting

✓ 17. Which SAP tool is used for data migration from legacy systems?

- ✓ A) SAP Data Services
- B) SAP Business Warehouse
- C) SAP NetWeaver
- D) SAP Fiori

✓ 18. What are IDocs used for in SAP?

- A) Managing user profiles
- B) Transferring data between SAP systems and external systems
- ✓ C) Creating financial reports
- D) Configuring system settings

✓ 19. Which aspect is NOT considered a best practice for SAP implementation?

- A) Comprehensive training for users
- B) Frequent system customization without documentation
- C) Thorough testing of configurations
- ✓ D) Clear communication of project goals

✓ 20. What is the primary purpose of SAP certification?

- A) To gain hands-on experience with the software
- B) To validate knowledge and skills in SAP
- C) To configure SAP modules
- ✓ D) To perform data migration

### Instructions:

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.

✓ 1. What does SAP stand for?

- ✓ A) Systems, Applications, and Products
- B) Strategic Applications and Programs
- C) Systematic Application Processing
- D) System and Application Products

✓ 2. Which SAP component provides the graphical user interface for interacting with the system?

- A) SAP NetWeaver
- B) SAP HANA
- ✓ C) SAP GUI
- D) SAP Fiori

✓ 3. Which SAP module is primarily used for handling financial accounting tasks?

- A) SD
- B) MM

- ☒ C) FI
- ☐ D) CO

✓ 4. What type of data includes materials, vendors, and customers in SAP?

- ☐ A) Transactional Data
- ☐ B) Configuration Data
- ☒ C) Master Data
- ☐ D) Analytical Data

✓ 5. Which document is used to request the purchase of materials in the MM module?

- ☐ A) Purchase Order
- ☒ B) Purchase Requisition
- ☐ C) Goods Receipt
- ☐ D) Invoice

✓ 6. What document is created when goods are physically received?

- ☐ A) Purchase Order
- ☒ B) Goods Receipt
- ☐ C) Invoice
- ☐ D) Delivery Note

✓ 7. Which document initiates the sales process in the SD module?

- ☒ A) Sales Order
- ☐ B) Delivery Note
- ☐ C) Invoice
- ☐ D) Credit Memo

✓ 8. What follows the creation of a sales order in the SD module?

- ☐ A) Invoice
- ☐ B) Goods Receipt
- ☒ C) Delivery
- ☐ D) Purchase Requisition

✓ 9. Which of the following is NOT a part of General Ledger Accounting in SAP FI?

- ☒ A) Journal Entries
- ☐ B) Accounts Receivable

- C) Bank Reconciliation
- D) Asset Accounting

✓ 10. What is used to manage incoming and outgoing payments in SAP FI?

- A) Journal Entries
- B) Cash Flow Statement
- ✓ ○ C) Accounts Payable
- D) Vendor Master Data

✓ 11. Which component of SAP CO is used for budgeting and cost management?

- ✓ ○ A) Cost Center Accounting
- B) Profitability Analysis
- C) Internal Orders
- D) Activity-Based Costing

✓ 12. What is used to analyze the profitability of different market segments in SAP CO?

- A) Cost Center Accounting
- ✓ ○ B) Profitability Analysis
- C) Internal Orders
- D) Cost Object Controlling

✓ 13. Which tool in SAP allows users to create custom reports and queries?

- A) SAP HANA
- ✓ ○ B) SAP Query
- C) SAP Fiori
- D) SAP Lumira

✗ 14. What is SAP Business Intelligence (BI) primarily used for?

- ✓ ○ A) Managing operational transactions
- B) Analyzing and reporting business data
- C) Configuring system settings
- D) Conducting system integrations

✗ 15. What is the primary tool used for system configuration in SAP?

- ✓ ○ A) SAP GUI
- B) SAP IMG

- C) SAP Fiori
- D) SAP HANA

✓ 16. Which process involves setting up system parameters and defining system settings in SAP?

- ✓ ○ A) Customizing
- B) Transaction Processing
- C) Data Migration
- D) Reporting

✗ 17. Which SAP tool is used for data migration from legacy systems?

- A) SAP Data Services
- B) SAP Business Warehouse
- C) SAP NetWeaver
- ✓ ○ D) SAP Fiori

✓ 18. What are IDocs used for in SAP?

- A) Managing user profiles
- ✓ ○ B) Transferring data between SAP systems and external systems
- C) Creating financial reports
- D) Configuring system settings

✓ 19. Which aspect is NOT considered a best practice for SAP implementation?

- A) Comprehensive training for users
- ✓ ○ B) Frequent system customization without documentation
- C) Thorough testing of configurations
- D) Clear communication of project goals

✗ 20. What is the primary purpose of SAP certification?

- ✓ ○ A) To gain hands-on experience with the software
- B) To validate knowledge and skills in SAP

### Report: 10-Day SAP Training Course

**Course Dates:** January 24, 2023 – February 2, 2023

**Duration:** 50 Hours (10:00 AM – 04:00 PM)

**Conducted By:** SYSAP Technologies

**Overview:** The 10-day SAP training course, organized by SYSAP Technologies, was held from January 24, 2023, to February 2, 2023. The program, spanning 50 hours over ten days, aimed to provide participants with a thorough understanding of SAP systems, focusing on practical skills necessary for effective SAP usage and management.

### Objectives:

- To introduce participants to the SAP system and its functionalities.
- To develop hands-on skills in using key SAP modules.
- To enhance participants' ability to integrate SAP solutions within business processes.

### Notice of Training Session

We are pleased to announce a training session for MBA first year students on **Competency Mapping and Balance Score Card**, designed to enhance skills, improve understanding in Human Resource management, etc. This session will be led by **Manpower Group Services India PVT. Ltd** from **24/01/2023 to 02/02/2023** at **10 AM to 4 PM.**, attendance is mandatory.

**Place: MBA & MCA Seminar Hall**

  
Director.  
Faculty of Management (MBA & MCA)  
Navsahyadri Education Society's  
Group of Institutions  
Naigaon, Pune 412 213

**COURSE NAME: Competency Mapping and Balanced Scorecard**

**Offered By: Manpower Group Services India PVT. Ltd**

**DATE: 24/01/2023 to 02/02/2023**

**TIME: 10 AM to 4 PM.**

**Competency Mapping and Balanced Scorecard: 10-Day Course Syllabus**

**Day 1: Introduction to Competency Mapping**

- **Morning:**
  - Overview of Competency Mapping: Definition and Importance
  - Historical Background and Evolution of Competency Models
  - Key Concepts: Competencies, Skills, and Behaviors
- **Afternoon:**
  - Types of Competency Models: Core, Functional, and Leadership Competencies
  - **Hands-on Exercise:** Identify competencies required for various roles within an organization
  - **Assignment:** Research and summarize a real-world example of competency mapping

**Day 2: Designing Competency Models**

- **Morning:**
  - Steps to Design a Competency Model: Needs Assessment, Competency Identification, and Validation
  - Methods for Identifying Competencies: Job Analysis, Interviews, Surveys
- **Afternoon:**
  - **Hands-on Exercise:** Conduct a job analysis and identify key competencies for a selected role
  - **Assignment:** Develop a draft competency model based on the analysis

**Day 3: Implementing Competency Models**

- **Morning:**
  - Integrating Competency Models with HR Processes: Recruitment, Training, Performance Management
  - Communication and Change Management Strategies for Competency Implementation
- **Afternoon:**
  - **Hands-on Exercise:** Create an implementation plan for integrating a competency model into HR processes
  - **Assignment:** Prepare a communication strategy for rolling out the competency model

**Day 4: Introduction to Balanced Scorecard (BSC)**

- **Morning:**
  - Overview of Balanced Scorecard: Definition and Importance
  - The Four Perspectives of BSC: Financial, Customer, Internal Processes, Learning & Growth
- **Afternoon:**
  - **Hands-on Exercise:** Analyze a case study to identify key performance indicators (KPIs) for each BSC perspective
  - **Assignment:** Develop a balanced scorecard for a hypothetical organization

#### **Day 5: Developing a Balanced Scorecard**

- **Morning:**
  - Aligning BSC with Organizational Strategy and Goals
  - Setting Objectives and Measures for Each Perspective
- **Afternoon:**
  - **Hands-on Exercise:** Create objectives, measures, and targets for each perspective of the BSC
  - **Assignment:** Design a balanced scorecard dashboard for tracking performance

#### **Day 6: Integrating Competency Mapping with Balanced Scorecard**

- **Morning:**
  - Linking Competency Models with the Balanced Scorecard Framework
  - How Competencies Support Strategic Objectives and Performance Measures
- **Afternoon:**
  - **Hands-on Exercise:** Map competencies to the Balanced Scorecard perspectives and objectives
  - **Assignment:** Develop a strategic plan that integrates competency mapping with the balanced scorecard

#### **Day 7: Measuring and Evaluating Competency Effectiveness**

- **Morning:**
  - Methods for Measuring Competency Effectiveness: Surveys, Assessments, Performance Reviews
  - Techniques for Analyzing Competency Data and Feedback
- **Afternoon:**
  - **Hands-on Exercise:** Design a competency evaluation survey and analysis plan
  - **Assignment:** Prepare a report on the effectiveness of a competency model study

#### **Day 8: Monitoring and Reviewing the Balanced Scorecard**

- **Morning:**
  - Techniques for Monitoring and Reviewing BSC Performance
  - Handling Issues and Making Adjustments to the Scorecard
- **Afternoon:**
  - **Hands-on Exercise:** Analyze sample BSC reports and suggest improvements
  - **Assignment:** Develop a review process for the balanced scorecard in a real or hypothetical organization

#### Day 9: Best Practices and Case Studies

- **Morning:**
  - Best Practices for Competency Mapping and Balanced Scorecard Implementation
  - Review of Successful Case Studies and Lessons Learned
- **Afternoon:**
  - **Hands-on Exercise:** Analyze and present a case study of a successful implementation of competency mapping and BSC
  - **Assignment:** Prepare a presentation on best practices and key takeaways from the course

#### Day 10: Review and Application

- **Morning:**
    - Review of Key Concepts and Techniques Covered in the Course
    - Application of Competency Mapping and Balanced Scorecard in Real-World Scenarios
  - **Afternoon:**
    - **Hands-on Exercise:** Develop a comprehensive implementation plan that integrates competency mapping and balanced scorecard for a selected organization
    - **Final Assignment:** Present and discuss your comprehensive plan with feedback from peers and instructors

### Instructions:

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.

1. What is the primary purpose of competency mapping in an organization?
  - ☐ A) To streamline financial processes
  - ☒ B) To identify and develop key competencies required for various roles
  - ☐ C) To manage supply chain operations
  - ☐ D) To create marketing strategies
2. Which of the following is NOT a type of competency model?
  - ☐ A) Core Competencies
  - ☐ B) Functional Competencies
  - ☐ C) Leadership Competencies
  - ☒ D) Technical Competencies
3. What is the first step in designing a competency model?
  - ☐ A) Competency Validation
  - ☒ B) Needs Assessment
  - ☐ C) Competency Identification

- D) Implementation

✓ 4. Which method is commonly used for identifying competencies?

- A) SWOT Analysis
- ✓ ○ B) Job Analysis
- C) PEST Analysis
- D) Porter's Five Forces

✓ 5. Which process is essential for integrating a competency model into HR practices?

- A) Employee Demotion
- B) Customizing Marketing Strategies
- ✓ ○ C) Recruitment, Training, and Performance Management
- D) Financial Restructuring

✓ 6. What is a key consideration when implementing a competency model?

- A) Ignoring employee feedback
- B) Frequent changes without communication
- ✓ ○ C) Effective Communication and Change Management
- D) Avoiding system updates

✗ 7. What are the four perspectives of the Balanced Scorecard?

- ✓ ○ A) Financial, Customer, Internal Processes, Learning & Growth
- B) Market Share, Customer Satisfaction, Internal Processes, Learning & Development
- C) Sales, Marketing, Operations, Finance
- D) Customer, Innovation, Financial, Human Resources

✓ 8. Which perspective of the Balanced Scorecard focuses on financial performance?

- A) Customer
- B) Learning & Growth
- C) Internal Processes
- ✓ ○ D) Financial

✓ 9. What is the purpose of setting objectives in the Balanced Scorecard framework?

- A) To create marketing plans
- ✓ ○ B) To align performance measures with organizational strategy

- C) To manage day-to-day operations
- D) To develop IT infrastructure

✓ 10. Which of the following is a key element in developing a Balanced Scorecard?

- A) Setting random targets
- ✓ ○ B) Defining objectives and measures
- C) Ignoring organizational strategy
- D) Focusing only on financial metrics

✓ 11. How can competencies support the Balanced Scorecard framework?

- A) By focusing solely on financial results
- ✓ ○ B) By aligning skills and behaviors with strategic objectives
- C) By ignoring employee development
- D) By eliminating performance measures

✓ 12. What is the benefit of linking competency models to the Balanced Scorecard?

- A) Enhanced marketing strategies
- ✓ ○ B) Improved alignment between employee performance and organizational goals
- C) Reduced financial reporting
- D) Simplified IT systems

✗ 13. Which method is commonly used to measure the effectiveness of a competency model?

- A) SWOT Analysis
- B) Performance Reviews
- ✓ ○ C) PEST Analysis
- D) Market Research

✗ 14. What is the primary goal of analyzing competency data and feedback?

- ✓ ○ A) To assess employee satisfaction
- B) To improve the accuracy of financial forecasts
- C) To identify areas for development and improvement in competency models
- D) To design new marketing campaigns

✓ 15. What is a key technique for monitoring Balanced Scorecard performance?

- A) Ignoring performance metrics

- ☒ B) Regular Review and Analysis of BSC Reports
  - ☐ C) Delaying performance evaluations
  - ☐ D) Avoiding performance targets
- ✓ 16. Which action is NOT recommended when reviewing the Balanced Scorecard?
  - ☐ A) Analyzing performance data regularly
  - ☐ B) Making adjustments based on performance issues
  - ☒ C) Disregarding stakeholder feedback
  - ☐ D) Updating targets and measures as needed
- ✓ 17. What is a common best practice for implementing competency mapping?
  - ☐ A) Frequent changes without documentation
  - ☒ B) Comprehensive Training and Clear Communication
  - ☐ C) Ignoring feedback from employees
  - ☐ D) Keeping competency models static
- ✓ 18. In which scenario is a Balanced Scorecard most effective?
  - ☐ A) When used only for financial metrics
  - ☒ B) When aligned with organizational strategy and performance measures
  - ☐ C) When ignored in favor of traditional performance reviews
  - ☐ D) When implemented without setting objectives
- ✓ 19. What should a comprehensive implementation plan for competency mapping include?
  - ☐ A) Only job descriptions
  - ☒ B) Detailed steps for integration, communication strategies, and evaluation methods
  - ☐ C) Focus solely on training programs
  - ☐ D) Excluding feedback mechanisms
- ✓ 20. Which component is NOT typically included in a Balanced Scorecard dashboard?
  - ☐ A) Financial Performance Metrics
  - ☐ B) Customer Satisfaction Indicators
  - ☒ C) Random Marketing Strategies
  - ☐ D) Internal Process Measures

☒ B) Regular Review and Analysis of BSC Reports

☐ C) Delaying performance evaluations

☐ D) Avoiding performance targets

✓ 16. Which action is NOT recommended when reviewing the Balanced Scorecard?

☐ A) Analyzing performance data regularly

☐ B) Making adjustments based on performance issues

☒ C) Disregarding stakeholder feedback

☐ D) Updating targets and measures as needed

✓ 17. What is a common best practice for implementing competency mapping?

☐ A) Frequent changes without documentation

☒ B) Comprehensive Training and Clear Communication

☐ C) Ignoring feedback from employees

☐ D) Keeping competency models static

✓ 18. In which scenario is a Balanced Scorecard most effective?

☐ A) When used only for financial metrics

☒ B) When aligned with organizational strategy and performance measures

☐ C) When ignored in favor of traditional performance reviews

☐ D) When implemented without setting objectives

✓ 19. What should a comprehensive implementation plan for competency mapping include?

# Navsahyadri Group of Institutes

## Faculty of Management - MBA

NAAC 'A' Grade Institute

Campus Address: Naigoan (Nasrapur), Pune-Satara Road, Pune - 412 213

Approved by AICTE, New Delhi | Recognized by Govt. of Maharashtra | Affiliated to SPPU (Pune University) and DTE

### Report: 10-Day Course on Digital Marketing

**Course Dates:** January 24, 2023 – February 2, 2023

**Duration:** 50 Hours (10:00 AM – 04:00 PM)

**Conducted By:** Skill Edge

**Overview:** The 10-day Digital Marketing course, delivered by Skill Edge, took place from January 24, 2023, to February 2, 2023. The course, encompassing 50 hours, was designed to provide participants with comprehensive knowledge and practical skills in digital marketing strategies and tools.

### Objectives:

- To familiarize participants with key concepts and strategies in digital marketing.
- To develop practical skills in using digital marketing tools and platforms.
- To enhance participants' ability to create and implement effective digital marketing campaigns.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**Date: 17-01-2022**

**Notice: Workshop on Career Guidance**

A "Career Guidance" workshop is scheduled to be held from **24th January 2022 to 28th January 2022**. This workshop is designed to provide students with insights and advice on planning their career paths and exploring various career opportunities in the field of engineering.

**Workshop Details:**

**Dates:** 24th January 2022 to 28th January 2022

**Time:** 09:00 AM to 5:00 PM

**Location:** Dr. A. P. J Abdul Kalam Hall

All first-year students are encouraged to participate in this workshop to gain valuable knowledge and prepare for a successful career. Attendance is highly encouraged.

  
**Workshop Coordinator**  
**Prof. Z. K. Shaikh**

  
**FEHOD**  
**Prof. S. S. Raut**

NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING

**Total Program Duration:** 30 Hours

---

**Detail "Career Guidance" Five Day Program Content**

**Day 1: Introduction to Career Planning & Self-Assessment**

***Importance of Career Planning***

Understanding the role of career planning in professional success.  
Overview of career opportunities for engineering students.  
The significance of early planning.

***Self-Assessment & Strength Identification***

Personality tests (MBTI, Holland Code) to discover strengths.  
Skill identification: Technical, interpersonal, leadership.  
Aligning personality traits with career paths.

***Goal Setting & Vision Building***

Short-term and long-term goal setting techniques (SMART goals).  
Building a career roadmap: defining milestones.

***Personal Branding***

How to build a personal brand as an engineering student.  
Developing a personal elevator pitch.

---

**Day 2: Exploring Career Opportunities in Engineering**

***Engineering Specializations & Their Career Prospects***

Overview of core engineering branches (Mechanical, Civil, Electrical, etc.).  
Emerging fields (AI, Data Science, Renewable Energy, etc.).  
Aligning interest areas with career paths.

***Industry Overview & In-Demand Skills***

Current industry trends and future demands.  
Importance of soft skills alongside technical expertise.

***Research and Development Careers***

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

Pathway to becoming a researcher in various engineering fields.  
Collaborations between academia and industry.

***Entrepreneurship in Engineering***

Steps to start a business or a tech-based startup.  
Role of innovation and creativity in entrepreneurship.

---

**Day 3: Resume Building, LinkedIn & Networking**

***Crafting an Effective Resume***

Key elements of a professional resume.  
Tailoring the resume for different job opportunities and internships.

***LinkedIn Profile Optimization***

Building a strong LinkedIn profile.  
Techniques to grow and maintain a professional network.

***Networking Skills***

Importance of networking in career growth.  
Approaching professionals, attending webinars/conferences.

***Writing Professional Emails & Communication***

Structure of professional emails.  
Importance of clear communication in job search and internships.

---

**Day 4: Higher Education Opportunities**

***Higher Education Options in Engineering***

Master's programs in India and abroad.  
Understanding GRE, GATE, TOEFL, IELTS, etc.  
Aligning education with career objectives.

***Preparing for Competitive Exams***

Overview of major exams like GATE, CAT, GRE, etc.  
Effective preparation strategies and time management.

***Pursuing Research and Doctorate Degrees***

Pathway to PhD and research careers.  
Choosing the right university and field of research.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

***Scholarships & Financial Planning for Higher Education***

Scholarship opportunities for engineering students.

Managing finances for higher studies.

---

**Day 5: Internship & Job Search Strategies**

***Importance of Internships***

How internships enhance employability.

Finding relevant internships during engineering studies.

***Job Search Strategies***

Job portals, career fairs, and leveraging college placement cells.

Tailoring applications and preparing for interviews.

***Interview Skills & Mock Interviews***

Techniques to ace interviews: behavioral and technical.

Common interview questions for engineering roles.

***Career Growth & Continuous Learning***

Importance of lifelong learning.

Tools for continuous professional development (courses, certifications)

**Maximum Marks per Question:** 1 Mark

**Duration:** 30 minutes

**Total Marks:** 15

**Negative Marking:** None

13  
15

**Q1. Why is career planning important for engineering students?**

- A) To stay organized in studies
- B) To avoid confusion later in life
- ☒ C) To align academic and professional goals
- D) To stay focused on current semester exams

**Q2. Which of the following is NOT a method for self-assessment?**

- A) MBTI
- B) Holland Code
- ☒ C) SWOT Analysis
- ☒ D) Personality quizzes on social media

**Q3. What is the purpose of setting SMART goals in career planning?**

- A) To make vague plans
- ☒ B) To create a structured, achievable roadmap
- C) To impress recruiters
- D) To shorten long-term goals

**Q4. Which is NOT an emerging engineering field?**

- A) Artificial Intelligence
- B) Data Science
- ☒ C) Textbook Publishing
- ☒ D) Renewable Energy

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**Q5. Why is personal branding important for engineering students?**

- A) To look professional on social media
- ☒ B) To create a unique image that aligns with their career goals
- C) To compete with friends
- D) To gain more followers online

**Q6. Which skill is NOT typically demanded by the engineering industry?**

- A) Problem-solving skills
- ☒ B) Soft skills
- C) Technical proficiency
- D) Memorization of books

**Q7. What is the main advantage of pursuing a research career in engineering?**

- A) Higher starting salaries
- ☒ B) The opportunity to innovate and contribute to knowledge
- C) More travel opportunities
- D) Easier job responsibilities

**Q8. What is a common first step in starting a tech-based entrepreneurial venture?**

- A) Applying for a corporate job
- B) Identifying a problem or market need
- ☒ C) Waiting for government support
- D) Completing all your degrees first

**Q9. Which is a key component of a professional resume?**

- A) Details about high school extracurriculars
- ☒ B) Contact information, skills, education, and experience
- C) Personal anecdotes and hobbies
- D) Long paragraphs about family background

**Q10. How can students benefit from optimizing their LinkedIn profile?**

- A) By making new friends
- ☒ B) By connecting with industry professionals and increasing job visibility
- C) By sharing personal opinions
- D) By showcasing their social life

**Q11. What is the most effective way to network as an engineering student?**

- ☒ A) Attending engineering seminars and webinars
- B) Watching TV shows
- C) Taking part in debates on social media
- D) Sending unsolicited messages to strangers

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**Q12. Which exam is essential for students aiming for postgraduate engineering studies in India?**

- A) GRE
- ☒ B) GATE
- C) TOEFL
- D) IELTS

**Q13. What should students prioritize when preparing for competitive exams like GRE or GATE?**

- A) Cramming last-minute
- ☒ B) Effective time management and a structured study plan
- ☒ C) Avoiding extracurricular activities
- D) Using shortcuts for quick results

**Q14. Why are internships important for engineering students?**

- A) To earn a salary during studies
- ☒ B) To gain hands-on experience and improve employability
- ☒ C) To get a break from academic studies
- D) To pass time during vacations

**Q15. What is a key strategy for continuous career growth?**

- A) Stop learning once you get a job
- B) Focus only on the job assigned
- ☒ C) Engage in continuous learning through certifications and professional development
- D) Avoid feedback from peers

**Activity Report**

**Workshop Overview**

The 5-day workshop on "Career Guidance" aimed to equip first-year engineering students with essential skills and knowledge required for effective career planning and development. Each day consisted of 6 hours of interactive sessions, discussions, and practical activities.

**Day 1: Introduction to Career Planning & Self-Assessment**

*Objective:* To introduce the importance of career planning and help students identify their strengths and set goals.

*Outcome:* Students gained an understanding of career planning and self-assessment. They developed personalized career goals and a clearer sense of their professional identity.

**Day 2: Exploring Career Opportunities in Engineering**

*Objective:* To familiarize students with various career paths and emerging fields in engineering.

*Outcome:* Students gained insights into various engineering fields and career options. They learned about the role of innovation and research in engineering careers.

**Day 3: Resume Building, LinkedIn & Networking**

*Objective:* To help students create effective resumes, optimize their LinkedIn profiles, and develop networking skills.

*Outcome:* Students developed well-structured resumes, optimized their LinkedIn profiles, and improved their networking and professional communication skills.

**Day 4: Higher Education Opportunities**

*Objective:* To inform students about higher education options and preparation strategies for competitive exams.

*Outcome:* Students gained knowledge about higher education pathways and preparation strategies. They learned about scholarship opportunities and financial planning for advanced studies.

**Day 5: Internship & Job Search Strategies**

*Objective:* To guide students on how to find internships and navigate the job search process effectively.

*Outcome:* Students understood the value of internships, learned effective job search strategies, and improved their interview skills. They recognized the importance of continuous learning for career growth.

## NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS, PUNE

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune – 412213

### Mechanical Engineering Department NOTICE OF WORKSHOP

**Subject:** Mastering ANSYS CFD

**Date:** 27-12-2021 to 31-12-2021

**Time:** 09:00 AM to 5:00 PM

**Dear Students,**

We are pleased to announce a workshop focused on the advancement of knowledge of mechanical Engineering students. This workshop aims to provide valuable insights to the students about Computational fluid Dynamics (CFD), which will be an added advantage in his career growth as well as job search.

**Workshop Details:**

**Topic:** Mastering ANSYS CFD

**Objective:** To explore the benefits, technology, and implementation strategies for Computational Fluid Dynamics.

• **Key Highlights:**

1. Introduction to Computational Fluid Dynamics (CFD)
  - Fundamentals of CFD
  - Overview of ANSYS CFD
2. Setting Up Simulations
  - Pre-Processing
    - Geometry Creation and Import
    - Meshing
    - Defining Boundary Conditions
    - Material Properties
3. Solver Settings and Analysis
  - Solver Selection
  - Turbulence Modeling
  - Convergence Criteria
  - Multiphase Flow and Heat Transfer
4. Post-Processing and Results Interpretation
  - Visualizing Results
  - Quantitative Analysis
  - Data Export
5. Advanced Topics
  - Transient Simulations
  - Optimization and Parametric Studies
  - Complex Physics Integration
6. Practical Applications
  - Case Studies
  - Hands-On Exercises
7. Troubleshooting and Best Practices
  - Common Pitfalls
  - Best Practices
8. Validation and Verification
  - Model Validation
  - Verification of Results
9. Q&A and Networking
  - Discussion
  - Networking
10. Certification and Continuing Education
  - Certification
  - Continuing Education

This workshop would be ideal for engineers and professionals looking to deepen their understanding of CFD and ANSYS tools, helping them to solve complex fluid dynamics problems more effectively.

**Mechanical Engineering Department  
CONTENTS OF WORKSHOP (DAY-1)**

**Subject:** Mastering ANSYS CFD

**Date:** 27-12-2021

**Time:** 09:00 AM to 5:00 PM

**Day 1: Introduction to ANSYS CFD and Basic Setup**

- Morning Session (3 hours):
  1. Introduction to CFD and ANSYS:
    - Overview of CFD principles and applications.
    - Introduction to ANSYS software suite and its components.
    - Importance of CFD in engineering and design.
  2. Getting Started with ANSYS Workbench:
    - Overview of ANSYS Workbench interface.
    - Basic project setup and file management.
    - Introduction to different types of analyses (CFD, Structural, etc.).
- Lunch Break (1 hour)
- Afternoon Session (2 hours):
  1. Creating and Importing Geometry:
    - Methods for creating geometry within ANSYS DesignModeler.
    - Importing geometries from other CAD software.
    - Basic tips for geometry simplification.
  2. Setting Up a Basic CFD Simulation:
    - Introduction to Mesh Generation.
    - Setting up boundary conditions and initial conditions.
    - Running a basic simulation and interpreting results.
  3. Q&A and Wrap-Up:
    - Addressing participant questions.
    - Summary of the day's key points.

This workshop would be ideal for engineers and professionals looking to deepen their understanding of CFD and ANSYS tools, helping them to solve complex fluid dynamics problems more effectively.

**Mechanical Engineering Department  
CONTENTS OF WORKSHOP (DAY-2)**

**Subject:** Mastering ANSYS CFD

**Date:** 28-12-2021

**Time:** 09:00 AM to 5:00 PM

**Day 2: Meshing Techniques and Boundary Conditions**

- Morning Session (3 hours):
  1. Advanced Meshing Techniques:
    - Detailed discussion on mesh types (structured vs. unstructured).
    - Mesh refinement techniques and importance.
    - Handling complex geometries and mesh quality checks.
  2. Boundary Conditions and Material Properties:
    - Setting up various boundary conditions (inlet, outlet, wall, symmetry).
    - Defining material properties and their impact on simulations.
- Lunch Break (1 hour)
- Afternoon Session (2 hours):
  1. Hands-On Exercise: Mesh Generation and Boundary Setup:
    - Participants will create their own mesh for a given geometry.
    - Applying different boundary conditions to their model.
  2. Q&A and Wrap-Up:
    - Addressing participant questions.
    - Summary of the day's activities and key learnings.

This workshop would be ideal for engineers and professionals looking to deepen their understanding of CFD and ANSYS tools, helping them to solve complex fluid dynamics problems more effectively.

**Mechanical Engineering Department  
CONTENTS OF WORKSHOP (DAY-4)**

**Subject:** Mastering ANSYS CFD

**Date:** 30-12-2021

**Time:** 09:00 AM to 5:00 PM

**Day 4: Post-Processing and Result Analysis**

- Morning Session (3 hours):
  1. Post-Processing Techniques:
    - Introduction to ANSYS CFD post-processing tools.
    - Creating and interpreting contour plots, vector plots, and streamlines.
  2. Analyzing Results:
    - How to validate results and check for errors.
    - Techniques for extracting meaningful data from results.
- Lunch Break (1 hour)
- Afternoon Session (2 hours):
  1. Hands-On Exercise: Post-Processing and Analysis:
    - Participants will analyze results from their own simulations.
    - Creating visualizations and interpreting data.
  2. Q&A and Wrap-Up:
    - Addressing participant questions.
    - Summary of the day's activities and key learnings.

This workshop would be ideal for engineers and professionals looking to deepen their understanding of CFD and ANSYS tools, helping them to solve complex fluid dynamics problems more effectively.

**Mechanical Engineering Department  
CONTENTS OF WORKSHOP (DAY-3)**

**Subject:** Mastering ANSYS CFD

**Date:** 29-12-2021

**Time:** 09:00 AM to 5:00 PM

**Day 3: Solvers and Simulation Settings**

- Morning Session (3 hours):
  1. Understanding Solvers in ANSYS CFD:
    - Overview of different solvers (Pressure-Based, Density-Based).
    - Choosing the right solver for different types of problems.
  2. Setting Simulation Parameters:
    - Convergence criteria and solution controls.
    - Time-stepping methods (steady vs. unsteady simulations).
- Lunch Break (1 hour)
- Afternoon Session (2 hours):
  1. Hands-On Exercise: Solver Setup and Simulation Run:
    - Setting up a simulation using different solvers.
    - Running simulations and interpreting convergence data.
  2. Q&A and Wrap-Up:
    - Addressing participant questions.
    - Summary of the day's key points.

This workshop would be ideal for engineers and professionals looking to deepen their understanding of CFD and ANSYS tools, helping them to solve complex fluid dynamics problems more effectively.

**Mechanical Engineering Department  
CONTENTS OF WORKSHOP (DAY-5)**

**Subject:** Mastering ANSYS CFD

**Date:** 31-12-2021

**Time:** 09:00 AM to 5:00 PM

**Day 5: Advanced Topics and Real-World Applications**

- **Morning Session (3 hours):**

1. **Advanced Simulation Topics:**

- Introduction to turbulence models and their applications.
- Multiphase flow simulations and particle tracking.

2. **Real-World Case Studies:**

- Reviewing case studies and examples from industry.
- Discussion on best practices and common pitfalls.

- **Lunch Break (1 hour)**

- **Afternoon Session (2 hours):**

1. **Hands-On Exercise: Advanced Simulations:**

- Participants will set up and run advanced simulations based on provided case studies.
- Applying advanced techniques and analyzing results.

2. **Final Q&A and Wrap-Up:**

- Addressing any remaining questions.
- Summary of the entire workshop and feedback session.

This workshop would be ideal for engineers and professionals looking to deepen their understanding of CFD and ANSYS tools, helping them to solve complex fluid dynamics problems more effectively.

QUIZ QUESTIONS OF WORKSHOP**

**Subject:** Mastering ANSYS CFD

**Date:** 27/31-12-2021

**Time:** 09:00 AM to 5:00 PM

Babar Nitin N.

**Mastering ANSYS CFD Workshop Quiz**

**1. What is the primary purpose of CFD in engineering applications?**

- a) To analyze structural integrity
- ☒ b) To simulate fluid flow and heat transfer
- c) To create geometric designs
- d) To manage project workflows

**2. Which ANSYS Workbench component is used for defining and setting up simulations?**

- a) DesignModeler
- ☒ b) Fluent
- c) Mechanical
- d) Ansys Maxwell

**3. What is the advantage of using unstructured meshes over structured meshes?**

- a) Better quality of results
- ☒ b) Easier to create for complex geometries
- c) Faster simulation times
- d) More accurate boundary conditions

**4. When setting up boundary conditions in a CFD simulation, which of the following is a common boundary condition for an inlet?**

- a) Zero gradient
- ☒ b) Fixed temperature
- c) Fixed velocity
- d) Symmetry

**5. What is the primary difference between a Pressure-Based and a Density-Based solver?**

- a) Pressure-Based solvers are for compressible flows, while Density-Based are for incompressible flows.
- ☒ b) Pressure-Based solvers are for incompressible flows, while Density-Based are for compressible flows.
- c) Pressure-Based solvers handle turbulent flows, while Density-Based handle laminar flows.
- d) There is no significant difference between them.

**6. In ANSYS CFD, what does mesh refinement refer to?**

- a) Increasing the size of mesh cells to reduce simulation time
- ☒ b) Ensuring the mesh is free from errors
- c) Increasing the number of mesh cells in areas with complex geometry
- d) Simplifying the geometry to reduce mesh complexity

**7. What is a common method to check mesh quality in ANSYS?**

- a) Mesh convergence test
- b) Visual inspection of mesh density

- ☒ c) Checking element skewness and orthogonality
- ☒ d) Comparing with previous simulations

**8. Which of the following is NOT a type of post-processing tool in ANSYS CFD?**

- a) Contour plots
- b) Vector plots
- c) Streamlines
- ☒ d) Geometry creation tools

**9. What is the primary goal of setting convergence criteria in a CFD simulation?**

- a) To determine the duration of the simulation
- b) To ensure the solution accuracy is within acceptable limits
- c) To optimize the mesh size
- ☒ d) To define the boundary conditions

**10. Which of the following turbulence models is commonly used for simulating turbulent flow in CFD?**

- ☒ a) k-epsilon model
- b) Lattice Boltzmann model
- c) Direct Numerical Simulation (DNS)
- d) Finite Element Analysis (FEA)

**11. What is a typical application of multiphase flow simulations?**

- ☒ a) Analyzing stress distribution in a solid structure
- b) Simulating the behavior of fluids with varying densities
- c) Designing thermal management systems
- d) Optimizing geometric shapes for manufacturing

**12. When creating a simulation in ANSYS, which step comes immediately after importing or creating geometry?**

- a) Defining the material properties
- b) Setting boundary conditions
- ☒ c) Meshing the geometry
- d) Running the simulation

**13. In ANSYS CFD, what does the term "streamline" refer to?**

- a) A plot showing the distribution of temperature across the domain
- b) A plot representing the path followed by fluid particles
- ☒ c) A plot of pressure distribution on the surface
- d) A graphical representation of boundary conditions

**14. Why is it important to validate CFD results?**

- a) To ensure the simulation completes within a given time frame
- ☒ b) To confirm the accuracy and reliability of the simulation outputs
- c) To minimize the computational resources used
- d) To check the quality of the mesh

**15. Which solver would you choose for simulating a high-speed compressible flow?**

- a) Pressure-Based Solver
- ☒ b) Density-Based Solver
- c) Thermal Solver
- d) Structural Solver

# NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS, PUNE

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune – 412213

## Mechanical Engineering Department SUMMARY OF WORKSHOP

### Workshop Summary Report: Mastering ANSYS CFD

Date: [27-31/12/2021]

Duration: 5 Days, 6 hours per day

Objective: To provide participants with a comprehensive understanding of ANSYS Computational Fluid Dynamics (CFD), covering fundamental to advanced topics, including practical applications.

Day 1: Introduction to ANSYS CFD and Basic Setup

- Topics Covered:
  - Fundamentals of CFD and ANSYS software.
  - ANSYS Workbench interface and project setup.
  - Basic geometry creation and mesh generation.
  - Initial setup of a basic CFD simulation.
- Hands-On Exercise:
  - Creating geometry and running a basic simulation.
- Key Takeaways:
  - Understanding CFD principles and basic ANSYS operations.

Day 2: Meshing Techniques and Boundary Conditions

- Topics Covered:
  - Advanced meshing techniques and mesh quality.
  - Boundary conditions setup and material properties.
- Hands-On Exercise:
  - Generating mesh and applying boundary conditions.
- Key Takeaways:
  - Effective mesh refinement and boundary condition application.

Day 3: Solvers and Simulation Settings

- Topics Covered:
  - Overview of solvers (Pressure-Based, Density-Based).
  - Simulation parameters and convergence criteria.
- Hands-On Exercise:
  - Setting up simulations using different solvers.
- Key Takeaways:
  - Choosing and configuring solvers for various CFD problems.

Day 4: Post-Processing and Result Analysis

- Topics Covered:
  - Post-processing tools and techniques.
  - Result analysis and validation.
- Hands-On Exercise:
  - Analyzing results and creating visualizations.
- Key Takeaways:
  - Interpreting CFD results and extracting meaningful data.

Day 5: Advanced Topics and Real-World Applications

- Topics Covered:
  - Turbulence models, multiphase flow simulations, and particle tracking.
  - Industry case studies and best practices.
- Hands-On Exercise:
  - Setting up advanced simulations based on case studies.
- Key Takeaways:
  - Application of advanced CFD techniques and understanding real-world scenarios.

Overall Summary: The workshop successfully covered a wide range of CFD topics, from basic to advanced levels. Participants gained hands-on experience with ANSYS CFD software, including geometry creation, meshing, solver configuration, and result analysis. Advanced topics were addressed, and real-world applications were explored to provide practical insights. Feedback from participants was positive, highlighting the workshop's comprehensive coverage and practical relevance.

Next Steps:

- Continued practice with ANSYS CFD tools.
- Application of learned techniques to real-world problems.
- Further advanced training as needed.

10/01/2021

### Notice of Training Session

We are pleased to announce a training session for MBA first year students on **Cyber Security**, designed to enhance skills, improve understanding in Marketing Management, etc. This session will be led by **SYSAP Technologies** from **1/01/2021 to 03/02/2021 at 10 AM to 4 PM.**, attendance is mandatory.

**Place: Shri Chatrapati Shivaji Maharaj Seminar Hall**

  
Director.  
Faculty of Management (MBA & MCA)  
Navsahyadri Education Society's  
Group of Institutions  
Naigoan. Pune 412 213

## **\*CURRICULUM**

**COURSE NAME: Cyber Security**

**Offered By: SYSAP Technologies**

**DATE: 25/01/2021 to 03/02/2021**

**TIME: 10 AM to 4 PM.**

### **Day 1: Introduction to Cyber Security**

- **Morning:**
  - Overview of Cyber Security: Definition, Importance, and Goals
  - Cyber Threat Landscape: Types of Threats and Attacks
  - Key Concepts: Confidentiality, Integrity, and Availability (CIA Triad)
- **Afternoon:**
  - Historical Cyber Attacks and Their Impact
  - **Hands-on Exercise:** Explore basic cyber threats and their impacts using case studies
  - **Assignment:** Research and summarize a recent cyber attack incident

### **Day 2: Network Security Fundamentals**

- **Morning:**
  - Introduction to Network Security: Concepts and Importance
  - Network Architecture: LAN, WAN, and Internet
  - Common Network Threats: DDoS, Man-in-the-Middle, and Spoofing
- **Afternoon:**
  - **Hands-on Exercise:** Setting up basic network security configurations and firewalls
  - **Assignment:** Analyze a network diagram for potential security vulnerabilities

### **Day 3: Security Policies and Risk Management**

- **Morning:**
  - Developing and Implementing Security Policies
  - Risk Management: Identifying, Assessing, and Mitigating Risks
  - Compliance and Regulatory Requirements: GDPR, HIPAA, etc.
- **Afternoon:**

- **Hands-on Exercise:** Draft a basic security policy for an organization
- **Assignment:** Conduct a risk assessment for a hypothetical business scenario

#### Day 4: Authentication and Access Control

- **Morning:**
  - Authentication Mechanisms: Passwords, Two-Factor Authentication, Biometrics
  - Access Control Models: Discretionary Access Control (DAC), Mandatory Access Control (MAC), Role-Based Access Control (RBAC)
- **Afternoon:**
  - **Hands-on Exercise:** Implement and configure access controls in a simulated environment
  - **Assignment:** Evaluate and improve an existing authentication process

#### Day 5: Cryptography and Encryption

- **Morning:**
  - Introduction to Cryptography: Principles and Types of Encryption
  - Symmetric vs. Asymmetric Encryption
  - Common Encryption Algorithms: AES, RSA, and SHA
- **Afternoon:**
  - **Hands-on Exercise:** Encrypt and decrypt files using common cryptographic tools
  - **Assignment:** Compare and contrast different encryption methods for data protection

#### Day 6: Cyber Security Tools and Techniques

- **Morning:**
  - Overview of Cyber Security Tools: Antivirus, Firewalls, IDS/IPS
  - Network and Application Security Tools: Nmap, Wireshark, Burp Suite
- **Afternoon:**
  - **Hands-on Exercise:** Use network scanning and monitoring tools to identify vulnerabilities
  - **Assignment:** Create a report on the effectiveness of various cyber security tools

#### Day 7: Incident Response and Management

- **Morning:**

- Incident Response: Phases and Best Practices
- Developing an Incident Response Plan
- Tools and Techniques for Incident Management
- **Afternoon:**
  - **Hands-on Exercise:** Simulate a cyber incident and follow an incident response procedure
  - **Assignment:** Develop an incident response plan for a given cyber attack scenario

## Day 8: Secure Software Development

- **Morning:**
  - Introduction to Secure Software Development Practices
  - Common Software Vulnerabilities: SQL Injection, XSS, CSRF
  - Security Testing: Static and Dynamic Analysis
- **Afternoon:**
  - **Hands-on Exercise:** Conduct a basic security review of a sample application
  - **Assignment:** Identify and suggest fixes for security vulnerabilities in a given code snippet

## Day 9: Emerging Trends and Threats

- **Morning:**
  - Emerging Cyber Threats: Ransomware, Advanced Persistent Threats (APTs), IoT Security
  - Trends in Cyber Security: Artificial Intelligence, Machine Learning, and Blockchain
- **Afternoon:**
  - **Hands-on Exercise:** Research and present on a current cyber threat or emerging technology
  - **Assignment:** Analyze the impact of emerging trends on cyber security practices

## Day 10: Review and Application

- **Morning:**
  - Review of Key Concepts and Techniques Covered in the Course
  - Case Studies: Analyzing Successful and Failed Cyber Security Implementations

- **Afternoon:**
  - **Hands-on Exercise:** Develop a comprehensive cyber security plan for a hypothetical organization
  - **Final Assignment:** Present and discuss your cyber security plan with feedback from peers and instructors

*[Signature]*

**Instructions:**

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.
  1. What does the CIA Triad stand for in cyber security?
    - ☒ A) Confidentiality, Integrity, and Availability
    - ☐ B) Compliance, Investigation, and Analysis
    - ☐ C) Confidentiality, Investigation, and Access
    - ☐ D) Compliance, Integrity, and Authentication
  2. Which of the following is an example of a cyber threat?
    - ☒ A) Data backup
    - ☐ B) Firewall
    - ☐ C) Phishing
    - ☐ D) Encryption
  3. What is the purpose of a firewall in network security?
    - ☒ A) To monitor employee performance

- ☒ B) To block unauthorized access while permitting legitimate communication
- ☐ C) To manage database operations
- ☐ D) To create digital marketing campaigns

4. What does DDoS stand for?

- ☒ A) Distributed Denial of Service
- ☐ B) Direct Denial of Service
- ☒ C) Dynamic Denial of Service
- ☐ D) Distributed Data of Service

5. Which document outlines an organization's approach to managing cyber security risks?

- ☐ A) Incident Response Plan
- ☐ B) Risk Management Plan
- ☒ C) Security Policy
- ☐ D) Compliance Report

6. Which regulatory requirement focuses on protecting personal health information?

- ☐ A) GDPR
- ☒ B) HIPAA
- ☐ C) SOX
- ☐ D) PCI-DSS

7. What is Multi-Factor Authentication (MFA)?

- ☒ A) Using only a password for access
- ☒ B) A method to prevent unauthorized access using multiple forms of verification
- ☐ C) A single-step authentication process
- ☐ D) A tool for password management

8. Which access control model assigns permissions based on the roles of users?

- ☒ A) Discretionary Access Control (DAC)
- ☐ B) Mandatory Access Control (MAC)
- ☒ C) Role-Based Access Control (RBAC)
- ☐ D) Attribute-Based Access Control (ABAC)

9. What type of encryption uses the same key for both encryption and decryption?

- ☒ A) Asymmetric Encryption
- ☐ B) Symmetric Encryption
- ☐ C) Hashing
- ☐ D) Digital Signatures

10. Which encryption algorithm is commonly used for securing data at rest?

- ☒ A) RSA
- ☐ B) AES
- ☐ C) SHA-256
- ☐ D) MD5

11. Which tool is used for network scanning and vulnerability assessment?

- ☒ A) Wireshark
- ☐ B) Nmap
- ☐ C) Burp Suite
- ☐ D) Nessus

12. What does IDS stand for in network security?

- ☒ A) Intrusion Detection System
- ☐ B) Integrated Detection Service
- ☐ C) Internet Detection System
- ☐ D) Internal Defense Service

13. What is the first step in an incident response process?

- ☒ A) Containment
- ☐ B) Eradication
- ☐ C) Detection and Identification
- ☐ D) Recovery

14. Which component is essential for a successful incident response plan?

- ☒ A) Regular software updates
- ☐ B) Clear communication procedures
- ☐ C) Comprehensive marketing strategy
- ☐ D) Efficient payroll management

15. Which vulnerability is associated with improper validation of user input leading to unauthorized database access?

- ☐ A) Cross-Site Scripting (XSS)
- ☐ B) SQL Injection
- ☒ C) Cross-Site Request Forgery (CSRF)
- ☐ D) Buffer Overflow

16. What is the purpose of static code analysis in secure software development?

- ☒ A) To test software performance under load
- ☒ B) To analyze code for security vulnerabilities without executing it
- ☐ C) To assess user interface design
- ☐ D) To monitor application usage

17. What is a key concern with Internet of Things (IoT) devices in terms of cyber security?

- ☐ A) Limited physical space for devices
- ☐ B) High energy consumption
- ☒ C) Potential for security vulnerabilities due to inadequate security measures
- ☐ D) Excessive user data collection

18. Which technology is being used to enhance security through decentralized data storage and verification?

- ☒ A) Blockchain
- ☐ B) Cloud Computing
- ☐ C) Quantum Computing
- ☐ D) Virtualization

19. What should be included in a comprehensive cyber security plan?

- ☒ A) Employee satisfaction surveys
- ☒ B) Detailed security policies, risk assessments, and incident response strategies
- ☐ C) Marketing and sales strategies
- ☐ D) Financial performance metrics

20. Which of the following is a best practice for securing a network?

- ☐ A) Using the same password for all accounts
  - ☒ B) Regularly updating software and firmware
  - ☐ C) Ignoring network traffic anomalies
  - ☐ D) Disabling all firewalls
-

11. Which tool is used for network scanning and vulnerability assessment?

- ☒ A) Wireshark
- ☒ B) Nmap
- ☐ C) Burp Suite
- ☐ D) Nessus

12. What does IDS stand for in network security?

- ☒ A) Intrusion Detection System
- ☐ B) Integrated Detection Service
- ☐ C) Internet Detection System
- ☐ D) Internal Defense Service

13. What is the first step in an incident response process?

- ☒ A) Containment
- ☒ B) Eradication
- ☐ C) Detection and Identification
- ☐ D) Recovery

14. Which component is essential for a successful incident response plan?

- ☒ A) Regular software updates
- ☒ B) Clear communication procedures
- ☐ C) Comprehensive marketing strategy
- ☐ D) Efficient payroll management

✓ 15. Which vulnerability is associated with improper validation of user input leading to unauthorized database access?

- A) Cross-Site Scripting (XSS)
- ✓ ○ B) SQL Injection
- C) Cross-Site Request Forgery (CSRF)
- D) Buffer Overflow

✓ 16. What is the purpose of static code analysis in secure software development?

- A) To test software performance under load
- ✓ ○ B) To analyze code for security vulnerabilities without executing it
- C) To assess user interface design
- D) To monitor application usage

✓ 17. What is a key concern with Internet of Things (IoT) devices in terms of cyber security?

- A) Limited physical space for devices
- B) High energy consumption
- ✓ ○ C) Potential for security vulnerabilities due to inadequate security measures
- D) Excessive user data collection

✓ 18. Which technology is being used to enhance security through decentralized data storage and verification?

- ✓ ○ A) Blockchain
- B) Cloud Computing
- C) Quantum Computing
- D) Virtualization

✓ 19. What should be included in a comprehensive cyber security plan?

- A) Employee satisfaction surveys
- ✓ ○ B) Detailed security policies, risk assessments, and incident response strategies
- C) Marketing and sales strategies
- D) Financial performance metrics

20. Which of the following is a best practice for securing a network?

- ☐ A) Using the same password for all accounts
  - ☒ B) Regularly updating software and firmware
  - ☐ C) Ignoring network traffic anomalies
  - ☐ D) Disabling all firewalls
-

## Instructions:

- Each question carry one mark.
- Tick on left side of answer choices.
- All questions are compulsory.
  - What does the CIA Triad stand for in cyber security?
    - ☒ A) Confidentiality, Integrity, and Availability
    - ☐ B) Compliance, Investigation, and Analysis
    - ☐ C) Confidentiality, Investigation, and Access
    - ☐ D) Compliance, Integrity, and Authentication
  - Which of the following is an example of a cyber threat?
    - ☐ A) Data backup
    - ☐ B) Firewall
    - ☒ C) Phishing
    - ☐ D) Encryption
  - What is the purpose of a firewall in network security?
    - ☐ A) To monitor employee performance

- ☒ B) To block unauthorized access while permitting legitimate communication
- ☐ C) To manage database operations
- ☐ D) To create digital marketing campaigns

4. What does DDoS stand for?

- ☒ A) Distributed Denial of Service
- ☐ B) Direct Denial of Service
- ☐ C) Dynamic Denial of Service
- ☐ D) Distributed Data of Service

5. Which document outlines an organization's approach to managing cyber security risks?

- ☐ A) Incident Response Plan
- ☐ B) Risk Management Plan
- ☒ C) Security Policy
- ☐ D) Compliance Report

6. Which regulatory requirement focuses on protecting personal health information?

- ☐ A) GDPR
- ☒ B) HIPAA
- ☐ C) SOX
- ☐ D) PCI-DSS

7. What is Multi-Factor Authentication (MFA)?

- ☐ A) Using only a password for access
- ☒ B) A method to prevent unauthorized access using multiple forms of verification
- ☐ C) A single-step authentication process
- ☐ D) A tool for password management

8. Which access control model assigns permissions based on the roles of users?

- ☐ A) Discretionary Access Control (DAC)
- ☐ B) Mandatory Access Control (MAC)
- ☒ C) Role-Based Access Control (RBAC)
- ☐ D) Attribute-Based Access Control (ABAC)

9. What type of encryption uses the same key for both encryption and decryption?

- ☐ A) Asymmetric Encryption
- ☒ B) Symmetric Encryption
- ☐ C) Hashing
- ☐ D) Digital Signatures

10. Which encryption algorithm is commonly used for securing data at rest?

- ☐ A) RSA
- ☒ B) AES
- ☐ C) SHA-256
- ☐ D) MD5

11. Which tool is used for network scanning and vulnerability assessment?

- ☐ A) Wireshark
- ☒ B) Nmap
- ☐ C) Burp Suite
- ☐ D) Nessus

12. What does IDS stand for in network security?

- ☒ A) Intrusion Detection System
- ☐ B) Integrated Detection Service
- ☐ C) Internet Detection System
- ☐ D) Internal Defense Service

13. What is the first step in an incident response process?

- ☒ A) Containment
- ☐ B) Eradication
- ☐ C) Detection and Identification
- ☐ D) Recovery

14. Which component is essential for a successful incident response plan?

- ☐ A) Regular software updates
- ☒ B) Clear communication procedures
- ☐ C) Comprehensive marketing strategy
- ☐ D) Efficient payroll management

✓ 15. Which vulnerability is associated with improper validation of user input leading to unauthorized database access?

- A) Cross-Site Scripting (XSS)
- ✓ ○ B) SQL Injection
- C) Cross-Site Request Forgery (CSRF)
- D) Buffer Overflow

✓ 16. What is the purpose of static code analysis in secure software development?

- A) To test software performance under load
- ✓ ○ B) To analyze code for security vulnerabilities without executing it
- C) To assess user interface design
- D) To monitor application usage

✓ 17. What is a key concern with Internet of Things (IoT) devices in terms of cyber security?

- A) Limited physical space for devices
- B) High energy consumption
- C) Potential for security vulnerabilities due to inadequate security measures
- ✓ ○ D) Excessive user data collection

✓ 18. Which technology is being used to enhance security through decentralized data storage and verification?

- A) Blockchain
- B) Cloud Computing
- ✓ ○ C) Quantum Computing
- D) Virtualization

✓ 19. What should be included in a comprehensive cyber security plan?

- A) Employee satisfaction surveys
- B) Detailed security policies, risk assessments, and incident response strategies
- ✓ ○ C) Marketing and sales strategies
- D) Financial performance metrics

✓ 20. Which of the following is a best practice for securing a network?

### Report: 10-Day Course on Cyber Security

**Course Dates:** January 25, 2021 – February 3, 2021

**Duration:** 50 Hours (10:00 AM – 04:00 PM)

**Conducted By:** SYSAP Technologies

**Overview:** The 10-day Cyber Security course, conducted by SYSAP Technologies, took place from January 25, 2021, to February 3, 2021. The program, totalling 50 hours, was designed to equip participants with essential knowledge and practical skills to effectively safeguard information systems and manage cyber security threats.

### Objectives:

- To introduce participants to fundamental concepts and practices in cyber security.
- To develop practical skills in identifying, preventing, and responding to cyber threats.
- To enhance participants' ability to implement effective security measures and protocols.

### Notice of Training Session

We are pleased to announce a training session for MBA first year students on **Leadership and management skill**, designed to enhance skills, improve understanding in Marketing Management, etc. This session will be led by **ManpowerGroup Services India Pvt. Ltd.** from **17/01/2021 to 26/01/2021** at **10 AM to 4 PM.**, attendance is mandatory.

**Place: Shri Chatrapati Shivaji Maharaj Seminar Hall**

  
Director.  
Faculty of Management (MBA & MCA)  
Navsahyadri Education Society's  
Group of Institutions  
Naigoan, Pune 412 213

- **CURRICULUM**

**COURSE NAME: Leadership and Management**

**Offered By: Gryphon Technologies**

**DATE: 17/01/2021 to 26/01/2021**

**TIME: 10 AM to 4 PM.**

**Leadership and Management Skills: 10-Day Course Syllabus**

**Day 1: Introduction to Leadership and Management**

- **Morning:**
  - Overview of Leadership vs. Management: Definitions and Key Differences
  - The Role of a Leader vs. a Manager
  - The Importance of Leadership and Management Skills in Organizational Success
- **Afternoon:**
  - Leadership Theories: Transformational, Transactional, Servant Leadership
  - **Hands-on Exercise:** Self-assessment of leadership and management styles
  - **Assignment:** Write a reflective essay on your current leadership and management approach

**Day 2: Effective Communication Skills**

- **Morning:**
  - Principles of Effective Communication: Verbal and Non-verbal
  - Active Listening Techniques
  - Communicating with Different Personality Types
- **Afternoon:**
  - **Hands-on Exercise:** Role-playing various communication scenarios
  - **Assignment:** Develop a communication plan for a team project

**Day 3: Team Building and Motivation**

- **Morning:**
  - Team Dynamics: Building High-Performing Teams
  - Theories of Motivation: Maslow's Hierarchy of Needs, Herzberg's Two-Factor Theory
  - Strategies for Motivating and Engaging Teams

- **Afternoon:**
  - **Hands-on Exercise:** Team-building activities and exercises
  - **Assignment:** Create a motivation and engagement plan for a hypothetical team

#### **Day 4: Conflict Resolution and Negotiation**

- **Morning:**
  - Understanding Conflict: Types and Sources
  - Conflict Resolution Strategies: Mediation, Arbitration, and Negotiation
  - Techniques for Effective Negotiation
- **Afternoon:**
  - **Hands-on Exercise:** Simulated conflict resolution and negotiation scenarios
  - **Assignment:** Develop a conflict resolution strategy for a case study

#### **Day 5: Strategic Planning and Decision-Making**

- **Morning:**
  - Strategic Planning: Vision, Mission, and Goals
  - Decision-Making Models: Rational, Bounded Rationality, Intuitive
  - Tools and Techniques for Effective Decision-Making
- **Afternoon:**
  - **Hands-on Exercise:** Develop a strategic plan for a hypothetical organization
  - **Assignment:** Use a decision-making model to solve a business case study

#### **Day 6: Change Management**

- **Morning:**
  - Understanding Change Management: Theories and Models (e.g., Kotter's 8-Step Change Model)
  - Leading Change: Overcoming Resistance and Ensuring Buy-In
  - Communicating Change Effectively
- **Afternoon:**
  - **Hands-on Exercise:** Plan and present a change management strategy for a fictional scenario
  - **Assignment:** Write a change management plan addressing potential challenges

#### **Day 7: Performance Management and Coaching**

- **Morning:**
  - Performance Management: Setting Goals, Monitoring Progress, and Providing Feedback
  - Coaching Techniques: Developing Talent and Enhancing Performance
  - Conducting Effective Performance Reviews
- **Afternoon:**
  - **Hands-on Exercise:** Role-play performance review and coaching sessions
  - **Assignment:** Create a performance management and coaching plan for a team member

### **Day 8: Leadership Styles and Personal Development**

- **Morning:**
  - Exploring Different Leadership Styles: Autocratic, Democratic, Laissez-Faire
  - Self-Awareness and Emotional Intelligence in Leadership
  - Personal Development Plans for Leadership Growth
- **Afternoon:**
  - **Hands-on Exercise:** Assess your leadership style and create a personal development plan
  - **Assignment:** Develop a plan for improving your leadership skills based on feedback

### **Day 9: Ethics and Corporate Social Responsibility (CSR)**

- **Morning:**
  - Understanding Business Ethics: Principles and Practices
  - Corporate Social Responsibility: Importance and Implementation
  - Case Studies on Ethical Dilemmas and CSR Initiatives
- **Afternoon:**
  - **Hands-on Exercise:** Analyze ethical case studies and CSR strategies
  - **Assignment:** Develop an ethical framework and CSR plan for a hypothetical organization

### **Day 10: Integration and Application**

- **Morning:**
  - Integrating Leadership and Management Skills: Creating a Cohesive
  - Reviewing Key Concepts and Best Practices

- **Hands-on Exercise:** Develop a comprehensive leadership and management strategy for a hypothetical organization
  - **Afternoon:**
    - **Final Presentation:** Present your leadership and management strategy and receive feedback from peers and instructors
    - **Review and Wrap-Up:** Reflection on learning outcomes and next steps for personal development
-

Amruta K.

1. What is the primary difference between leadership and management?

- ☐ A) Leadership focuses on maintaining systems, while management focuses on changing systems.
- ☒ B) Leadership focuses on vision and inspiration, while management focuses on processes and organization.
- ☐ C) Leadership is about enforcing rules, while management is about inspiring teams.
- ☐ D) Leadership involves planning, while management involves execution.

2. Which leadership theory emphasizes the importance of leaders who inspire and motivate their followers to achieve extraordinary outcomes?

- ☐ A) Transactional Leadership
- ☒ B) Transformational Leadership
- ☐ C) Servant Leadership
- ☐ D) Autocratic Leadership

3. What is the primary goal of active listening?

- ☐ A) To provide feedback immediately
- ☒ B) To understand the speaker's message and respond appropriately
- ☐ C) To give advice based on assumptions
- ☐ D) To complete the conversation quickly

4. Which communication style is characterized by expressing thoughts and feelings openly and honestly while respecting others?

- ☐ A) Passive
- ☐ B) Aggressive
- ☒ C) Assertive
- ☐ D) Avoidant

5. According to Maslow's Hierarchy of Needs, which need must be satisfied before individuals can focus on self-actualization?

- ☐ A) Physiological Needs
- ☐ B) Safety Needs
- ☐ C) Social Needs
- ☒ D) Esteem Needs

6. What is a key characteristic of a high-performing team?

- ☐ A) Members work independently without collaboration
- ☒ B) Clear goals, open communication, and mutual support
- ☐ C) Frequent conflicts and lack of direction
- ☐ D) Avoidance of conflict and lack of accountability

7. Which conflict resolution strategy involves finding a solution that partially satisfies both parties?

- ☐ A) Competing
- ☐ B) Collaborating
- ☐ C) Avoiding
- ☒ D) Compromising

8. What is the primary purpose of negotiation in conflict resolution?

- ☐ A) To win the argument
- ☒ B) To reach a mutually acceptable agreement
- ☐ C) To avoid the issue
- ☐ D) To assert authority

9. Which decision-making model involves gathering all possible information and analyzing it before making a choice?

- ☐ A) Intuitive Model
- ☒ B) Rational Model
- ☐ C) Bounded Rationality Model
- ☐ D) Incremental Model

10. What is a key component of a strategic plan?

- ☐ A) Daily operational tasks

- ☒ B) Long-term vision and goals
- ☐ C) Routine administrative functions
- ☐ D) Short-term financial reports

11. Which model of change management includes the steps: Unfreeze, Change, Refreeze?

- ☐ A) Kotter's 8-Step Model
- ☒ B) Lewin's Change Model
- ☐ C) ADKAR Model
- ☐ D) Bridges' Transition Model

12. What is a common reason for resistance to change in organizations?

- ☐ A) Lack of training opportunities
- ☐ B) Excessive communication about the change
- ☒ C) Unclear reasons for the change and lack of involvement
- ☐ D) Effective change management processes

13. What is the primary purpose of performance management?

- ☐ A) To evaluate employee performance for promotions
- ☒ B) To ensure employees meet organizational goals and improve performance
- ☐ C) To conduct annual reviews only
- ☐ D) To enforce disciplinary actions

14. Which approach involves helping employees develop their skills and achieve their career goals?

- ☐ A) Performance Appraisal
- ☒ B) Coaching
- ☐ C) Disciplinary Action
- ☐ D) Termination

15. Which leadership style involves making decisions unilaterally and expecting followers to comply without input?

- ☐ A) Democratic Leadership
- ☐ B) Laissez-Faire Leadership
- ☒ C) Autocratic Leadership
- ☐ D) Transformational Leadership

16. What is a key aspect of personal development in leadership?

- ☒ A) Avoiding feedback from others
- ☐ B) Continuously improving self-awareness and skills
- ☐ C) Maintaining a fixed set of skills
- ☐ D) Focusing only on technical abilities

17. What is Corporate Social Responsibility (CSR)?

- A) An organization's commitment to reducing its costs
- B) The ethical obligation of a company to contribute positively to society
- C) A method for increasing profit margins
- ~~D) A strategy for internal employee management~~

 18. Which of the following is an example of an ethical dilemma?

- A) Deciding on a new product feature
- B) Choosing between meeting production deadlines and ensuring employee safety
- C) Selecting a marketing strategy
- ~~D) Implementing a new IT system~~

 19. What is an effective way to integrate leadership and management skills in a strategic plan?

- A) Separating leadership and management tasks into distinct functions
- B) Focusing exclusively on either leadership or management
- C) Combining vision-setting with practical execution strategies
- ~~D) Ignoring leadership aspects in favor of management tasks~~

 20. Which of the following is NOT typically included in a leadership and management strategy plan?

- A) Vision and mission statements
- B) Personal hobbies and interests
- C) ~~Goals and objectives~~
- ~~D) Performance metrics and evaluation criteria~~

1. What is the primary difference between leadership and management?
  - ☐ A) Leadership focuses on maintaining systems, while management focuses on changing systems.
  - ☒ B) Leadership focuses on vision and inspiration, while management focuses on processes and organization.
  - ☐ C) Leadership is about enforcing rules, while management is about inspiring teams.
  - ☐ D) Leadership involves planning, while management involves execution.
2. Which leadership theory emphasizes the importance of leaders who inspire and motivate their followers to achieve extraordinary outcomes?
  - ☐ A) Transactional Leadership
  - ☒ B) Transformational Leadership
  - ☐ C) Servant Leadership
  - ☐ D) Autocratic Leadership
3. What is the primary goal of active listening?
  - ☐ A) To provide feedback immediately
  - ☒ B) To understand the speaker's message and respond appropriately
  - ☐ C) To give advice based on assumptions
  - ☐ D) To complete the conversation quickly

- ✓ 4. Which communication style is characterized by expressing thoughts and feelings openly and honestly while respecting others?
- A) Passive
  - B) Aggressive
  - ✓ ○ C) Assertive
  - D) Avoidant
- ✓ 5. According to Maslow's Hierarchy of Needs, which need must be satisfied before individuals can focus on self-actualization?
- A) Physiological Needs
  - B) Safety Needs
  - C) Social Needs
  - ✓ ○ D) Esteem Needs
- ✓ 6. What is a key characteristic of a high-performing team?
- A) Members work independently without collaboration
  - ✓ ○ B) Clear goals, open communication, and mutual support
  - C) Frequent conflicts and lack of direction
  - D) Avoidance of conflict and lack of accountability
- ✓ 7. Which conflict resolution strategy involves finding a solution that partially satisfies both parties?
- A) Competing
  - B) Collaborating
  - C) Avoiding
  - ✓ ○ D) Compromising
- ✓ 8. What is the primary purpose of negotiation in conflict resolution?
- A) To win the argument
  - ✓ ○ B) To reach a mutually acceptable agreement
  - C) To avoid the issue
  - D) To assert authority
- ✓ 9. Which decision-making model involves gathering all possible information and analyzing it before making a choice?
- A) Intuitive Model
  - ✓ ○ B) Rational Model
  - C) Bounded Rationality Model
  - D) Incremental Model
- ✓ 10. What is a key component of a strategic plan?
- A) Daily operational tasks

- ☒ B) Long-term vision and goals
- ☐ C) Routine administrative functions
- ☐ D) Short-term financial reports

✓ 11. Which model of change management includes the steps: Unfreeze, Change, Refreeze?

- ☐ A) Kotter's 8-Step Model
- ☒ B) Lewin's Change Model
- ☐ C) ADKAR Model
- ☐ D) Bridges' Transition Model

✗ 12. What is a common reason for resistance to change in organizations?

- ☐ A) Lack of training opportunities
- ☒ B) Excessive communication about the change
- ☐ C) Unclear reasons for the change and lack of involvement
- ☐ D) Effective change management processes

✗ 13. What is the primary purpose of performance management?

- ☐ A) To evaluate employee performance for promotions
- ☐ B) To ensure employees meet organizational goals and improve performance
- ☒ C) To conduct annual reviews only
- ☐ D) To enforce disciplinary actions

✗ 14. Which approach involves helping employees develop their skills and achieve their career goals?

- ☒ A) Performance Appraisal
- ☐ B) Coaching
- ☐ C) Disciplinary Action
- ☐ D) Termination

✓ 15. Which leadership style involves making decisions unilaterally and expecting followers to comply without input?

- ☐ A) Democratic Leadership
- ☒ B) Laissez-Faire Leadership
- ☐ C) Autocratic Leadership
- ☐ D) Transformational Leadership

✗ 16. What is a key aspect of personal development in leadership?

- ☒ A) Avoiding feedback from others
- ☐ B) Continuously improving self-awareness and skills
- ☐ C) Maintaining a fixed set of skills
- ☐ D) Focusing only on technical abilities

✗ 17. What is Corporate Social Responsibility (CSR)?

- ☐ A) An organization's commitment to reducing its costs
- ☐ B) The ethical obligation of a company to contribute positively to society
- ☐ C) A method for increasing profit margins
- ☒ D) A strategy for internal employee management

**18. Which of the following is an example of an ethical dilemma?**

- ☐ A) Deciding on a new product feature
- ☐ B) Choosing between meeting production deadlines and ensuring employee safety
- ☐ C) Selecting a marketing strategy
- ☒ D) Implementing a new IT system

**19. What is an effective way to integrate leadership and management skills in a strategic plan?**

- ☐ A) Separating leadership and management tasks into distinct functions
- ☒ B) Focusing exclusively on either leadership or management
- ☐ C) Combining vision-setting with practical execution strategies
- ☐ D) Ignoring leadership aspects in favor of management tasks

**20. Which of the following is NOT typically included in a leadership and management strategy plan?**

- ☐ A) Vision and mission statements
- ☐ B) Personal hobbies and interests
- ☐ C) Goals and objectives
- ☒ D) Performance metrics and evaluation criteria

## Report: 10-Day Leadership and Management Skills Course

**Course Dates:** January 17, 2021 – January 26, 2021

**Duration: 50 Hours** (10:00 AM – 04:00 PM)

**Conducted By:** ManpowerGroup Services Pvt. Ltd

**Overview:** The 10-day Leadership and Management Skills course, organized by Gryphon Technologies, was conducted January 17, 2021 to January 26, 2021. This intensive program spanned 50 hours, with daily sessions running from 10:00 AM to 04:00 PM. The course aimed to enhance participants' leadership abilities and management skills through a structured and interactive learning approach.

### Objectives:

- Develop advanced leadership and management skills.
- Improve strategic thinking, decision-making, and problem-solving abilities.
- Enhance team management and communication techniques.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

Date: 15-02-2021

**Notice: Workshop on Stress Management**

This is to inform all first-year engineering students that a workshop on "Stress Management" will be conducted from **22nd February 2021 to 26th February 2021**. The workshop aims to help students learn effective techniques to manage stress and enhance their well-being.

**Workshop Details:**

**Dates:** 22nd February 2021 to 26th February 2021

**Time:** 09:00 AM to 5:00 PM

**Venue:** Dr. A. P. J Abdul Kalam Hall

All first-year students are encouraged to attend this workshop to gain valuable insights into managing stress effectively. Attendance is highly recommended.

  
**Workshop Coordinator**  
**Prof. S. S. Raut**

### **First Year Engineering Department**

**Value Added Program Topic:** Stress Management  
**Organizer:** Manashakti Research Centre  
**Date:** 22-02-2021 to 26-02-2021

**Academic Year:** 2020-2021  
**Total Program Duration:** 30 Hours

### **Detail "Stress Management" Five Day Program Content**

#### **Day 1: Introduction to Stress and Its Impact**

##### ***Understanding Stress***

Definition of Stress: Eustress vs. Distress  
Common stressors for students (academic, social, and personal)  
The science of stress: The brain's response to stress (fight or flight)  
Activity: Group discussion on personal stressors

##### ***Effects of Stress on Health and Well-being***

Physical, mental, and emotional effects of chronic stress  
Impact of stress on academic performance and relationships  
Short-term vs. long-term stress effects  
Activity: Case study on how unmanaged stress impacts different areas of life

##### ***Identifying Personal Stress Triggers***

Self-reflection: Identifying personal stress triggers and signs of stress  
How to recognize stress symptoms early  
Activity: Personal stress diary setup

---

#### **Day 2: Coping Mechanisms and Techniques**

##### ***Coping Strategies for Stress***

Introduction to problem-focused and emotion-focused coping mechanisms  
Healthy vs. unhealthy coping strategies  
Activity: Brainstorming session on coping mechanisms students currently use

##### ***Time Management and Prioritization***

Role of time management in reducing stress  
Prioritization and avoiding procrastination  
Activity: Time management exercise (creating an effective daily routine)

##### ***Relaxation Techniques***

Breathing exercises, meditation, and mindfulness techniques

Progressive muscle relaxation (PMR) and guided imagery  
Activity: Guided meditation and relaxation practice

---

### **Day 3: Building Emotional Resilience**

#### ***Emotional Intelligence***

Understanding emotions and their role in stress

Building emotional resilience through emotional intelligence (EQ)

Activity: Self-assessment of emotional intelligence

#### ***Positive Thinking and Cognitive Restructuring***

Importance of positive thinking in stress management

Cognitive restructuring: Challenging negative thoughts

Activity: Reframing negative thoughts into positive ones

#### ***Developing Healthy Habits***

Importance of nutrition, sleep, and physical activity in stress reduction

Setting SMART goals for healthy living

Activity: Creating a personal healthy habits plan

---

### **Day 4: Communication and Interpersonal Skills**

#### ***Assertiveness Training***

How assertiveness can reduce interpersonal stress

Techniques for assertive communication

Activity: Role-playing assertive vs. passive/aggressive communication

#### ***Conflict Resolution Skills***

Identifying common sources of interpersonal conflict

Techniques for managing conflict in healthy ways

Activity: Group conflict resolution exercises

#### ***Building a Support System***

Importance of social support in stress management

Strategies for building and maintaining strong support networks

Activity: Group discussion on how to seek and offer support

---

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**Day 5: Long-term Stress Management Strategies**

***Creating a Stress Management Plan***

Developing a personalized long-term stress management plan

Activity: Students create and share their stress management plans

***Building Resilience for the Future***

Adapting to future challenges and changes

Cultivating a growth mindset for long-term well-being

Activity: Discussion on strategies for dealing with future academic or career stress

***Mindfulness for Everyday Life***

Practicing mindfulness in daily routines

Activity: Guided outdoor mindfulness walk or meditation

***Workshop Conclusion and Takeaways***

Recap of key learning points

Quiz and Q&A session

Certificate Distribution and Final Reflections

**QUIZ QUESTIONS**

**Instructions:**

**Quiz Title:** Stress Management, Assessment

**Total Questions:** 15

**Type of Questions:** Multiple Choice Questions (MCQs)

**Maximum Marks per Question:** 1 Mark

**Duration:** 30 minutes

**Total Marks:** 15

**Negative Marking:** None

**Q1. What is the difference between eustress and distress?**

- ☒ a) Eustress is positive stress, while distress is negative stress.
- ☐ b) Distress is temporary, but eustress is permanent.
- ☐ c) Eustress causes harm, while distress improves performance.
- ☐ d) Both are negative forms of stress

**Q2. What is the term used for the brain's immediate reaction to stress?**

- ☒ a) Relaxation response
- ☒ b) Fight-or-flight response
- ☐ c) Cognitive restructuring
- ☐ d) Mindfulness response

**Q3. Which of the following is NOT a physical effect of chronic stress?**

- ☒ a) Increased heart rate
- ☒ b) Muscle tension
- ☒ c) Improved digestion
- ☐ d) High blood pressure

**Q4. What is an early sign that you might be experiencing stress?**

- ☒ a) Feeling overly relaxed
- ☒ b) Increased concentration
- ☒ c) Irritability and mood swings
- ☐ d) Increased energy levels

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune 412213

**Q5. Which of these is an example of a problem-focused coping strategy?**

- a) Ignoring the issue
- b) Procrastinating on tasks
- ☒ c) Taking specific actions to solve the problem
- d) Complaining to others about stress

**Q6. Why is time management important for reducing stress?**

- ☒ a) It allows you to avoid all stressful situations.
- b) It helps prioritize tasks and avoid procrastination.
- c) It encourages you to take on more work.
- d) It makes multitasking easier.

**Q7. Which of the following techniques is best for immediate relaxation?**

- ☒ a) Progressive muscle relaxation (PMR)
- b) Stress diary
- c) Time management
- d) Cognitive restructuring

**Q8. Emotional resilience refers to:**

- ☒ a) The ability to avoid stressful situations.
- b) The skill of blocking all emotions.
- ☒ c) The capacity to recover from emotional challenges.
- d) The practice of suppressing negative thoughts.

**Q9. What is cognitive restructuring?**

- ☒ a) Suppressing negative thoughts
- ☒ b) Replacing negative thoughts with positive, realistic ones
- c) Ignoring your emotions
- d) Prioritizing tasks based on importance

**Q10. Which of the following is a healthy habit that helps in stress reduction?**

- ☒ a) Staying up late to finish assignments
- b) Skipping meals to save time
- ☒ c) Regular physical exercise
- d) Constantly working without breaks

**Q11. What is the role of assertiveness in stress management?**

- ☒ a) It allows you to avoid conflicts.
- ☒ b) It helps you express your needs without being aggressive.
- c) It increases your tolerance for stress.
- d) It encourages you to be aggressive in communication.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS**  
**FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

**Q12. Why is building a social support network important for stress management?**

- a) It prevents stress from happening.
- b) It allows you to isolate yourself when stressed.
- c) It provides emotional and practical support in times of stress.
- d) It helps avoid all stressful situations.

**Q13. Which of these techniques is most effective for resolving interpersonal conflicts?**

- a) Ignoring the other person
- b) Assertive communication
- c) Reacting emotionally
- d) Avoiding the issue entirely

**Q14. What is the main goal of a personalized stress management plan?**

- a) To eliminate all stress from your life
- b) To manage and cope with stress effectively
- c) To increase the amount of stress
- d) To avoid all challenging situations

**Q15. Which of these is a benefit of mindfulness practice?**

- a) It stops stressful events from happening.
- b) It helps you live in the present moment and reduce stress.
- c) It increases your stress response.
- d) It allows you to ignore your emotions.

**QUIZ QUESTIONS**

**Instructions:**

**Quiz Title:** Stress Management, Assessment

**Total Questions:** 15

**Type of Questions:** Multiple Choice Questions (MCQs)

**Maximum Marks per Question:** 1 Mark

**Duration:** 30 minutes

**Total Marks:** 15

**Negative Marking:** None

11/15

**Q1. What is the difference between eustress and distress?**

- ☒ a) Eustress is positive stress, while distress is negative stress.
- ☐ b) Distress is temporary, but eustress is permanent.
- ☐ c) Eustress causes harm, while distress improves performance.
- ☐ d) Both are negative forms of stress

**Q2. What is the term used for the brain's immediate reaction to stress?**

- ☐ a) Relaxation response
- ☐ b) Fight-or-flight response
- ☒ c) Cognitive restructuring
- ☐ d) Mindfulness response

**Q3. Which of the following is NOT a physical effect of chronic stress?**

- ☒ a) Increased heart rate
- ☐ b) Muscle tension
- ☒ c) Improved digestion
- ☐ d) High blood pressure

**Q4. What is an early sign that you might be experiencing stress?**

- ☒ a) Feeling overly relaxed
- ☐ b) Increased concentration
- ☒ c) Irritability and mood swings
- ☐ d) Increased energy levels

**Q5. Which of these is an example of a problem-focused coping strategy?**

- a) Ignoring the issue
- b) Procrastinating on tasks
- c) Taking specific actions to solve the problem
- d) Complaining to others about stress

**Q6. Why is time management important for reducing stress?**

- a) It allows you to avoid all stressful situations.
- b) It helps prioritize tasks and avoid procrastination.
- c) It encourages you to take on more work.
- d) It makes multitasking easier.

**Q7. Which of the following techniques is best for immediate relaxation?**

- a) Progressive muscle relaxation (PMR)
- b) Stress diary
- c) Time management
- d) Cognitive restructuring

**Q8. Emotional resilience refers to:**

- a) The ability to avoid stressful situations.
- b) The skill of blocking all emotions.
- c) The capacity to recover from emotional challenges.
- d) The practice of suppressing negative thoughts.

**Q9. What is cognitive restructuring?**

- a) Suppressing negative thoughts
- b) Replacing negative thoughts with positive, realistic ones
- c) Ignoring your emotions
- d) Prioritizing tasks based on importance

**Q10. Which of the following is a healthy habit that helps in stress reduction?**

- a) Staying up late to finish assignments
- b) Skipping meals to save time
- c) Regular physical exercise
- d) Constantly working without breaks

**Q11. What is the role of assertiveness in stress management?**

- a) It allows you to avoid conflicts.
- b) It helps you express your needs without being aggressive.
- c) It increases your tolerance for stress.
- d) It encourages you to be aggressive in communication.

**QUIZ ANSWER KEY**

**Q1. What is the difference between eustress and distress?**

*Answer: a) Eustress is positive stress, while distress is negative stress.*

**Q2. What is the term used for the brain's immediate reaction to stress?**

*Answer: b) Fight-or-flight response*

**Q3. Which of the following is NOT a physical effect of chronic stress?**

*Answer: c) Improved digestion*

**Q4. What is an early sign that you might be experiencing stress?**

*Answer: c) Irritability and mood swings*

**Q5. Which of these is an example of a problem-focused coping strategy?**

*Answer: c) Taking specific actions to solve the problem*

**Q6. Why is time management important for reducing stress?**

*Answer: b) It helps prioritize tasks and avoid procrastination.*

**Q7. Which of the following techniques is best for immediate relaxation?**

*Answer: a) Progressive muscle relaxation (PMR)*

**Q8. Emotional resilience refers to:**

*Answer: c) The capacity to recover from emotional challenges.*

**Q9. What is cognitive restructuring?**

*Answer: b) Replacing negative thoughts with positive, realistic ones*

**Q10. Which of the following is a healthy habit that helps in stress reduction?**

*Answer: c) Regular physical exercise*

**Q11. What is the role of assertiveness in stress management?**

*Answer: b) It helps you express your needs without being aggressive.*

**Date:** 22-02-2021 to 26-02-2021

**Academic Year:** 2020-2021  
**Total Program Duration:** 30 Hours

**Activity Report**

**Day 1: Introduction to Stress and Its Impact**

*Objective:* Introduce students to the concept of stress, its effects, and identify personal stress triggers.

*Outcomes:* Students gained a foundational understanding of stress, identified their personal stress triggers, and began documenting their stress experiences.

**Day 2: Coping Mechanisms and Techniques**

*Objective:* Equip students with effective coping strategies and relaxation techniques.

*Outcomes:* Students learned various coping strategies, developed time management skills, and practiced relaxation techniques.

**Day 3: Building Emotional Resilience**

*Objective:* Develop students' emotional resilience through understanding and applying emotional intelligence and positive thinking.

*Outcomes:* Students developed greater emotional resilience and created actionable plans for healthy living.

**Day 4: Communication and Interpersonal Skills**

*Objective:* Enhance students' communication and interpersonal skills to manage stress effectively.

*Outcomes:* Students improved their assertiveness, conflict resolution skills, and understanding of building a support system.

**Day 5: Long-term Stress Management Strategies**

*Objective:* Develop a personalized long-term stress management plan and practice mindfulness.

*Outcomes:* Students developed personalized stress management plans, learned strategies for future resilience, and practiced mindfulness.

**Overall Outcomes:**

Increased understanding of stress and its impacts.

Practical skills in coping, relaxation, emotional resilience, and communication.

**NAVSAHYADRI EDUCATION SOCIETY'S GROUP OF INSTITUTIONS  
FACULTY OF ENGINEERING**

Sr No. 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune 412213

Creation of personalized stress management strategies.

Enhanced ability to manage stress through mindfulness and support systems.

**Feedback:** The workshop was well-received, with positive feedback on the practical applicability of the techniques and activities. Students reported improved understanding and management of their stress.

## NOTICE OF WORKSHOP

Date 9/9/2020

**Subject:** Workshop on Solar Power EV Charging Station

**Date:** 14-09-2020 to 18-09-2020

**Time:** 09:00 AM to 5:00 PM

Dear Students,

We are pleased to announce a workshop focused on the integration of solar power with electric vehicle (EV) charging stations. This workshop aims to provide valuable insights into sustainable energy solutions and their application in EV infrastructure.

### Workshop Details:

- **Topic:** Solar Power EV Charging Stations
- **Objective:** To explore the benefits, technology, and implementation strategies for solar-powered EV charging solutions.
- **Key Highlights:**
  - Overview of solar power and its benefits for EV charging
  - Technical aspects of integrating solar panels with EV charging stations
  - Case studies and best practices
  - Regulatory and financial considerations
  - Hands-on demonstrations and Q&A session

**Contact Information:** For further details or inquiries, please contact Prof. A. S. Kale 9921659594

We look forward to your participation.

### Course Contents and delivery plan

Speaker: Mr. Manik Kumar Mandal

Date	Session	No. of Hours	Topics
14/09/2020	Topic 1: Fundamentals of Solar Power	2 Hours	1. Basics of solar energy 2. How solar panels work 3. Types of solar panels and their efficiencies
	Topic 2: Introduction to Electric Vehicles (EVs)	1.5 Hours	1. Types of electric vehicles (BEV, PHEV, HEV) 2. Overview of EV charging standards and connectors
	Topic 3: Solar Power Systems for EV Charging	1.5 Hours	1. Integration of solar power with EV charging 2. Key components of a solar-powered EV charging station
	Topic 4: Site Assessment and Planning (1 hour)	1 Hour	1. Site evaluation for solar installations 2. Determining solar panel placement and orientation
15/09/2020	Topic 5: Solar Power System Design	2 Hours	1. Designing a solar array for EV charging 2. Calculating energy requirements and panel specifications
	Topic 6: EV Charging Station Design	2 Hours	1. Selecting appropriate charging equipment 2. Designing for different charging speeds (Level 1, Level 2, DC fast charging)
	Topic 7: Inverters and Energy Storage	1.5 Hours	1. Integration of solar power with EV charging 2. Key components of a solar-powered EV charging station
	Topic 8: Safety and Compliance	1 Hour	1. Safety standards for solar installations and EV charging 2. Regulatory requirements and certifications
16/09/2020	Topic 9: Hands-On Solar Panel Installation	2 Hours	1. Mounting solar panels 2. Wiring and connecting panels
	Topic 10: EV Charging Station	2 Hours	1. Installing charging stations

	Setup		2.Connecting charging equipment
	Topic 11: System Integration and Testing	1.5 Hours	1. Integration of solar power with EV charging 2. Key components of a solar-powered EV charging station
	Topic 12: Data Monitoring and Management	1.Hour	1. Using monitoring tools 2. Analyzing performance data
17/09/2020	Topic 13: Advanced Solar Technologies	1.5 Hours	1. Innovations in solar technology (e.g., bifacial panels, PV concentrators) 2. Future trends and their impact on EV charging
	Topic 14: Integration with Smart Grids	1.5 Hours	1. Role of solar EV charging stations in smart grids 2. Benefits of grid integration and V2G (Vehicle-to-Grid) technology
	Topic 15: Case Studies and Best Practices	1.5 .Hours	1. Analysis of successful solar EV charging station projects 2. Lessons learned and best practices
	Topic 16: Group Discussion and Q&A	1.5 Hours	1. Open discussion on challenges and opportunities 2. Q&A with experts
	Topic 17: Group Project Work	3 Hours	1.Participants work in groups to design a solar-powered EV charging station 2.Presentations of group projects and peer review
18/09/2020	Topic 18: Detailed Review and Feedback	1.5 Hours	1.Review of group projects 2.Expert feedback and recommendations
	Topic 19: Implementation Strategies and Business Models	1.5 Hours	1.Strategies for implementing solar EV charging stations 2.Business models and financial considerations
	Topic 20: Final Q&A and Certification	1.Hour	1.Final questions and discussion 2.Awarding of certificates and closing remarks

"Solar Power EV Charging Station" Course Assessment Test

14/20

Duration: 1 Hour

Total Marks: 20

Student Name: Bhore Mahadev Anil

Date: 18/9/2020

1. What device converts sunlight directly into electricity in a solar power system? ✓

- A) Inverter
- B) Battery
- ✓ C) Photovoltaic (PV) panel
- D) Transformer

2. Which device is used to convert the direct current (DC) electricity generated by solar panels into alternating current (AC) electricity? X

- A) Battery
- B) Charge controller
- C) Inverter
- ✓ D) Transformer

3. What is the typical voltage output of a standard residential solar panel? ✓

- A) 1-2 volts
- ✓ B) 12-18 volts
- C) 24-48 volts
- D) 110-240 volts

4. What is the primary purpose of a solar charge controller in a solar power system? ✓

- A) To convert DC to AC
- B) To monitor solar panel output
- ✓ C) To regulate the voltage and current going to the battery
- D) To mount the solar panels

5. Which type of battery is most commonly used in electric vehicles? ✓

- A) Lead-acid
- B) Nickel-metal hydride (NiMH)
- ✓ C) Lithium-ion
- D) Alkaline

6. Which component is responsible for managing the battery's charge and discharge in an EV? ✓

- A) Electric motor
- ✓ B) Battery Management System (BMS)
- C) Inverter
- D) Regenerative braking system

7. What term describes the distance an EV can travel on a single charge? ✗

- A) Range
- B) Efficiency
- ✓ C) Torque
- D) Power

8. What is "regenerative braking" in electric vehicles? ✗

- A) A braking system that uses hydraulic fluid
- B) A method to recharge the battery while braking
- ✓ C) A braking system that uses friction to stop the vehicle
- D) A technique for increasing battery temperature

9. What is the primary goal of designing a solar power system? ✓

- A) To maximize the aesthetic appeal
- B) To minimize installation costs
- ✓ C) To efficiently convert sunlight into electricity for specific needs
- D) To increase the weight of the system

10. Which device regulates the voltage and current coming from the solar panels to prevent battery overcharging? ✓

- A) Inverter
- ✓ • B) Charge controller
- C) Battery Management System
- D) Transformer

11. What is the term for the process of calculating how much sunlight a solar panel system will receive at a given location? ✓

- ✓ • A) Solar irradiance assessment
- B) Load analysis
- C) Panel sizing
- D) Performance evaluation

12. In which scenario would you use a solar power tracking system? ✓

- A) When minimizing installation space
- ✓ • B) To increase energy output by adjusting the panel angle
- C) To reduce system maintenance
- D) For residential systems only

13. Which type of connector is commonly used for DC Fast Charging in North America? ✗

- A) CHAdeMO
- ✓ • B) Type 2
- C) CCS (Combined Charging System)
- D) Type 1

14. What is the typical charging rate for a Level 1 EV charger? ✗

- A) 3-5 kW
- B) 10-20 kW
- C) 50-150 kW
- ✓ • D) 120-240 kW

15. What is the typical voltage range for Level 2 EV charging stations? ✓

- ✓ • A) 120-240 volts
- B) 240-480 volts
- C) 12-24 volts
- D) 480-600 volts

16. What is the key advantage of multi-junction solar cells over traditional silicon solar cells? ✓

- ✓ • A) Lower cost
- B) Higher efficiency due to multiple layers capturing different wavelengths of sunlight
- C) Easier to manufacture
- D) Better performance in low light conditions

17. Which of the following materials is commonly used in thin-film solar panels? X

- ✓ • A) Silicon
- B) Cadmium telluride (CdTe)
- C) Gallium arsenide (GaAs)
- D) Perovskite

18. What is the primary advantage of using perovskite solar cells? ✓

- ✓ • A) Higher efficiency and lower production costs compared to silicon cells
- B) Longer lifespan
- C) Better performance in shaded conditions
- D) Higher operating temperatures

19. What is the primary role of a solar thermal collector in solar power systems? ✓

- ✓ • A) Convert sunlight into electricity
- B) Capture and convert sunlight into heat for applications like water heating
- C) Enhance the efficiency of photovoltaic cells
- D) Store solar energy

20. Which of the following describes a key feature of bifacial solar panels? ✓

- ✓ • A) They can capture sunlight from both sides of the panel
- B) They are less efficient than monofacial panels
- C) They use thin-film technology
- D) They are designed for low-light conditions

- D) Type 1

14. What is the typical charging rate for a Level 1 EV charger? ✓

- ✓ A) 3-5 kW
- B) 10-20 kW
- C) 50-150 kW
- D) 120-240 kW

15. What is the typical voltage range for Level 2 EV charging stations? ✓

- ✓ A) 120-240 volts
- B) 240-480 volts
- C) 12-24 volts
- D) 480-600 volts

16. What is the key advantage of multi-junction solar cells over traditional silicon solar cells?

- A) Lower cost
- ✓ • B) Higher efficiency due to multiple layers capturing different wavelengths of sunlight
- C) Easier to manufacture
- D) Better performance in low light conditions

17. Which of the following materials is commonly used in thin-film solar panels?

- A) Silicon
- ✓ • B) Cadmium telluride (CdTe)
- C) Gallium arsenide (GaAs)
- D) Perovskite

18. What is the primary advantage of using perovskite solar cells?

- ✓ • A) Higher efficiency and lower production costs compared to silicon cells
- B) Longer lifespan
- C) Better performance in shaded conditions
- D) Higher operating temperatures

19. What is the primary role of a solar thermal collector in solar power systems?

- ✓ • A) Convert sunlight into electricity
- B) Capture and convert sunlight into heat for applications like water heating
- C) Enhance the efficiency of photovoltaic cells
- D) Store solar energy

20. Which of the following describes a key feature of bifacial solar panels?

- ✓ • A) They can capture sunlight from both sides of the panel
- B) They are less efficient than monofacial panels
- C) They use thin-film technology
- D) They are designed for low-light conditions

### "Solar Power EV Charging Station" Course Assessment Test Answers

Duration: 1 Hour

Total Marks: 20

Date: 14/09/2020 to 18/09/2020

### *Answer-key*

1. What device converts sunlight directly into electricity in a solar power system?

Answer: C) Photovoltaic (PV) panel

2. Which device is used to convert the direct current (DC) electricity generated by solar panels into alternating current (AC) electricity?

Answer: C) Inverter

3. What is the typical voltage output of a standard residential solar panel?

Answer: B) 12-18 volts

4. What is the primary purpose of a solar charge controller in a solar power system?

Answer: C) To regulate the voltage and current going to the battery

5. Which type of battery is most commonly used in electric vehicles?

Answer: C) Lithium-ion

6. Which component is responsible for managing the battery's charge and discharge in an EV?

Answer: B) Battery Management System (BMS)

7. What term describes the distance an EV can travel on a single charge?

Answer: A) Range

8. What is "regenerative braking" in electric vehicles?

Answer: B) A method to recharge the battery while braking

9. What is the primary goal of designing a solar power system?

Answer: C) To efficiently convert sunlight into electricity for specific needs

10. Which device regulates the voltage and current coming from the solar panels to prevent battery overcharging?

Answer: B) Charge controller

11. What is the term for the process of calculating how much sunlight a solar panel system will receive at a given location?

Answer: A) Solar irradiance assessment

12. In which scenario would you use a solar power tracking system?

Answer: B) To increase energy output by adjusting the panel angle

13. Which type of connector is commonly used for DC Fast Charging in North America?

Answer: C) CCS (Combined Charging System)

14. What is the typical charging rate for a Level 1 EV charger?

Answer: A) 3-5 kW

15. What is the typical voltage range for Level 2 EV charging stations?

Answer: A) 120-240 volts

16. What is the key advantage of multi-junction solar cells over traditional silicon solar cells?

Answer: B) Higher efficiency due to multiple layers capturing different wavelengths of sunlight

17. Which of the following materials is commonly used in thin-film solar panels?

Answer: B) Cadmium telluride (CdTe)

18. What is the primary advantage of using perovskite solar cells?

Answer: A) Higher efficiency and lower production costs compared to silicon cells

19. What is the primary role of a solar thermal collector in solar power systems?

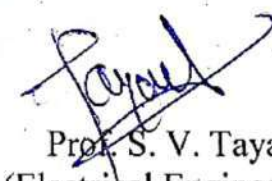

Answer: B) Capture and convert sunlight into heat for applications like water heating

20. Which of the following describes a key feature of bifacial solar panels?

Answer: A) They can capture sunlight from both sides of the panel

## Electrical Engineering Department

### Workshop: "Solar Power EV Charging Station"

**Workshop Duration:** 5 days (32 hours)

**Organizer:** Electrical Engineering Department.

### Workshop Purpose and Goals

The workshop was designed to equip participants with a comprehensive understanding of integrating solar power systems with electric vehicle (EV) charging stations. The primary goals were to:

- **Educate:** Provide foundational knowledge of solar energy and EV technologies.
- **Demonstrate:** Show how solar power can be integrated with EV charging infrastructure to enhance sustainability and efficiency.
- **Enable:** Offer hands-on experience with designing, installing, and managing solar-powered EV charging systems.
- **Explore:** Examine best practices, advanced technologies, and business models related to solar-powered EV charging.

### Learning Outcomes

By the end of the workshop, participants were expected to:

- **Understand:** The core principles of solar power and electric vehicle technology.
- **Design:** Create efficient solar power systems tailored to EV charging needs.
- **Install:** Perform practical installation and setup of solar panels and EV charging stations.
- **Integrate:** Successfully integrate solar power systems with EV charging infrastructure.
- **Monitor:** Use data management tools to monitor and optimize system performance.
- **Apply:** Develop implementation strategies and business models for solar-powered EV charging stations.

## Detailed of Topics Covered

### 2. Topics Covered

#### 1. Fundamentals of Solar Power (2 Hours)

- **Basics of Solar Energy:** Introduction to solar energy principles and technologies.
- **How Solar Panels Work:** Mechanisms of photovoltaic cells and energy conversion.
- **Types of Solar Panels and Their Efficiencies:** Overview of various panel types and their performance metrics.

#### 2. Introduction to Electric Vehicles (EVs) (1.5 Hours)

- **Types of Electric Vehicles:** Detailed look at BEV (Battery Electric Vehicles), PHEV (Plug-in Hybrid Electric Vehicles), and HEV (Hybrid Electric Vehicles).
- **EV Charging Standards and Connectors:** Overview of different charging standards and connector types used in the industry.

#### 3. Solar Power Systems for EV Charging (1.5 Hours)

- **Integration with EV Charging:** Methods for combining solar power with EV charging systems.
- **Key Components:** Essential elements of a solar-powered EV charging station.

#### 4. Site Assessment and Planning (1 Hour)

- **Site Evaluation:** Criteria for assessing potential sites for solar installations.
- **Panel Placement and Orientation:** Best practices for positioning solar panels to maximize efficiency.

#### 5. Solar Power System Design (2 Hours)

- **Designing a Solar Array:** Principles for creating a solar array to meet EV charging needs.
- **Energy Requirements and Panel Specifications:** Calculating necessary energy output and panel specifications.

#### 6. EV Charging Station Design (2 Hours)

- **Selecting Charging Equipment:** Criteria for choosing suitable EV charging equipment.
- **Charging Speeds:** Designing for various charging speeds (Level 1, Level 2, DC fast charging).

#### 7. Inverters and Energy Storage (1.5 Hours)

- **Integration of Solar Power:** Role of inverters and storage in solar-powered EV charging systems.
- **Key Components:** Overview of critical components in energy management.

## 8. Safety and Compliance (1 Hour)

- **Safety Standards:** Standards and protocols for safe installation and operation.
- **Regulatory Requirements:** Overview of relevant regulations and certifications.

## 9. Hands-On Solar Panel Installation (2 Hours)

- **Mounting Panels:** Practical session on installing solar panels.
- **Wiring and Connections:** Techniques for wiring and connecting solar panels.

## 10. EV Charging Station Setup (2 Hours)

- **Installing Stations:** Hands-on installation of EV charging equipment.
- **Connecting Equipment:** Connecting and configuring charging stations.

## 11. System Integration and Testing (1.5 Hours)

- **Integration:** Methods for integrating solar power with EV charging systems.
- **Testing:** Techniques for testing and ensuring system performance.

## 12. Data Monitoring and Management (1 Hour)

- **Monitoring Tools:** Tools and methods for tracking system performance.
- **Analyzing Data:** Techniques for analyzing and interpreting performance data.

## 13. Advanced Solar Technologies (1.5 Hours)

- **Innovations:** Exploration of emerging technologies like bifacial panels and PV concentrators.
- **Future Trends:** Impact of future solar technologies on EV charging.

## 14. Integration with Smart Grids (1.5 Hours)

- **Role in Smart Grids:** How solar-powered EV stations integrate with smart grid technology.
- **Benefits of Grid Integration:** Advantages of grid integration and Vehicle-to-Grid (V2G) technology.

## 15. Case Studies and Best Practices (1.5 Hours)

- **Successful Projects:** Analysis of successful solar EV charging projects.
- **Lessons Learned:** Key takeaways and best practices.

## 16. Group Discussion and Q&A (1.5 Hours)

- **Challenges and Opportunities:** Open discussion on industry challenges and opportunities.
- **Expert Q&A:** Session for addressing participant questions with industry experts.

## 17. Group Project Work (3 Hours)

- **Project Design:** Participants work in groups to design a solar-powered EV charging station.
- **Presentations and Peer Review:** Presentation of projects and peer feedback.

#### 18. Detailed Review and Feedback (1.5 Hours)

- **Review of Projects:** Detailed review and feedback on group projects.
- **Expert Recommendations:** Expert advice for project improvement and real-world application.

#### 19. Implementation Strategies and Business Models (1.5 Hours)

- **Strategies:** Effective strategies for implementing solar EV charging stations.
- **Business Models:** Financial considerations and business models for successful implementation.

#### 20. Final Q&A and Certification (1 Hour)

- **Final Discussion:** Addressing any remaining questions and summarizing key points.
- **Certification:** Awarding certificates of completion and closing remarks.

### NOTICE FOR WORKSHOP

**Subject: 5-Days Workshop on Low-code app development on the Creatio platform(Online)**

Dear Students and Faculty,

We are pleased to announce a 5-day workshop on **Low-code app development on the Creatio platform** to be held from **07 Sept, 2020 to 11 Sept, 2020**. This workshop aims to provide Low-code platforms enable users without programming skills to create applications, develop UI, set up business processes and automation, customize data structure.

**Workshop Details:**

- **Dates: 07 Sept, 2020 to 11 Sept, 2020.**
- **Time: 09 am to 05 pm**
- **Venue: Online mode**

We look forward to your active participation in this exciting and educational event.

Workshop Coordinator

Prof. C. S. Wagh

HOD

**Principal**  
NESGI, Faculty of Engineering  
Get No.89, 10.71, Nagson, Tal. Bhore, Dist. Pune

**Navsahyadri Education Society's Group of Institutions**

**Faculty of Engineering**

**Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune - 412213**

**Computer Department**

## **Workshop Contents:-**

### **Day 1: Introduction to Creatio and Low-Code Development**

#### **Morning Session: Overview of Creatio**

- Introduction to Creatio
  - History and evolution
  - Key features and benefits
- Low-Code Development: Concepts and Benefits
  - What is low-code?
  - Advantages of using low-code platforms
- Navigating the Creatio Interface
  - Dashboard overview
  - Basic navigation and user interface elements

#### **Afternoon Session: Creatio Core Concepts**

- Understanding the Creatio Architecture
  - Basic components (Entities, Fields, Records)
  - Application structure
- Introduction to the Creatio Studio
  - Creating and managing applications
  - Basic configuration options
- Hands-On Activity: Exploring the Creatio Platform
  - Guided tour of the Creatio interface
  - Basic setup and customization

### **Day 2: Building and Customizing Applications**

#### **Morning Session: Creating Your First App**

- App Creation Process
  - Step-by-step guide to creating a new application
  - Configuring basic settings
- Working with Entities
  - Creating and managing entities
  - Adding and configuring fields
- Forms and Views
  - Designing and customizing forms
  - Configuring list views and dashboards

**Navsahyadri Education Society's Group of Institutions**  
**Faculty of Engineering**  
Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune - 412213  
**Computer Department**

**Afternoon Session: Advanced Customization**

- Business Rules and Logic
  - Implementing business rules
  - Creating workflows and processes
- User Roles and Permissions
  - Defining user roles
  - Setting up permissions and security
- Hands-On Activity: Building a Simple Application
  - Create a sample application using the concepts learned

**Day 3: Advanced Features and Integrations**

**Morning Session: Workflow Automation**

- Advanced Workflow Design
  - Creating and managing workflows
  - Using process automation tools
- Business Process Management (BPM)
  - Designing BPM processes
  - Integrating BPM with workflows

**Afternoon Session: Integrations and APIs**

- Integrating with External Systems
  - API usage and configuration
  - Data import/export methods
- Extending Creatio Functionality
  - Using Creatio's built-in integration tools
  - Creating custom integrations
- Hands-On Activity: Implementing Automation and Integration
  - Setting up a workflow and integrating with an external system

**Day 4: Testing, Deployment, and Maintenance**

**Morning Session: Testing Your Applications**

- Testing Best Practices
  - Testing strategies and tools
  - User acceptance testing (UAT)
- Debugging and Troubleshooting
  - Common issues and resolutions
  - Using Creatio's diagnostic tools

**Afternoon Session: Deployment and Maintenance**

- Deploying Applications
  - Deployment options and best practices
  - Managing application versions

Navsahyadri Education Society's Group of Institutions

Faculty of Engineering

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhor, Pune - 412213

**Computer Department**

- Ongoing Maintenance and Updates
    - Monitoring and maintaining applications
    - Updating and upgrading Creatio components
  - Hands-On Activity: Testing and Deploying Your Application
    - Perform testing and deployment for the sample application
- 

## **Day 5: Real-World Scenarios and Advanced Topics**

### **Morning Session: Real-World Use Cases**

- Case Studies and Best Practices
  - Examining successful low-code projects
  - Discussing industry-specific solutions
- Solving Real-World Problems
  - Applying Creatio to complex scenarios
  - Group discussion and brainstorming

### **Afternoon Session: Future Trends and Wrap-Up**

- Exploring Future Trends in Low-Code Development
  - Emerging technologies and their impact
  - Future updates and features in Creatio
- Q&A and Feedback
  - Addressing participant questions
  - Collecting feedback for workshop improvement
- Hands-On Activity: Final Project Presentation
  - Present and review projects developed during the workshop

Workshop Coordinator

Prof. C. S. Wagh

HOD

10/15

### Quiz for Creatio Low-Code App Development

1. What is the primary purpose of the Creatio platform?  
☐ A) Financial Management  
☒ B) Customer Relationship Management  
☐ C) Supply Chain Management  
☐ D) Project Management
2. Which of the following is a core feature of Creatio's low-code development approach?  
☒ A) Custom code deployment  
☐ B) Drag-and-drop interface  
☐ C) Hardware integration  
☐ D) Advanced AI programming
3. In Creatio, what is a 'Business Process'?  
☐ A) A pre-built software module  
☐ B) A set of automated tasks and workflows  
☒ C) A user interface template  
☐ D) A database schema
4. What is the function of 'Sections' in Creatio?  
☐ A) To define user roles  
☒ B) To manage application forms  
☐ C) To categorize and manage data entities  
☐ D) To configure system settings
5. How can you customize the user interface in Creatio?  
☐ A) By writing custom JavaScript  
☒ B) By modifying XML files  
☐ C) By using the Visual Designer  
☐ D) By altering database tables directly
6. What is the purpose of the 'Studio' in Creatio?  
☐ A) To build user interfaces  
☒ B) To design business processes and automation  
☐ C) To manage user access  
☐ D) To handle data migrations
7. Which tool in Creatio allows you to automate workflows without coding?  
☒ A) Business Process Designer  
☐ B) Data Designer  
☐ C) Document Designer  
☐ D) Report Designer
8. What is the role of 'Business Rules' in Creatio?  
☐ A) To create custom reports  
☒ B) To define validation and business logic  
☐ C) To manage user permissions  
☐ D) To integrate with external systems

9. In Creatio, what does the 'Data Designer' allow you to do?

- ☐ A) Design user interfaces
- ☒ B) Create and manage data schemas
- ☐ C) Automate business processes
- ☐ D) Design workflows

10. How can you extend the functionality of standard Creatio modules?

- ☐ A) By writing custom code
- ☒ B) By creating custom modules and applications
- ☐ C) By purchasing additional plugins
- ☐ D) By altering system configurations

11. What is the 'Application Page' in Creatio used for?

- ☐ A) To configure system settings
- ☒ B) To design application forms and layouts
- ☐ C) To manage user roles
- ☐ D) To integrate with third-party services

12. Which of the following is a way to test business processes in Creatio?

- ☐ A) Using the Preview feature
- ☒ B) Running in a staging environment
- ☐ C) Performing a live data migration
- ☐ D) Checking system logs

13. What are 'Lookup Records' in Creatio?

- ☒ A) Predefined system records
- ☐ B) Records used for data validation and selection
- ☐ C) Logs of user activities
- ☐ D) Templates for user forms

14. How does Creatio handle data security?

- ☒ A) Through built-in encryption and access controls
- ☐ B) By limiting the number of records stored
- ☐ C) Through external firewall configurations
- ☐ D) By regular software updates

15. What is the 'Marketplace' in Creatio?

- ☐ A) A place to purchase software licenses
- ☒ B) A repository of additional modules and integrations
- ☐ C) A tool for managing business processes
- ☐ D) A section for community forums

**Quiz for Creatio Low-Code App Development**

1. What is the primary purpose of the Creatio platform?

## **Summary Report For Low-code app development on the Creatio platform**

### **Activity Report for Robotic Process Automation (RPA)**

**Reporting Period:** 07 Sept, 2020 to 11 Sept, 2020

**Prepared By:** The Director SourceCode Training Institute

**Date:** 11 Sept, 2020

### **1. Overview**

- **Platform:** Creatio

### **2. Key Developments**

- **New Apps Created:** List any new low-code applications developed on the Creatio platform.
- **Updates & Enhancements:** Mention any significant updates or enhancements made to existing apps.

### **3. Performance Highlights**

- **User Adoption:** Briefly summarize user adoption rates or feedback.
- **Efficiency Gains:** Note any improvements in process efficiency or productivity resulting from the new apps.

### **4. Challenges**

- **Issues Encountered:** Describe any challenges or issues faced during development and how they were resolved.

### **5. Next Steps**

- **Upcoming Projects:** Outline any planned development activities or new apps to be created in the near future.

**Day 2: Effective Communication Skills**

- **Morning:**

- Principles of Effective Communication: Verbal and Non-verbal
- Active Listening Techniques
- Communicating with Different Personality Types

- **Afternoon:**

- **Hands-on Exercise:** Role-playing various communication scenarios
- **Assignment:** Develop a communication plan for a team project

**Day 3: Team Building and Motivation**

- **Morning:**

- Team Dynamics: Building High-Performing Teams
- Theories of Motivation: Maslow's Hierarchy of Needs, Herzberg's Factor Theory

- Strategies for Motivating and Engaging Teams
- **Afternoon:**
  - **Hands-on Exercise:** Team-building activities and exercises
  - **Assignment:** Create a motivation and engagement plan for a hypothetical team

#### **Day 4: Conflict Resolution and Negotiation**

- **Morning:**
  - Understanding Conflict: Types and Sources
  - Conflict Resolution Strategies: Mediation, Arbitration, and Negotiation
  - Techniques for Effective Negotiation
- **Afternoon:**
  - **Hands-on Exercise:** Simulated conflict resolution and negotiation scenarios
  - **Assignment:** Develop a conflict resolution strategy for a case study

#### **Day 5: Strategic Planning and Decision-Making**

- **Morning:**
  - Strategic Planning: Vision, Mission, and Goals
  - Decision-Making Models: Rational, Bounded Rationality, Intuitive
  - Tools and Techniques for Effective Decision-Making
- **Afternoon:**
  - **Hands-on Exercise:** Develop a strategic plan for a hypothetical organization
  - **Assignment:** Use a decision-making model to solve a business case study

#### **Day 6: Change Management**

- **Morning:**
  - Understanding Change Management: Theories and Models (e.g., Kotter's 8-Step Change Model)
  - Leading Change: Overcoming Resistance and Ensuring Buy-In
  - Communicating Change Effectively
- **Afternoon:**
  - **Hands-on Exercise:** Plan and present a change management strategy for a fictional scenario
  - **Assignment:** Write a change management plan addressing potential challenges

## Day 7: Performance Management and Coaching

- **Morning:**
  - Performance Management: Setting Goals, Monitoring Progress, and Providing Feedback
  - Coaching Techniques: Developing Talent and Enhancing Performance
  - Conducting Effective Performance Reviews
- **Afternoon:**
  - **Hands-on Exercise:** Role-play performance review and coaching sessions
  - **Assignment:** Create a performance management and coaching plan for a team member

## Day 8: Leadership Styles and Personal Development

- **Morning:**
  - Exploring Different Leadership Styles: Autocratic, Democratic, Laissez-Faire
  - Self-Awareness and Emotional Intelligence in Leadership
  - Personal Development Plans for Leadership Growth
- **Afternoon:**
  - **Hands-on Exercise:** Assess your leadership style and create a personal development plan
  - **Assignment:** Develop a plan for improving your leadership skills based on feedback

## Day 9: Ethics and Corporate Social Responsibility (CSR)

- **Morning:**
  - Understanding Business Ethics: Principles and Practices
  - Corporate Social Responsibility: Importance and Implementation
  - Case Studies on Ethical Dilemmas and CSR Initiatives
- **Afternoon:**
  - **Hands-on Exercise:** Analyze ethical case studies and CSR strategies
  - **Assignment:** Develop an ethical framework and CSR plan for a hypothetical organization

## Day 10: Integration and Application

- **Morning:**
  - Integrating Leadership and Management Skills: Creating a Cohesiv

- Reviewing Key Concepts and Best Practices
  - **Hands-on Exercise:** Develop a comprehensive leadership and management strategy for a hypothetical organization
  - **Afternoon:**
    - **Final Presentation:** Present your leadership and management strategy and receive feedback from peers and instructors
    - **Review and Wrap-Up:** Reflection on learning outcomes and next steps for personal development
-

- ☐ A) An organization's commitment to reducing its costs
- ☒ B) The ethical obligation of a company to contribute positively to society
- ☐ C) A method for increasing profit margins
- ☐ D) A strategy for internal employee management

18. Which of the following is an example of an ethical dilemma?

- ☒ A) Deciding on a new product feature
- ☐ B) Choosing between meeting production deadlines and ensuring employee safety
- ☐ C) Selecting a marketing strategy
- ☐ D) Implementing a new IT system

19. What is an effective way to integrate leadership and management skills in a strategic plan?

- ☐ A) Separating leadership and management tasks into distinct functions
- ☐ B) Focusing exclusively on either leadership or management
- ☐ C) Combining vision-setting with practical execution strategies
- ☒ D) Ignoring leadership aspects in favor of management tasks

20. Which of the following is NOT typically included in a leadership and management strategy plan?

- ☒ A) Vision and mission statements
- ☐ B) Personal hobbies and interests
- ☐ C) Goals and objectives
- ☐ D) Performance metrics and evaluation criteria

## Report: 10-Day Leadership and Management Skills Course

**Course Dates:** January 25, 2020 – February 3, 2020

**Duration: 50 Hours** (10:00 AM – 04:00 PM)

**Conducted By:** Gryphon Technologies

**Overview:** The 10-day Leadership and Management Skills course, organized by Gryphon Technologies, was conducted from January 25, 2020, to February 3, 2020. This intensive program spanned 50 hours, with daily sessions running from 10:00 AM to 04:00 PM. The course aimed to enhance participants' leadership abilities and management skills through a structured and interactive learning approach.

### Objectives:

- Develop advanced leadership and management skills.
- Improve strategic thinking, decision-making, and problem-solving abilities.
- Enhance team management and communication techniques.

### Notice of Training Session

We are pleased to announce a training session for MBA first year students on **Cyber Security**, designed to enhance skills, improve understanding in management, etc. This session will be led by **Manpower Group Services India PVT. Ltd** from **15/01/2020 to 24/01/2020** at **10 AM to 4 PM**. attendance is mandatory.

**Place: MBA & MCA Seminar Hall**

  
Director,  
Faculty of Management (MBA & MCA)  
Navsahyadri Education Society's  
Group of Institutions  
Naigaon, Pune 412 213

## **\*CURRICULUM**

**COURSE NAME: Cyber Security**

**Offered By: Manpower Group Services India Pvt. Ltd**

**DATE:** January 15, 2020 to January 24, 2020

**TIME: 10 AM to 4 PM.**

### **Day 1: Introduction to Cyber Security**

- **Morning:**
  - Overview of Cyber Security: Definition, Importance, and Goals
  - Cyber Threat Landscape: Types of Threats and Attacks
  - Key Concepts: Confidentiality, Integrity, and Availability (CIA Triad)
- **Afternoon:**
  - Historical Cyber Attacks and Their Impact
  - **Hands-on Exercise:** Explore basic cyber threats and their impacts using case studies
  - **Assignment:** Research and summarize a recent cyber attack incident

### **Day 2: Network Security Fundamentals**

- **Morning:**
  - Introduction to Network Security: Concepts and Importance
  - Network Architecture: LAN, WAN, and Internet
  - Common Network Threats: DDoS, Man-in-the-Middle, and Spoofing
- **Afternoon:**
  - **Hands-on Exercise:** Setting up basic network security configurations and firewalls
  - **Assignment:** Analyze a network diagram for potential security vulnerabilities

### **Day 3: Security Policies and Risk Management**

- **Morning:**
  - Developing and Implementing Security Policies
  - Risk Management: Identifying, Assessing, and Mitigating Risks
  - Compliance and Regulatory Requirements: GDPR, HIPAA, etc.
- **Afternoon:**

- **Hands-on Exercise:** Draft a basic security policy for an organization
- **Assignment:** Conduct a risk assessment for a hypothetical business scenario

#### Day 4: Authentication and Access Control

- **Morning:**
  - Authentication Mechanisms: Passwords, Two-Factor Authentication, Biometrics
  - Access Control Models: Discretionary Access Control (DAC), Mandatory Access Control (MAC), Role-Based Access Control (RBAC)
- **Afternoon:**
  - **Hands-on Exercise:** Implement and configure access controls in a simulated environment
  - **Assignment:** Evaluate and improve an existing authentication process

#### Day 5: Cryptography and Encryption

- **Morning:**
  - Introduction to Cryptography: Principles and Types of Encryption
  - Symmetric vs. Asymmetric Encryption
  - Common Encryption Algorithms: AES, RSA, and SHA
- **Afternoon:**
  - **Hands-on Exercise:** Encrypt and decrypt files using common cryptographic tools
  - **Assignment:** Compare and contrast different encryption methods for data protection

#### Day 6: Cyber Security Tools and Techniques

- **Morning:**
  - Overview of Cyber Security Tools: Antivirus, Firewalls, IDS/IPS
  - Network and Application Security Tools: Nmap, Wireshark, Burp Suite
- **Afternoon:**
  - **Hands-on Exercise:** Use network scanning and monitoring tools to identify vulnerabilities
  - **Assignment:** Create a report on the effectiveness of various cyber security tools

#### Day 7: Incident Response and Management

- **Morning:**

- Incident Response: Phases and Best Practices
- Developing an Incident Response Plan
- Tools and Techniques for Incident Management
- **Afternoon:**
  - **Hands-on Exercise:** Simulate a cyber incident and follow an incident response procedure
  - **Assignment:** Develop an incident response plan for a given cyber attack scenario

## Day 8: Secure Software Development

- **Morning:**
  - Introduction to Secure Software Development Practices
  - Common Software Vulnerabilities: SQL Injection, XSS, CSRF
  - Security Testing: Static and Dynamic Analysis
- **Afternoon:**
  - **Hands-on Exercise:** Conduct a basic security review of a sample application
  - **Assignment:** Identify and suggest fixes for security vulnerabilities in a given code snippet

## Day 9: Emerging Trends and Threats

- **Morning:**
  - Emerging Cyber Threats: Ransomware, Advanced Persistent Threats (APTs), IoT Security
  - Trends in Cyber Security: Artificial Intelligence, Machine Learning, and Blockchain
- **Afternoon:**
  - **Hands-on Exercise:** Research and present on a current cyber threat or emerging technology
  - **Assignment:** Analyze the impact of emerging trends on cyber security practices

## Day 10: Review and Application

- **Morning:**
  - Review of Key Concepts and Techniques Covered in the Course
  - Case Studies: Analyzing Successful and Failed Cyber Security Implementations

- **Afternoon:**
  - **Hands-on Exercise:** Develop a comprehensive cyber security plan for a hypothetical organization
  - **Final Assignment:** Present and discuss your cyber security plan with feedback from peers and instructors

24/01/2020

COURSE NAME: Cyber Security .

Time: 30 Minutes

Student Name:

Rupesh Laxman Pansare

Marks

### Instructions:

1. Each question carry one mark.
2. Tick on left side of answer choices.
3. All questions are compulsory.

1. What does the CIA Triad stand for in cyber security?

- ☒ A) Confidentiality, Integrity, and Availability
- ☐ B) Compliance, Investigation, and Analysis
- ☐ C) Confidentiality, Investigation, and Access
- ☐ D) Compliance, Integrity, and Authentication

2. Which of the following is an example of a cyber threat?

- ☒ A) Data backup
- ☐ B) Firewall
- ☒ C) Phishing
- ☐ D) Encryption

3. What is the purpose of a firewall in network security?

- ☐ A) To monitor employee performance
- ☒ B) To block unauthorized access while permitting legitimate communication
- ☐ C) To manage database operations
- ☐ D) To create digital marketing campaigns

13

20

*Sum.*

4. What does DDoS stand for?

- ☐ A) Distributed Denial of Service
- ☐ B) Direct Denial of Service
- ☒ C) Dynamic Denial of Service
- ☐ D) Distributed Data of Service

5. Which document outlines an organization's approach to managing cyber security risks?

- ☐ A) Incident Response Plan
- ☐ B) Risk Management Plan
- ☒ C) Security Policy
- ☐ D) Compliance Report

6. Which regulatory requirement focuses on protecting personal health information?

- ☐ A) GDPR
- ☒ B) HIPAA
- ☐ C) SOX
- ☐ D) PCI-DSS

7. What is Multi-Factor Authentication (MFA)?

- ☐ A) Using only a password for access
- ☐ B) A method to prevent unauthorized access using multiple forms of verification
- ☒ C) A single-step authentication process
- ☐ D) A tool for password management

8. Which access control model assigns permissions based on the roles of users?

- ☐ A) Discretionary Access Control (DAC)
- ☐ B) Mandatory Access Control (MAC)
- ☒ C) Role-Based Access Control (RBAC)
- ☐ D) Attribute-Based Access Control (ABAC)

9. What type of encryption uses the same key for both encryption and decryption?

- ☒ A) Asymmetric Encryption
- ☐ B) Symmetric Encryption

- C) Hashing
- D) Digital Signatures

10. Which encryption algorithm is commonly used for securing data at rest?

- A) RSA
- B) AES
- C) SHA-256
- D) MD5

11. Which tool is used for network scanning and vulnerability assessment?

- A) Wireshark
- B) Nmap
- C) Burp Suite
- D) Nessus

12. What does IDS stand for in network security?

- A) Intrusion Detection System
- B) Integrated Detection Service
- C) Internet Detection System
- D) Internal Defense Service

13. What is the first step in an incident response process?

- A) Containment
- B) Eradication
- C) Detection and Identification
- D) Recovery

14. Which component is essential for a successful incident response plan?

- A) Regular software updates
- B) Clear communication procedures
- C) Comprehensive marketing strategy
- D) Efficient payroll management

15. Which vulnerability is associated with improper validation of user input leading to unauthorized database access?

- A) Cross-Site Scripting (XSS)
- B) SQL Injection

- ☐ C) Cross-Site Request Forgery (CSRF)
- ☐ D) Buffer Overflow

16. What is the purpose of static code analysis in secure software development?

- ☐ A) To test software performance under load
- ☒ B) To analyze code for security vulnerabilities without executing it
- ☐ C) To assess user interface design
- ☐ D) To monitor application usage

17. What is a key concern with Internet of Things (IoT) devices in terms of cyber security?

- ☐ A) Limited physical space for devices
- ☐ B) High energy consumption
- ☒ C) Potential for security vulnerabilities due to inadequate security measures
- ☐ D) Excessive user data collection

18. Which technology is being used to enhance security through decentralized data storage and verification?

- ☐ A) Blockchain
- ☐ B) Cloud Computing
- ☐ C) Quantum Computing
- ☒ D) Virtualization

19. What should be included in a comprehensive cyber security plan?

- ☐ A) Employee satisfaction surveys
- ☒ B) Detailed security policies, risk assessments, and incident response strategies
- ☐ C) Marketing and sales strategies
- ☐ D) Financial performance metrics

20. Which of the following is a best practice for securing a network?

- ☐ A) Using the same password for all accounts
  - ☒ B) Regularly updating software and firmware
  - ☐ C) Ignoring network traffic anomalies
  - ☐ D) Disabling all firewalls
-

### Report: 10-Day Course on Cyber Security

**Course Dates:** January 15, 2020 – January 24, 2020

**Duration:** 50 Hours (10:00 AM – 04:00 PM)

**Conducted By:** MANPOWER GROUP SERVICES INDIA PVT. LTD

**Overview:** The 10-day Cyber Security course, conducted by SYSAP Technologies, took place from January 15, 2020 to January 24, 2020. The program, totalling 50 hours, was designed to equip participants with essential knowledge and practical skills to effectively safeguard information systems and manage cyber security threats.

### Objectives:

- To introduce participants to fundamental concepts and practices in cyber security.
- To develop practical skills in identifying, preventing, and responding to cyber threats.
- To enhance participants' ability to implement effective security measures and protocols.

## NOTICE

### Workshop on "Construction Methodology, Basics in Civil Engineering"

**Dates:** 23rd September 2019 - 27th September 2019

**Venue:** Dr A.P.J Abdul Kalam Seminar Hall

Dear Students,

We are excited to announce a five-day workshop on "Construction Methodology, Basics in Civil Engineering" from 23rd to 27th September 2019. This workshop will provide essential knowledge and hands-on experience in key areas such as project planning, site investigation, foundation design, and modern construction technologies.

#### Key Learning Outcomes:

- Understanding of construction project planning and management.
- Practical insights into foundation and superstructure design.
- Exposure to modern construction techniques and safety practices.

We encourage all interested students to take advantage of this valuable learning opportunity. Participation in this workshop will not only enhance your knowledge but also equip you with practical skills that are essential for your future career in civil engineering.

Prof A.R.Kalyane  
Workshop Coordinator

## **Contents**

---

**Date: 23rd September 2019 - 27th September 2019**

### **Day 1: Introduction to Construction Methodology and Project Planning**

#### **Session 1 (9:00 AM - 11:00 AM):**

- Welcome and Workshop Overview
- Introduction to Construction Methodology
- Overview of Civil Engineering Projects
- Key Phases in Construction Projects: Conceptualization, Design, Planning, Execution

#### **Coffee Break (11:00 AM - 11:15 AM)**

#### **Session 2 (11:15 AM - 1:00 PM):**

- Basics of Project Planning: Gantt Charts, Critical Path Method (CPM)
- Introduction to Project Management Tools: MS Project, Primavera
- Work Breakdown Structure (WBS) and Resource Allocation

#### **Lunch Break (1:00 PM - 2:00 PM)**

#### **Session 3 (2:00 PM - 4:00 PM):**

- Hands-on Session: Creating a Basic Construction Project Plan
- Identifying Key Milestones and Deliverables
- Q&A and Recap

### **Day 2: Site Investigation and Soil Mechanics**

#### **Session 1 (9:00 AM - 11:00 AM):**

- Introduction to Site Investigation
- Importance of Soil Testing in Construction
- Types of Soil and Their Properties
- Soil Bearing Capacity and Its Significance

### **Coffee Break (11:00 AM - 11:15 AM)**

#### **Session 2 (11:15 AM - 1:00 PM):**

- Methods of Soil Testing: Standard Penetration Test (SPT), Plate Load Test, etc.
- Interpretation of Soil Test Results
- Soil Improvement Techniques: Compaction, Grouting, and Soil Stabilization

### **Lunch Break (1:00 PM - 2:00 PM)**

#### **Session 3 (2:00 PM - 4:00 PM):**

- Hands-on Session: Analyzing Soil Test Data
- Determining Foundation Types Based on Soil Conditions
- Q&A and Recap

## **Day 3: Foundation Design and Construction**

#### **Session 1 (9:00 AM - 11:00 AM):**

- Introduction to Foundations: Shallow vs. Deep Foundations
- Design Considerations for Foundations
- Types of Shallow Foundations: Strip, Raft, Pad, Combined Footings
- Types of Deep Foundations: Pile, Caisson

### **Coffee Break (11:00 AM - 11:15 AM)**

#### **Session 2 (11:15 AM - 1:00 PM):**

- Foundation Construction Methods: Excavation, Formwork, and Reinforcement
- Common Foundation Problems and Solutions
- Case Studies of Foundation Failures and Lessons Learned

### **Lunch Break (1:00 PM - 2:00 PM)**

#### **Session 3 (2:00 PM - 4:00 PM):**

- Hands-on Session: Foundation Design Calculation
- Software Tools for Foundation Design
- Q&A and Recap

## **Day 4: Superstructure Construction and Building Materials**

#### **Session 1 (9:00 AM - 11:00 AM):**

- Introduction to Superstructures: Beams, Columns, Slabs, and Walls
- Basics of Structural Design: Load Distribution, Bending, Shear
- Building Materials: Concrete, Steel, Bricks, Timber

**Coffee Break (11:00 AM - 11:15 AM)**

**Session 2 (11:15 AM - 1:00 PM):**

- Construction Techniques for Superstructures: Casting, Curing, Reinforcement
- Concrete Mix Design and Quality Control
- Introduction to Sustainable Building Materials and Techniques

**Lunch Break (1:00 PM - 2:00 PM)**

**Session 3 (2:00 PM - 4:00 PM):**

- Hands-on Session: Structural Design and Analysis
- Case Study: Construction of a Multi-story Building
- Q&A and Recap

**Day 5: Construction Technology, Safety, and Quality Control**

**Session 1 (9:00 AM - 11:00 AM):**

- Introduction to Modern Construction Technologies: Prefabrication, 3D Printing
- Role of Technology in Enhancing Construction Efficiency
- Overview of Construction Safety Practices and Standards

**Coffee Break (11:00 AM - 11:15 AM)**

**Session 2 (11:15 AM - 1:00 PM):**

- Quality Control in Construction: Standards, Procedures, and Documentation
- Common Construction Defects and How to Avoid Them
- Construction Project Risk Management

**Lunch Break (1:00 PM - 2:00 PM)**

**Session 3 (2:00 PM - 4:00 PM):**

- Hands-on Session: Implementing Quality Control Measures
- Final Project Presentation: Application of Workshop Learnings in a Real-World Scenario
- Q&A, Feedback, and Closing Ceremony

## Quiz: Workshop on "Construction Methodology, Basics in Civil Engineering"

Organizer:-Learning CADD Academy,Pune

Date:-23/09/2019 to 27/09/2019

Name of the student: Kenjale Anuj Bisan

Year : BE

### Instructions:

- This quiz consists of 15 multiple-choice questions based on the content covered in the workshop.
- Choose the most appropriate answer for each question.

Duration:- 30minutes

1. Which of the following is the first phase in a construction project?  
☒ a) Execution  
☒ b) Planning  
c) Site Investigation  
d) Design
2. Which tool is commonly used for project scheduling in construction?  
☒ a) AutoCAD  
b) Gantt Chart  
c) STAAD.Pro  
d) Microsoft Excel
3. What does the Critical Path Method (CPM) help to determine?  
a) The shortest path between two tasks  
b) The maximum budget for a project  
☒ c) The sequence of critical activities  
d) The labor requirements

4. Which soil testing method is commonly used to determine the bearing capacity of soil?
- a) Core Drilling
  - ☒ b) Standard Penetration Test (SPT)
  - c) Permeability Test
  - d) Atterberg Limits Test
5. What type of foundation is typically used for heavy loads and poor soil conditions?
- a) Strip Footing
  - b) Raft Foundation
  - ☒ c) Pile Foundation
  - d) Pad Foundation
6. Which of the following materials is commonly used for reinforcement in concrete structures?
- a) Aluminum
  - ☒ b) Steel
  - c) Timber
  - d) Plastic
7. Which of the following is a shallow foundation?
- a) Pile Foundation
  - b) Caisson
  - ☒ c) Raft Foundation
  - d) Pier Foundation
8. Which construction material is known for its high compressive strength?
- a) Timber
  - b) Steel
  - ☒ c) Concrete
  - d) Glass
9. What is the main purpose of using formwork in construction?
- a) To reinforce concrete
  - ☒ b) To mold concrete into the desired shape
  - c) To prevent water leakage
  - d) To improve the aesthetic appearance of a building

10. Which of the following is NOT considered a type of superstructure?
- a) Beams
  - b) Slabs
  - c) Columns
  - ☒ d) Foundations
11. Which modern construction technique involves assembling pre-made components on-site?
- a) 3D Printing
  - ☒ b) Prefabrication
  - c) Cast-in-Place Construction
  - d) Modular Construction
12. In soil mechanics, what does the term "shear strength" refer to?
- a) The ability of soil to resist vertical loads
  - ☒ b) The ability of soil to resist sliding forces
  - c) The moisture content in soil
  - d) The density of soil
13. What does the term "slump test" measure in concrete?
- a) Compressive strength
  - ☒ b) Workability
  - c) Durability
  - d) Flexural strength
14. Which safety practice is critical when working at heights on a construction site?
- a) Wearing hard hats
  - ☒ b) Using fall protection systems
  - c) Wearing reflective vests
  - d) Maintaining proper signage
15. Which of the following is a key aspect of quality control in construction?
- a) Budget Estimation
  - b) Material Testing
  - c) Equipment Leasing
  - ☒ d) Labor Management

## Quiz: Workshop on "Construction Methodology, Basics in Civil Engineering"

Organizer:-Learning CADD Academy,Pune Date:-23/09/2019 to 27/09/2019

Name of the student: Subor Anil Jaywant

Year : BE

### Instructions:

- This quiz consists of 15 multiple-choice questions based on the content covered in the workshop.
- Choose the most appropriate answer for each question.

Duration:- 30minutes

1. Which of the following is the first phase in a construction project?  
☒ a) Execution  
☒ b) Planning  
☐ c) Site Investigation  
☐ d) Design
2. Which tool is commonly used for project scheduling in construction?  
☒ a) AutoCAD  
☐ b) Gantt Chart  
☐ c) STAAD.Pro  
☐ d) Microsoft Excel
3. What does the Critical Path Method (CPM) help to determine?  
☐ a) The shortest path between two tasks  
☐ b) The maximum budget for a project  
☒ c) The sequence of critical activities  
☐ d) The labor requirements

4. Which soil testing method is commonly used to determine the bearing capacity of soil?
- a) Core Drilling
  - ☒ b) Standard Penetration Test (SPT)
  - c) Permeability Test
  - d) Atterberg Limits Test
5. What type of foundation is typically used for heavy loads and poor soil conditions?
- a) Strip Footing
  - b) Raft Foundation
  - ☒ c) Pile Foundation
  - d) Pad Foundation
6. Which of the following materials is commonly used for reinforcement in concrete structures?
- a) Aluminum
  - ☒ b) Steel
  - c) Timber
  - d) Plastic
7. Which of the following is a shallow foundation?
- a) Pile Foundation
  - b) Caisson
  - ☒ c) Raft Foundation
  - d) Pier Foundation
8. Which construction material is known for its high compressive strength?
- a) Timber
  - b) Steel
  - ☒ c) Concrete
  - d) Glass
9. What is the main purpose of using formwork in construction?
- a) To reinforce concrete
  - ☒ b) To mold concrete into the desired shape
  - c) To prevent water leakage
  - d) To improve the aesthetic appearance of a building

10. Which of the following is NOT considered a type of superstructure?
- a) Beams
  - b) Slabs
  - c) Columns
  - ☒ d) Foundations
11. Which modern construction technique involves assembling pre-made components on-site?
- a) 3D Printing
  - ☒ b) Prefabrication
  - c) Cast-in-Place Construction

## **Quiz: Workshop on "Construction Methodology, Basics in Civil Engineering"**

---

**Date:** 23rd September 2019 - 27th September 2019

### **Answer Key**

1. Which of the following is the first phase in a construction project?
  - c) Site Investigation
2. Which tool is commonly used for project scheduling in construction?
  - b) Gantt Chart
3. What does the Critical Path Method (CPM) help to determine?
  - c) The sequence of critical activities
4. Which soil testing method is commonly used to determine the bearing capacity of soil?
  - b) Standard Penetration Test (SPT)
5. What type of foundation is typically used for heavy loads and poor soil conditions?
  - c) Pile Foundation
6. Which of the following materials is commonly used for reinforcement in concrete structures?
  - b) Steel
7. Which of the following is a shallow foundation?
  - c) Raft Foundation
8. Which construction material is known for its high compressive strength?
  - c) Concrete
9. What is the main purpose of using formwork in construction?
  - b) To mold concrete into the desired shape
10. Which of the following is NOT considered a type of superstructure?
  - d) Foundations
11. Which modern construction technique involves assembling pre-made components on-site?
  - b) Prefabrication

12. In soil mechanics, what does the term “shear strength” refer to?
- b) The ability of soil to resist sliding forces
13. What does the term "slump test" measure in concrete?
- b) Workability
14. Which safety practice is critical when working at heights on a construction site?
- b) Using fall protection systems
15. Which of the following is a key aspect of quality control in construction?
- b) Material Testing

## **SUMMARY NOTICE: Workshop on "Construction Methodology, Basics in Civil Engineering"**

---

### **Introduction:**

The Department of Civil Engineering organized a five-day workshop on "Construction Methodology, Basics in Civil Engineering" from 23rd to 27th September 2019. The workshop aimed to equip participants with essential knowledge and skills in construction methodology, combining theoretical instruction with practical exercises. A total of 58 civil engineering students participated in this workshop.

### **Day 1: Introduction to Construction Methodology and Project Planning**

The workshop began with an overview of construction methodology, covering the different phases of civil engineering projects. Participants were introduced to project planning techniques, including Gantt charts and the Critical Path Method (CPM). A hands-on session allowed students to create a basic construction project plan, identifying key milestones and deliverables.

### **Day 2: Site Investigation and Soil Mechanics**

On the second day, the focus was on site investigation and soil mechanics. Participants learned about the importance of soil testing in construction, different types of soil, and their properties. The session included practical activities such as analyzing soil test data to determine suitable foundation types based on soil conditions.

### **Day 3: Foundation Design and Construction**

The third day was dedicated to foundation design and construction, where participants explored various types of foundations, including shallow and deep foundations. The session emphasized the significance of proper foundation design in ensuring the stability of

structures. Students engaged in practical design calculations and used software tools for foundation modeling and analysis.

#### **Day 4: Superstructure Construction and Building Materials**

Day 4 focused on the construction of superstructures, covering beams, columns, slabs, and walls. Participants were introduced to various building materials, including concrete, steel, bricks, and timber. The session also included hands-on activities in structural design and analysis, supported by case studies of multi-story building construction.

#### **Day 5: Construction Technology, Safety, and Quality Control**

The final day of the workshop explored modern construction technologies, safety practices, and quality control. Participants were introduced to advanced construction methods, such as prefabrication and 3D printing. The session also covered safety practices and risk management, culminating in a discussion on quality control standards. The workshop concluded with a final project presentation, where participants showcased their understanding of the concepts learned.

#### **Workshop Outcomes:**

- 1. Enhanced Understanding of Construction Methodology:**
  - Participants gained a thorough understanding of the construction process, from project planning to execution.
- 2. Practical Experience in Project Planning:**
  - Students created detailed project plans using Gantt charts and CPM, essential for effective project management.
- 3. In-depth Knowledge of Soil Mechanics and Foundation Design:**
  - The workshop provided critical insights into soil testing and foundation design, with practical experience in using relevant software tools.
- 4. Hands-On Structural Design Experience:**
  - Participants applied theoretical knowledge to real-world scenarios, gaining practical experience in designing and analyzing superstructures.

#### 5. Exposure to Modern Construction Technologies:

- The workshop introduced students to the latest advancements in construction technology, preparing them to adapt to industry trends.

#### 6. Awareness of Safety Practices and Quality Control:

- Emphasis on safety and quality control practices equipped participants with the knowledge to manage risks and ensure construction standards are met.

#### Conclusion:

The workshop on "Construction Methodology, Basics in Civil Engineering" was a great success, with 58 civil engineering students actively participating. The workshop effectively combined theory and practice, ensuring that participants gained both knowledge and hands-on experience. The positive feedback from the students highlighted the workshop's value in preparing them for future challenges in the field of civil engineering.

**NOTICE OF WORKSHOP**

**Subject:** Manufacturing Process: Becoming a Sheet Metal Design Professional

**Date:** 06-08-2019 to 10-08-2019

**Time:** 09:00 AM to 5:00 PM

**Dear Students,**

We are pleased to announce a workshop focused on the advancement of knowledge of mechanical Engineering students. This workshop aims to provide valuable insights to the students about sheet metal formation, which will be an added advantage in his career growth as well as job search.

**Workshop Details:**

**Topic:** Manufacturing Process: Becoming a Sheet Metal Design Professional

- **Objective:** To explore the benefits, technology, and implementation strategies for sheet-metal forming solutions.
- **Key Highlights:**
  1. Introduction to Sheet Metal Design
    - Overview of Sheet Metal
    - Fundamentals of Sheet Metal Design
  2. Manufacturing Processes
    - Cutting and Shearing
    - Bending and Forming
    - Punching and Blanking
    - Welding and Joining
    - Surface Finishing
  3. Design Considerations
    - Design for Manufacturability (DFM)
    - Tolerance and Fit
    - Material Utilization
  4. CAD and Simulation Tools
    - Introduction to CAD Software
    - Simulation and Testing
  5. Practical Applications
    - Hands-On Design Challenges
    - Case Studies
  6. Industry Standards and Safety
    - Understanding Industry Standards
    - Safety Considerations
  7. Q&A and Networking
    - Discussion
    - Networking
  8. Certification and Continuing Education
    - Certification Programs
    - Continuing Education

This workshop would equip participants with both the theoretical knowledge and practical skills needed to excel in sheet metal design, making them more effective and efficient in their roles.

We look forward to your participation.

**CONTENTS OF WORKSHOP (Day 1)**

**Subject:** Manufacturing Process: Becoming a Sheet Metal Design Professional

**Date:** 06-08-2019

**Time:** 09:00 AM to 5:00 PM

**Day 1: Introduction to Sheet Metal Design**

**1. Welcome and Introduction (30 mins)**

- Overview of the workshop goals
- Introductions and participant expectations

**2. Fundamentals of Sheet Metal (1.5 hours)**

- Types of sheet metals and their properties (steel, aluminum, stainless steel, etc.)
- Understanding gauges and thickness
- Basic terminology and concepts

**3. Sheet Metal Design Principles (2 hours)**

- Basic design principles for sheet metal (bends, folds, cuts)
- Understanding manufacturability and design for assembly
- Common design mistakes and how to avoid them

**4. Tools and Software for Design (1.5 hours)**

- Introduction to CAD software used in sheet metal design (SolidWorks, AutoCAD, etc.)
- Basic functionalities and features
- Hands-on exercise: Creating a simple sheet metal part in CAD

**5. Q&A and Wrap-Up (30 mins)**

- Open floor for questions
- Summary of key points from the day

This structure provides a comprehensive introduction to sheet metal design, covering both foundational knowledge and practical design considerations.

**Mechanical Engineering Department**

**CONTENTS OF WORKSHOP (Day 2)**

**Subject:** Manufacturing Process: Becoming a Sheet Metal Design Professional

**Date:** 07-08-2019

**Time:** 09:00 AM to 5:00 PM

**Day 2: Advanced Design Techniques and Materials**

**1. Review of Day 1 and Objectives for Day 2 (30 mins)**

**2. Advanced Design Techniques (2 hours)**

- Complex bends and folds
- Incorporating features like flanges, hems, and louvers
- Tolerances and fit considerations

**3. Material Selection and Properties (1.5 hours)**

- Detailed exploration of different materials and their properties
- How material properties affect design and manufacturing
- Case studies of material selection

**4. Design for Manufacturing (2 hours)**

- Techniques to ensure designs are manufacturable
- Cost considerations and optimization
- Hands-on exercise: Design a part with cost and manufacturability constraints

**5. Q&A and Wrap-Up (30 mins)**

**CONTENTS OF WORKSHOP (Day 3)**

**Subject:** Manufacturing Process: Becoming a Sheet Metal Design Professional

**Date:** 08-08-2019

**Time:** 09:00 AM to 5:00 PM

**Day 3: Manufacturing Processes and Techniques**

**1. Review of Day 2 and Objectives for Day 3 (30 mins)**

**2. Sheet Metal Fabrication Processes (2 hours)**

- Cutting: Shearing, laser cutting, waterjet cutting
- Bending: Press brakes, roll bending
- Forming: Deep drawing, stamping

**3. Assembly Techniques (1.5 hours)**

- Joining methods: Welding, riveting, clinching, adhesive bonding
- Considerations for assembly: Tolerances, fit, and alignment

**4. Quality Control and Testing (1.5 hours)**

- Inspection techniques for sheet metal parts
- Common defects and their causes
- Hands-on exercise: Inspecting and evaluating sample parts

**5. Q&A and Wrap-Up (30 mins)**

This program covers essential design considerations, focusing on manufacturability, tolerance and fit, and efficient material utilization, providing a comprehensive guide to designing cost-effective, high-quality, and sustainable products.

**CONTENTS OF WORKSHOP (Day 4)**

**Subject:** Manufacturing Process: Becoming a Sheet Metal Design Professional

**Date:** 09-08-2019

**Time:** 09:00 AM to 5:00 PM

**Practical Applications and Troubleshooting**

**1. Review of Day 3 and Objectives for Day 4 (30 mins)**

**2. Real-World Applications (2 hours)**

- Case studies of sheet metal design in various industries (automotive, aerospace, HVAC)
- Discussion of design challenges and solutions

**3. Troubleshooting Common Issues (2 hours)**

- Identifying and resolving common design and manufacturing issues
- Hands-on exercise: Troubleshoot and resolve design issues in provided sample projects

**4. Practical Design Project (1.5 hours)**

- Group activity: Design a complex sheet metal part considering all factors discussed
- Presentation and critique of designs

**5. Q&A and Wrap-Up (30 mins)**

This workshop would equip participants with both the theoretical knowledge and practical skills needed to excel in sheet metal design, making them more effective and efficient in their roles.

We look forward to your participation.

**NOTICE OF WORKSHOP (Day 5)**

**Subject:** Manufacturing Process: Becoming a Sheet Metal Design Professional

**Date:** 10-08-2019

**Time:** 09:00 AM to 5:00 PM

**Day 5: Integration and Future Trends**

**1. Review of Day 4 and Objectives for Day 5 (30 mins)**

**2. Integration of Design and Manufacturing (1.5 hours)**

- How to integrate design with manufacturing processes
- Communication between design and manufacturing teams

**3. Emerging Trends and Technologies (1.5 hours)**

- Advances in sheet metal technologies (3D printing, advanced materials)
- Future trends in the industry

**4. Final Project and Evaluation (2.5 hours)**

- Final project: Complete a comprehensive design project from concept to presentation
- Peer review and feedback
- Evaluation of workshop content and personal progress

**5. Final Q&A and Certification (30 mins)**

- Open Q&A session
- Distribution of completion certificates
- Closing remarks and feedback collection

This workshop would equip participants with both the theoretical knowledge and practical skills needed to excel in sheet metal design, making them more effective and efficient in their roles. We look forward to your participation.

**QUIZ QUESTIONS OF WORKSHOP**

Bhai T ogesh

**Sheet Metal Design Professional Quiz**

**Day 1: Introduction to Sheet Metal Design**

1. What are the common types of sheet metal used in manufacturing?
  - ☒ a) Steel, Aluminum, Stainless Steel
  - ☐ b) Plastic, Wood, Glass
  - ☐ c) Copper, Iron, Lead
  - ☐ d) Gold, Silver, Bronze
2. What is the significance of gauge in sheet metal design?
  - ☐ a) It determines the weight of the metal
  - ☒ b) It measures the thickness of the sheet metal
  - ☐ c) It specifies the length of the sheet
  - ☐ d) It indicates the color of the metal
3. Which CAD software is commonly used for sheet metal design?
  - ☐ a) Adobe Photoshop
  - ☒ b) SolidWorks
  - ☐ c) Microsoft Excel
  - ☐ d) AutoCAD
4. What is a common mistake in sheet metal design related to bending?
  - ☒ a) Designing with incorrect bend radii
  - ☐ b) Using excessive material
  - ☐ c) Adding unnecessary features
  - ☐ d) Ignoring material properties

**Day 2: Advanced Design Techniques and Materials**

5. Which design feature is used to strengthen sheet metal parts?
  - ☐ a) Hems
  - ☐ b) Flanges
  - ☐ c) Louvers
  - ☒ d) All of the above
6. Why is material selection critical in sheet metal design?
  - ☒ a) It affects the visual appeal of the product
  - ☐ b) It influences the manufacturability and cost of the part
  - ☐ c) It determines the color of the final product
  - ☐ d) It impacts the software compatibility
7. What is the purpose of adding tolerances in a sheet metal design?
  - ☒ a) To ensure parts fit together correctly
  - ☐ b) To increase the overall cost
  - ☐ c) To make parts more decorative
  - ☐ d) To reduce the manufacturing time

**Day 3: Manufacturing Processes and Techniques**

8. Which process is used to cut sheet metal into desired shapes?

- ☐ a) Bending
  - ☒ b) Shearing
  - ☐ c) Forming
  - ☐ d) Welding
9. What is the primary method for joining sheet metal parts without heat?
- ☐ a) Welding
  - ☒ b) Riveting
  - ☐ c) Forging
  - ☐ d) Rolling
10. Which quality control method is commonly used to inspect sheet metal parts?
- ☐ a) Visual inspection
  - ☒ b) Chemical analysis
  - ☐ c) Thermal imaging
  - ☐ d) Acoustic testing

#### Day 4: Practical Applications and Troubleshooting

11. Which is a common design challenge in sheet metal projects?
- ☒ a) Achieving exact tolerances
  - ☐ b) Selecting appropriate colors
  - ☐ c) Ensuring compatibility with software
  - ☐ d) Reducing design complexity
12. What is a key factor in troubleshooting design issues in sheet metal parts?
- ☐ a) Ignoring the material properties
  - ☒ b) Analyzing the fit and alignment of parts
  - ☐ c) Maximizing the part size
  - ☐ d) Focusing on aesthetics only
13. Which of the following is an example of a sheet metal part used in the automotive industry?
- ☒ a) Car body panels
  - ☐ b) Engine coolant
  - ☐ c) Rubber seals
  - ☐ d) Interior upholstery

#### Day 5: Integration and Future Trends

14. What is one emerging technology in sheet metal manufacturing?
- ☒ a) 3D printing
  - ☐ b) Laser engraving
  - ☐ c) Manual handcrafting
  - ☐ d) Wood turning
15. What is the benefit of integrating design with manufacturing processes?
- ☐ a) It increases design complexity
  - ☒ b) It enhances the efficiency and reduces production costs
  - ☐ c) It limits material options
  - ☐ d) It delays the production timeline

**Day 2: Advanced Design Techniques and Materials**

5. Which design feature is used to strengthen sheet metal parts?
  - ☐ a) Hems
  - ☐ b) Flanges
  - ☒ c) Louvers
  - ☒ d) All of the above
6. Why is material selection critical in sheet metal design?
  - ☒ a) It affects the visual appeal of the product
  - ☐ b) It influences the manufacturability and cost of the part
  - ☐ c) It determines the color of the final product
  - ☐ d) It impacts the software compatibility
7. What is the purpose of adding tolerances in a sheet metal design?
  - ☒ a) To ensure parts fit together correctly
  - ☐ b) To increase the overall cost
  - ☐ c) To make parts more decorative
  - ☐ d) To reduce the manufacturing time

**Day 3: Manufacturing Processes and Techniques**

8. Which process is used to cut sheet metal into desired shapes?

- ☐ a) Bending
  - ☒ b) Shearing
  - ☐ c) Forming
  - ☐ d) Welding
9. What is the primary method for joining sheet metal parts without heat?
- ☐ a) Welding
  - ☒ b) Riveting
  - ☐ c) Forging
  - ☐ d) Rolling
10. Which quality control method is commonly used to inspect sheet metal parts?
- ☒ a) Visual inspection
  - ☐ b) Chemical analysis
  - ☐ c) Thermal imaging
  - ☐ d) Acoustic testing

#### Day 4: Practical Applications and Troubleshooting

11. Which is a common design challenge in sheet metal projects?
- ☒ a) Achieving exact tolerances
  - ☐ b) Selecting appropriate colors
  - ☐ c) Ensuring compatibility with software
  - ☐ d) Reducing design complexity
12. What is a key factor in troubleshooting design issues in sheet metal parts?
- ☐ a) Ignoring the material properties
  - ☒ b) Analyzing the fit and alignment of parts
  - ☐ c) Maximizing the part size
  - ☐ d) Focusing on aesthetics only
13. Which of the following is an example of a sheet metal part used in the automotive industry?
- ☐ a) Car body panels
  - ☒ b) Engine coolant
  - ☐ c) Rubber seals
  - ☐ d) Interior upholstery

#### Day 5: Integration and Future Trends

14. What is one emerging technology in sheet metal manufacturing?
- ☒ a) 3D printing
  - ☐ b) Laser engraving
  - ☐ c) Manual handcrafting
  - ☐ d) Wood turning
15. What is the benefit of integrating design with manufacturing processes?
- ☐ a) It increases design complexity
  - ☒ b) It enhances the efficiency and reduces production costs
  - ☐ c) It limits material options
  - ☐ d) It delays the production timeline

**NAVSAHYADRI EDUCATION SOCIETY'S  
GROUP OF INSTITUTIONS, PUNE**

Sr. No 69, 70, 71, Naigaon [Nasrapur], Bhore, Pune - 412213

**Answers:**

1. a) Steel, Aluminum, Stainless Steel
2. b) It measures the thickness of the sheet metal
3. b) SolidWorks
4. a) Designing with incorrect bend radii
5. d) All of the above
6. b) It influences the manufacturability and cost of the part
7. a) To ensure parts fit together correctly
8. b) Shearing
9. b) Riveting
10. a) Visual inspection
11. a) Achieving exact tolerances
12. b) Analyzing the fit and alignment of parts
13. a) Car body panels
14. a) 3D printing
15. b) It enhances the efficiency and reduces production costs

**SUMMARY OF WORKSHOP**

**Workshop Summary Report: Becoming a Sheet Metal Design Professional**

**Date:** [06-10/08/2019]

**Duration:** 6 hours/day for 5 days

**Location:** [N G I, Pune]

**Instructor:** [Anil Kamble]

**Objective:**

To provide participants with comprehensive knowledge and hands-on experience in sheet metal design, manufacturing processes, and practical applications.

**Day 1: Introduction to Sheet Metal Design**

- **Overview:**
  - Introduced basic concepts, materials, and terminology in sheet metal design.
  - Covered fundamental design principles, including bends, folds, and cuts.
- **Activities:**
  - Hands-on exercise using CAD software to create a simple sheet metal part.
- **Key Takeaway:**
  - Understanding of basic sheet metal properties and initial design techniques.

**Day 2: Advanced Design Techniques and Materials**

- **Overview:**
  - Explored complex design techniques, advanced material properties, and design for manufacturability.
- **Activities:**
  - Designed a part with cost and manufacturability constraints.
- **Key Takeaway:**
  - In-depth knowledge of advanced design features and material selection.

**Day 3: Manufacturing Processes and Techniques**

- **Overview:**
  - Detailed exploration of cutting, bending, and forming processes.
  - Discussed assembly techniques and quality control methods.
- **Activities:**
  - Hands-on inspection and evaluation of sample parts.
- **Key Takeaway:**
  - Understanding of various manufacturing processes and quality control.

**Day 4: Practical Applications and Troubleshooting**

- **Overview:**
  - Examined real-world applications and case studies.
  - Focused on troubleshooting common design and manufacturing issues.
- **Activities:**
  - Group project to design a complex sheet metal part, including a troubleshooting exercise.
- **Key Takeaway:**
  - Practical experience in addressing design challenges and applying solutions.

**Day 5: Integration and Future Trends**

- **Overview:**

- Integrated design with manufacturing processes and explored future trends in the industry.
- **Activities:**
  - Final project presentation and peer review, discussion of emerging technologies.
- **Key Takeaway:**
  - Comprehensive understanding of design integration and awareness of future advancements.

**Certification:** Participants received completion certificates upon successful conclusion of the workshop.

**Feedback:**

- Participants expressed increased confidence in sheet metal design and manufacturing.
- Positive feedback on practical exercises and real-world applications.

**Next Steps:**

- Participants encouraged to apply learned skills in real projects.
- Recommended further study of advanced CAD software and emerging technologies in sheet metal design.

**Contact Information:** For further questions or additional resources, please contact [Insert Contact Information].
